**Making Ideas Visible in the Eighteenth Century** Jennifer Milam, Nicola Parsons, 2022-01-14 This volume considers how ideas were made visible through the making of art and visual experience occasioned by reception during the long eighteenth century The event that gave rise to the collection was the 15th David Nichol Smith Seminar in Eighteenth Century Studies which launched a new Australian and New Zealand Society of Eighteenth Century Studies Two strands of interest are explored by the individual authors The first four essays work with ideas about material objects and identity formation suggesting how the artist's physical environment contributes to the sense of self as a practicing artist or artisan as an individual patron or collector or as a woman or religious outsider The last four essays address the intellectual work that can be expressed through or performed by objects Through a consideration of the material formation of concepts this book explores questions that are implicated by the need to see ideas in painted sculpted illustrated and designed forms In doing so it introduces new visual materials and novel conceptual models into traditional accounts of the intellectual history of the Enlightenment

[The Trafalgar Chronicle](#) Sean Heuvel, Judith Pearson, 2022-01-19 The Trafalgar Chronicle is the publication of choice for new research about the Georgian Navy sometimes called Nelson's Navy though its scope includes all the sailing navies of the period from 1714 to 1837 The theme of the 2021 issue is Georgian Navy encounters with indigenous and enslaved populations The theme is particularly relevant to current day discussions and social activism occurring across the globe that have brought new insights and perspectives to Western history of colonization exploration and slavery The lead article by 1805 Club member Tom D Fremantle tells the story of his ancestor Philip Gidley King who sailed to Botany Bay with the First Fleet in 1787 becoming the first Lieutenant Governor of Norfolk Island and the third Governor of New South Wales His encounters with the Maoris are unforgettably touching Another contribution reveals how the British lured slaves away from their American masters plantations with the promise of freedom during the War of 1812 In the tradition of recent editions the 2021 Trafalgar Chronicle contains biographical sketches of Nelson's contemporaries including Vice Admiral Sir Charles Saunders naval hero of Quebec Sir Harry Neale Baronet GCB a royal favorite and Admiral Sir Philip Durham a Trafalgar Captain turned politician Meanwhile Captain Christer H gg RSwN Rtd regales readers with the tale of Captain Johan Puke leading the Swedish fleet in a daring breakout from the Russian blockade at Viborg in 1790 Scholars and students experts and enthusiasts fascinated by

the era of the sailing navy will be absorbed by the latest edition of this handsomely illustrated journal      **The Sloop of War, 1650-1763** Ian McLaughlan, 2020-01-31 A delight fulfills a long felt need to do justice to the smaller ships of war that did such sterling service for the sailing Royal Navy Ships in Scale This is the first study in depth of the Royal Navy's vital but largely ignored small craft In the age of sail they were built in huge numbers and in far greater variety than the more regulated major warships so they present a particular challenge to any historian attempting a coherent design history However for the first time this book charts the development of the ancillary types variously described in the 17th century as sloops ketches brigantines advice boats and even yachts as they coalesce into the single 18th century category of Sloop of War In this era they were generally two masted although they set a bewildering variety of sail plans from them The author traces their origins to open boats like those carried by Basque whalers shows how developments in Europe influenced English craft and homes in on the relationship between rigs hull form and the duties they were designed to undertake Visual documentation is scanty but this book draws together a unique collection of rare and unseen images coupled with the author's own reconstructions in line drawings and watercolor sketches to provide the most convincing depictions of the appearance of these vessels By tackling some of the most obscure questions about the early history of small boat rigs the book adds a dimension that will be of interest to historians of coastal sail and practical yachtsmen as well as warship enthusiasts Fascinating It combines a truly scholarly delivery with a lovely presentation History brought to life tomcunliffe.com

**The Manuscripts of the House of Lords: 1702-1704 (H.L. 62)** Great Britain. Royal Commission on Historical Manuscripts, 1887 Nelson's Arctic Voyage Peter Goodwin, 2019-05-16 In the summer of 1773 the 14 year old Horatio Nelson took part in an expedition to the Arctic which came close to ending his naval career before it had begun The expedition was to find a navigable northern passage between the Atlantic and Pacific and was supported by the Royal Society and King George III Two bomb vessels HMS Racehorse and Carcass were fitted out and strengthened under the command of Captain Hon Constantine Phipps It was an extremely cold Arctic summer and the ships became locked in ice far from Spitzbergen and were unable to cut their way out until days later when the wind changed and the ice broke up The ships were extricated and returned home On the trip the young Nelson had command of one of the smaller boats of the ships a four oared cutter manned by twelve seamen In this he helped to save the crew of a boat belonging to the Racehorse from an attack by a herd of enraged walruses He also had a more famous encounter with a polar bear while attempting to obtain a bearskin as a present for his father an exploit that later became part of the Nelson legend Drawing on the ship's journals and expedition commander Phipps' journal from the National Archives the book creates a picture of the expedition and life on board Using the ship's muster books it also details the ship's crews giving the different roles and ranks in the ships The book is illustrated using some of the ship's drawings and charts and pictures of many objects used on the ship while a navigational chart of the route taken has been created from the logbooks The book also looks at the overall concept of naval exploration as set in train by Joseph Banks and the Royal Society The fact that the expedition failed as a result of poor planning with potentially tragic results demonstrates the difficulties and uncertainties of such an expedition It also looks at a great naval commander at the earliest stage of his career and considers how the experience might have shaped his later career and attitudes Other great captains and voyages are discussed alongside Nelson including Captain Cook and his exploration of the south seas and the later ill fated northern journeys of Franklin and Shackleton
