Introduction to Landscape and Garden Design James Blake, 2016-12-05 How do you design a landscape book suitable for its intended uses How can the natural qualities of a landscape be enhanced with new features and focal points How can you make pedestrians stay on the footpath What kind of plant path or wall should you put where and what sort of contract should you choose for your client s contractor This refreshingly down to earth introduction to the vast subject of landscape design and construction answers all these questions guiding new students through the many facets of professional practice and welding together the artistic legal financial environmental and management issues which can seem so dauntingly disconnected Illustrated with original drawings photographs sample plans and facsimiles including a new colour plate section this readable classic has been fully revised and updated throughout It opens with a completely new chapter which explains design and aesthetic principles explores the history of our relationship to landscape and shows how design principles can be applied to influence reactions to the finished site The author then considers different elements of hard landscape and their relative merits in different situations The soft landscape section includes coverage of the effects of mass and form natural and abstract planting and the difficult subject of plant selection A step by step guide through all the stages of managing a project from initial discussions with clients site inspection surveying and quoting through tendering contracting contractual agreements development from concept design to final plans and drawings as well as maintenance now includes the current information on CDM regulations and provides readers with a plain speaking reference on client management and contractual administration Added to the guide to drawing and lettering is an extensive section on computer aided design A bibliography and list of useful organization are also included *Conceptualist Landscapes* Paul Cooper, 2014-07-07 Conceptual gardens depend on inspiration which is the result of an exhaustive intellectual process The starting point is an IDEA or stimulus that pushes the design along rather than observing more conventional styles whether classical or modernist into which idea or

relationships are fitted Horticultural considerations architectural or aesthetic doctrines and practically based problem solving are either abandoned or regarded as a means to an end rather than the end in itself Idea driven design therefore cannot be taught by a rule of thumb methodology So the way to design a conceptualist garden is not the theme of this book nor does it contain of the peg solutions for garden and landscape designers Rather it encourages student and professional designers to think further towards their designed solutions
