Intervals in the Philosophy of Architecture Alberto Pérez Gómez, Stephen Parcell, 1996 In this second volume in the Chora series contributing authors explore critical questions for the theory and practice of architecture They take an interdisciplinary approach to architecture and other cultural concerns challenging readers to consider alternatives to conventional aesthetic and technological reductions **The Routledge Handbook of Architecture, Urban Space and Politics, Volume II** Nikolina Bobic, Farzaneh Haghighi, 2024-11-22 Architecture and the urban are connected to challenges around violence security race and ideology spectacle and data The first volume of this handbook extensively explored these oppressive roles This second volume illustrates that escaping the corporatized and bureaucratized orders of power techno managerial and consumer oriented capitalist economic models is more urgent and necessary than ever before Herein lies the political role of architecture and urban space including the ways through which they can be transformed and alternative political realities constituted The volume explores the methods and spatial practices required to activate the political dimension and the possibility for alternative practices to operate in the existing oppressive systems while not being swallowed by these structures Fostering new political consciousness is explored in terms of the following themes Events and Dissidence Biopolitics Ethics and Desire Climate and Ecology Urban Commons and Social Participation Marginalities and Postcolonialism Volume II embraces engagement across disciplines and offers a wide range of projects and critical analyses across the so called Global North and South This multidisciplinary collection of 36 chapters provides the reader with an extensive resource of case studies and ways of thinking for architecture and urban space to become more emancipatory Chapter 1 of this book is freely available as a downloadable Open Access PDF at [http www.taylorfrancis.com](http://www.taylorfrancis.com) under a Creative Commons Attribution CC BY 4.0 license **The Political Unconscious of Architecture** Nadir Lahiji, 2016-02-24 Thirty years have passed since eminent cultural and literary critic Fredric Jameson wrote his classic work *The Political Unconscious Narrative as a Socially Symbolic Act* in which he insisted that there is nothing that is not social and historical indeed that everything is in the last analysis political Bringing together a team of leading scholars including Slavoj Žižek Joan Ockman Jane Rendell and Kojin Karatani this book critically examines the important contribution made by Jameson to the radical critique of architecture over this period highlighting its continued importance to contemporary architecture discourse Jameson's notion of the political unconscious represents one of the most powerful notions in the link between aesthetics and politics in contemporary discourse Taking this along with other key concepts from Jameson as the basis for its chapters this anthology asks questions such as Is architecture a place to stage class struggle How can architecture act against the conditions that affirmatively produce it What does the critical and the negative mean in the discourse of architecture and How do we prevent architecture from participating in the reproduction of the cultural logic of late capitalism This book breaks new ground in architectural criticism and offers insights into the interrelationships between politics culture space and

architecture and in doing so it acts as a counter balast to the current trend in architectural research where a general aestheticization dominates the discourse
