Writing the Scene of Speaking Jon R. Snyder, 1989 The rediscovery in sixteenth century Italy of Aristotle's *Poetics* marks a crucial moment in the development of Western thought about literature for the flood of new and controversial works that accompanied this event laid the foundations of modern literary criticism and theory This is a study of the main literary theories of the late Italian Renaissance that seek to define a poetics of dialogue The author contends that dialogue among the most popular of all prose forms in Italy to develop a new theory of literature because it seems to subvert the conventional Renaissance understanding of what is literary and what is not With its close ties to dialectic and to Platonic philosophy on the one hand and its equally vital links to imaginative fiction on the other dialogue in the Renaissance stands at the crossroads of

the discourses of cognition and fiction Writing the Scene of Speaking examines the different solutions offered by sixteenth century Italian theorists to the problem posed by the hybrid textuality of dialogue and sets them in the context of a culture in a dramatic state of transition

Gender and the Writer's Imagination Mary Suzanne Schriber, 2014-07-15 The concept of woman as having a distinctive nature and requiring a separate sphere of activity from that of man was pervasive in the thinking of nineteenth-century Americans So dominant was this horizon of expectations for woman that the imaginations of our finest novelists were often subverted even as they attempted to expand the possibilities for women through their fiction Selecting five American writers James Fenimore Cooper Nathaniel Hawthorne William Dean Howells Henry James and Edith Wharton Schriber traces the impact of cultural expectations for woman on the art of the novel from the early nineteenth century through the advent of Modernism The novels of Cooper and Hawthorne exemplify the male imagination at work before the concept of woman's nature and sphere became burning issues as they did later in the century Howells while attempting to expand woman's sphere in his fiction in response to feminist challenges in fact demonstrates the

recalcitrance of a priori ideas James provoked rather than subverted by the ideology of gender was able to bend the culture's myopia to his own artistic purposes Wharton's novels in contrast document the female imagination seeking aesthetic solutions to the problems of women rather than to woman as problem Wharton constructs versions of female experience that were either invisible or anathema to her male counterparts Schriber's discussion centers on those points in each text at which the culture's horizon of expectations drives the decisions and choices of the artist sometimes to the benefit and sometimes at the expense of craft Making full use of gender as a category of literary analysis she recovers the meanings intended by the texts for audiences of their own time and distinguishes those meanings from their significance for modern readers Original in its methodology and insights *Gender and the Writer's Imagination* provides a model for future literary studies

Genre And The Invention Of The Writer Anis Bawarshi, 2003-12-01 In a focused and compelling discussion Anis Bawarshi looks to genre theory for what it can contribute to a refined understanding of invention In describing what he calls the genre function he explores what is at stake for the study and teaching of writing to imagine invention as a way that writers locate themselves via genres within various positions and activities He argues in fact that invention is a process in which writers are acted upon by genres as much as they act themselves Such an approach naturally requires the composition scholar to replace invention from the writer to the sites of action the genres in which the writer participates This move calls for a thoroughly rhetorical view of invention roughly in the tradition of Richard Young Janice Lauer and those who have followed them Instead of mastering notions of good writing Bawarshi feels that students gain more from learning how to adapt socially and rhetorically as they move from one genre's site of action to the next

The Blank Swan Elie Ayache, 2010-05-05 October 19th 1987 was a day of huge change for the global finance industry On this day the stock market crashed the Nobel Prize winning Black Scholes formula failed and volatility smiles were born and on this day Elie Ayache began his career on the trading floor of the French Futures and Options Exchange Experts everywhere sought to find a model for this event and ways to simulate it in order to avoid a recurrence in the future but the one thing that struck Elie that day was the belief that what actually happened on 19th October 1987 is simply non reproducible outside 19th October 1987 you cannot reduce it to a chain of causes and effects or even to a random generator that can then be reproduced or represented in a theoretical framework The Blank Swan is Elie's highly original treatise on the financial markets presenting a totally revolutionary rethinking of derivative pricing and technology It is not a diatribe against Nassim Taleb's The Black Swan but criticises the whole background or framework of predictable and unpredictable events white and black swans alike i.e. the very category of prediction In this revolutionary book Elie redefines the components of the technology needed to price

and trade derivatives Most importantly and drawing on a long tradition of philosophy of the event from Henri Bergson to Gilles Deleuze to Alain Badiou and on a recent brand of philosophy of contingency embodied by the speculative materialism of Quentin Meillassoux Elie redefines the market itself against the common perceptions of orthodox financial theory general equilibrium theory and the sociology of finance This book will change the way that we think about derivatives and approach the market If anything derivatives should be renamed contingent claims where contingency is now absolute and no longer derivative and the market is just its medium The book also establishes the missing link between quantitative modelling no longer dependent on probability theory but on a novel brand of mathematics which Elie calls the mathematics of price and the reality of the market
