Beaudreau, 2019-08-07 This is the first book to examine the nuts and bolts of production processes It proposes a truly consilient approach to modeling production processes one that goes beyond the vague principles found in standard economics and provides details that are consistent with the applied mechanics and engineering literature Providing a credible analysis of some of the most pressing questions of our era such as the productivity slowdown and the information paradox and bridging the gap between engineering applied physics economics and management science this book is a fascinating read for anyone interested in industry the modern economy and how physical factors constrain productivity growth *The Sociology of Speed* Judy Wajcman, Nigel Dodd, 2016-11-24 There is a widespread perception that life is faster than it used to be We hear constant laments that we live too fast that time is scarce and that the pace of everyday life is spiraling out of our control The iconic image that abounds is that of the frenetic technologically tethered iPhone iPad addicted citizen Yet weren't modern machines supposed to save and thereby free up time The purpose of this book is to bring a much needed sociological perspective to bear on speed it examines how speed and acceleration came to signify the zeitgeist and explores the political implications of this Among the major questions addressed are when did acceleration become the primary rationale for technological innovation and the key measure of social progress Is acceleration occurring across all sectors of society and all aspects of life or are some groups able to mobilise speed as a resource while others are marginalised and excluded Does the growing centrality of technological mediations of both information and communication produce slower as well as faster times waiting as well as busyness stasis as well as mobility To what extent is the contemporary imperative of speed as much a cultural artefact as a material one To make sense of everyday life in the twenty first century we must begin by interrogating the social dynamics of speed This book shows how time is a collective accomplishment and that temporality is experienced very differently by diverse groups of people especially between the affluent and those who service them *Frontier Research: Road and Traffic Engineering* Teik-Hua Law, Baohua Guo, 2022-11-01 This book contains selected papers resulting from the 2020 International Conference on Road
