Of Qualities:

Optimising New Modes of Assessment: In Search of Qualities and Standards Mien Segers, Filip Dochy, E.

Cascallar, 2003-04-30 This is an essential book for all those concerned with the field of assessment. It addresses relevant and timely conceptual and practical issues from a research perspective and based on research results clearly provides solutions to practical applications at the cutting edge of the emerging area of new modes of assessment. In a clear and rigorous manner the authors explore new methods and study the various quality aspects of innovative approaches. **Primary and**

Secondary Qualities Lawrence Nolan, 2011-04-07 Fourteen new essays trace the historical development of the distinction between primary and secondary qualities, a key topic in metaphysics, epistemology, and philosophy of perception. The volume starts with the ancient Greeks, discusses virtually all major figures of the early modern era, and reflects on the place of the topic in philosophy today. *Ideas, Qualities and Corpuscles* Peter Alexander, 1985-05-09 This study presents a substantial and often radical reinterpretation of some of the central themes of Locke's thought. Professor Alexander concentrates on the

Essay Concerning Human Understanding and aims to restore that to its proper historical context. In Part I he gives a clear exposition of some of the scientific theories of Robert Boyle, which he argues heavily influenced Locke in employing similar concepts and terminology. Against this background he goes on in Part II to provide an account of Locke's views on the external world and our knowledge of it. He shows those views to be more consistent and plausible than is generally allowed, demonstrating how they make sense and enable scientific explanations of nature. In examining the views of Locke and Boyle together, the book throws light both on the development of philosophy and the beginnings of modern science, and in particular it makes a considerable and original contribution to our understanding of Locke's philosophy. *Peirce and the Threat of*

Nominalism Paul Forster, 2011-03-17 Charles Peirce, the founder of pragmatism, was a thinker of extraordinary depth and range. He wrote on philosophy, mathematics, psychology, physics, logic, phenomenology, semiotics, religion, and ethics, but his writings are difficult and fragmentary. This book provides a clear and comprehensive explanation of Peirce's thought. His philosophy is presented as a systematic response to nominalism, the philosophy which he most despised and which he regarded as the underpinning of the dominant philosophical worldview of his time. The book explains Peirce's challenge to nominalism as a theory of meaning and shows its implications for his views of knowledge, truth, the nature of reality, and ethics. It will be essential reading both for Peirce scholars and for those new to his work. **Lady Mary Shepherd** Deborah

Boyle, 2019-01-09 The philosophical writings of Lady Mary Shepherd (1777-1847) reveal an astute and lively intellect. In *An Essay upon the Relation of Cause and Effect* (1824) and *Essays on the Perception of an External Universe and Other Subjects Connected with the Doctrine of Causation* (1827), Shepherd engaged critically with the views of Hume, Berkeley, Reid, Stewart, de Condillac, and others, but she also presented an original and carefully argued philosophical system of her own. Highly regarded in her day, Shepherd's work faded into obscurity after her death; this collection of selections from her writings is

intended to bring her work back into focus for students and scholars. Selections include her writings about causation, knowledge of the external world, mathematical and physical induction, belief in miracles and God, and mind and body. This volume also includes an 1828 essay 'Shepherd published on vision'.

Variable Quality in Consumer Theory W.M. Wadman, 2016-07-01. Examines consumer decision making on products and services of variable quality at the level of retail markets. Addresses for the first time consumer-producer interaction at the level of the individual consumer, issues of quality, consumption experience, and willingness to pay as exhibited by individual consumers and how these issues affect the decision-making process.

Technological Economy Don Slater, Andrew Barry, 2005-07-15. In this major new collection, leading experts explore the multidisciplinary connections between technology and economy, drawing on new convergences between economic sociology and science and technology studies. Through theoretical and empirical studies, the authors investigate economics and economic knowledges as technologies, the economies as socio-technical arrangements, the nature of innovation, the role of technological mediations in representing and performing economies. This revealing book is ideal for those with an interest in contemporary social theory. It interrogates the evidence for the contemporary claims about the emergence of the new economy and knowledge-based economies and sheds new light on the relationship between economy and culture.

Bioethics and the Humanities Robin Downie, Jane Macnaughton, 2007-06-11. Critiquing many areas of medical practice and research whilst making constructive suggestions about medical education, this book extends the scope of medical ethics beyond sole concern with regulation. Illustrating some humanistic ways of understanding patients, this volume explores the connections between medical ethics, healthcare, and subjects such as philosophy, literature, creative writing, and medical history, and how they can affect the attitudes of doctors towards patients and the perceptions of medicine, health, and disease which have become part of contemporary culture. The authors examine a range of ideas in medical practice and research, including the idea that patient status or the doctor-patient relationship can be understood via quantitative scales, the illusion fostered by medical ethics that doctors, unlike those in other professions, are uniquely beneficent and indeed altruistic. An excellent text for undergraduate and postgraduate students of law, medical ethics, and medical healthcare law.

Bioethics and the Humanities shows the real ethical achievements, problems, and half-truths of contemporary medicine.
