Identity Construction and Science Education Research Maria

Varelas,2012-12-17 In this edited volume science education scholars engage with the constructs of identity and identity construction of learners teachers and practitioners of science Reports on empirical studies and commentaries serve to extend

theoretical understandings related to identity and identity development vis vis science education link them to empirical evidence derived from a range of participants educational settings and analytic foci examine methodological issues in identity studies and project fruitful directions for research in this area Using anthropological sociological and socio cultural perspectives chapter authors depict and discuss the complexity messiness but also potential of identity work in science education and show how critical constructs such as power privilege and dominant views access and participation positionality agency structure dialectic and inequities are integrally intertwined with identity construction and trajectories Chapter authors examine issues of identity with participants ranging from first graders to pre service and in service teachers to physics doctoral students to show ways in which identity work is a vital albeit still underemphasized dimension of learning and participating in science in and out of academic institutions Moreover the research presented in this book mostly concerns students or teachers with racial ethno linguistic class academic status and gender affiliations that have been long excluded from or underrepresented in scientific practice science fields and science related professions and linked with science achievement gaps This book contributes to the growing scholarship that seeks to problematize various dominant views regarding for example what counts as science and scientific competence who does science and what resources can be fruitful for doing science

Identity Gerald Izenberg, 2016-03-30 Identity The Necessity of a Modern Idea is the first comprehensive history of identity as the answer to the question who or what am I It covers the century from the end of World War I when identity in this sense first became an issue for writers and philosophers to 2010 when European political leaders declared multiculturalism a failure just as Canada which pioneered it was hailing its success Along the way the book examines Erik Erikson s concepts of psychological identity and identity crisis which made the word famous the turn to collective identity and the rise of identity politics in Europe and America varieties and theories of group identity debates over accommodating collective identities within liberal democracy the relationship between individual and group identity the postmodern critique of identity as a concept and the ways it nonetheless transformed the social sciences and altered our ideas of ethics At the same time the book is an argument for the validity and indispensability of identity properly understood Identity was not a concept before the twentieth century because it was taken for granted The slaughter of World War I undermined the honored identities of prewar Europe and as a result the idea of identity as something objective and stable was thrown into question at the same time that people began to sense that it was psychologically and socially necessary We can t be at home in our bodies act effectively in the world or interact comfortably with others without a stable sense of who we are Gerald Izenberg argues that while it is a mistake to believe that our identities are givens that we passively discover about ourselves decreed by God destiny or nature our most important identities have an objective foundation in our existential situation as bodies social beings and creatures who aspire to meaning and transcendence as well as in the legitimacy of our historical particularity
