The Anthropology of Magic Susan Greenwood, 2009-11-01 Magic is arguably the least understood subject in anthropology today Exotic and fascinating it offers us a glimpse into another world but it also threatens to undermine the foundations of anthropology due to its supposed irrational and non scientific nature Magic has thus often been explained away by social or psychological reduction The Anthropology of Magic redresses the balance and brings magic as an aspect of consciousness into focus through the use of classic texts and cutting edge research Suitable for student and scholar alike The Anthropology of Magic updates a classical anthropological debate concerning the nature of human experience A key theme is that human beings everywhere have the potential for magical consciousness Taking a new approach to some perennial topics in anthropology such as shamanism mythology witchcraft and healing the book raises crucial theoretical and methodological issues to provide the reader with an engaging and critical understanding of the dynamics of magic

The Metamorphosis of Magic from Late Antiquity to the Early Modern Period Jan N. Bremmer, Jan R. Veenstra, 2002 Deities demons and angels became important protagonists in the magic of the Late Antique world and were also the main reasons for the condemnation of magic in the Christian era Supplicatory incantations rituals of coercion enticing suffumigations magical prayers and mystical songs drew spiritual powers to the human domain Next to the magician's desire to regulate fate and fortune it was the communion with the spirit world that gave magic the potential to purify and even deify its practitioners The sense of elation and the awareness of a metaphysical order caused magic to merge with philosophy notably Neoplatonism The heritage of Late Antique theurgy would be passed on to the Arab world and together with classical science and learning would take root again in the Latin West in the High Middle Ages The metamorphosis of magic laid out in this book is the transformation of ritual into occult philosophy against the background of cultural changes in Judaism Graeco Roman religion and Christianity This volume the first in the new series Groningen Studies in Cultural Change offers the papers presented at the workshop The Metamorphosis of Magic from Late Antiquity to the Early Modern Period held from 22 to 24 June 2000 and organised by Jan N. The Decline of Magic Michael

Hunter,2020-01-07 A new history which overturns the received wisdom that science displaced magic in Enlightenment Britain In early modern Britain belief in prophecies omens ghosts apparitions and fairies was commonplace Among both educated and ordinary people the absolute existence of a spiritual world was taken for granted Yet in the eighteenth century such certainties were swept away Credit for this great change is usually given to science and in particular to the scientists of the Royal Society But is this justified Michael Hunter argues that those pioneering the change in attitude were not scientists but freethinkers While some scientists defended the reality of supernatural phenomena these sceptical humanists drew on ancient authors to mount a critique both of orthodox religion and by extension of magic and other forms of superstition Even if the religious heterodoxy of such men tarnished their reputation and postponed the general acceptance of anti magical views slowly change did come about When it did this owed less to the testing of magic than to the growth of confidence in a stable world in which magic no longer had a place
