Of Certainty:

"The" Works of John Locke in Four Volumes John Locke, 1777 **A Meditation on Going Home** Delbert L.

Wiens, 2024-10-31 Delbert Wiens was born during the depression to an ethnic German speaking Mennonite family. As an adult he became the righteous older sibling who wanted oddly to identify with his elders. Returning home to Corn, Oklahoma with a severe case of culture shock after living in Vietnam, he wrote *New Wineskins for Old Wine* to tell Mennonites they were succumbing to evangelical forms of modernism. Unfortunately, the relentlessness of his analysis convinced many that he had a dangerous mind. This book tells the story of his recovery of the wisdom of his elders. In response, Wiens develops metaphors like concrete and abstract to clarify how civilizations evolve. He centers his attempt to tell stories that like biblical narratives and parables evoke traditional attitudes and lifestyles. Phrases like mutual aid and ethnic clichés like Gottesfurcht (honoring God) and Gelassenheit (letting go) are used to describe their qualities and virtues. The final chapters use a more abstract style to trace some of the positive and negative consequences of progress. This book circles around its center chapters 4-9 that describes the faithfulness and character of his elders. May these meditations better evoke the desire to imitate them.

Computing Attitude and Affect in Text: Theory and Applications James G. Shanahan, Yan Qu, Janyce Wiebe, 2006-01-17 Human Language Technology (HLT) and Natural Language Processing (NLP) systems have typically focused on the factual aspect of content analysis. Other aspects including pragmatics, opinion, and style have received much less attention. However, to achieve an adequate understanding of a text, these aspects cannot be ignored. The chapters in this book address the aspect of subjective opinion, which includes identifying different points of view, identifying different emotive dimensions, and classifying text by opinion. Various conceptual models and computational methods are presented. The models explored in this book include the following: distinguishing attitudes from simple factual assertions; distinguishing between the author's reports from reports of other people's opinions; and distinguishing between explicitly and implicitly stated attitudes. In addition, many applications are described that promise to benefit from the ability to understand attitudes and affect, including indexing and retrieval of documents by opinion, automatic question answering about opinions, analysis of sentiment in the media, and in discussion groups about consumer products, political issues, etc., brand and reputation management, discovering and predicting consumer and voting trends, analyzing client discourse in therapy and counseling, determining relations between scientific texts by finding reasons for citations, generating more appropriate texts, and making agents more believable and creating writers' aids. The studies reported here are carried out on different languages such as English, French, Japanese, and Portuguese. Difficult challenges remain, however. It can be argued that analyzing attitude and affect in text is an NLP complete problem.

clinical trials for a variety of reasons The healthy volunteers may be seeking extra money to pay off college tuition or they may know someone who is suffering and would potentially benefit from the results of the trial The patient who is terminally ill might participate in a clinical trial simply as a last hope for a cure Whatever the goals though most participants will experience the same sense of bewilderment as they encounter the jargon and medical terminology that they will hear and have to read about and understand during the course of the clinical trial Clinical Trials What Patients and Volunteers Need to Know demystifies the entire process focusing on the process of drug development and the clinical trial itself Writing from a lifetime of experience the author provides important questions to ask those running a clinical trial key definitions and terms for a participant to know and understand as well as anecdotes illustrating the clinical trial process The author also grapples with the idea of informed consent providing mechanisms for patients and volunteers to feel fully informed before signing up for the trial A vital resource for those who are considering enrolling in a clinical trial or for the parents friends or relatives of those involved in a clinical trial this book takes away the mystery and allows the participant to enter a clinical trial feeling both informed and confident
