Iris Abroad is the fourth book in the critically acclaimed Iris Wildthyme series of books from Obverse Books Iris and Panda have been sorting through their holiday snaps with a little help from Stuart Douglas and Paul Magrs and come up with a pile of stories which to quote Panda don't make us look complete fools **An American Text-book of Diseases of the Eye, Ear, Nose and Throat** George Edmund De Schweinitz, Burton Alexander Randall, 1899 *The Gardener's Iris Book* William A. Shear, 1998 A complete guide to growing and propagating irises **The Iris** Brian Mathew, 1981 **A Guide to Species Irises** British Iris Society. Species Group, 1997-03-27 This 1997 volume provided the first comprehensive survey of this group of plants since publication of *The Genus Iris* by W R Dykes *The Art and Craft of Handmade Books* Shereen LaPlantz, 2016-07-20 Innovative approach to bookbinding explains techniques that elevate handmade books into extraordinary artworks Simple well illustrated directions explain how to make pop up panels pages that explode from the spine slipcases and more *Rape, Rage and Feminism in Contemporary American Drama* Davida Bloom, 2015-11-30 This first ever study of rape in modern American drama examines portrayals of rape raped women and rapists in 36 plays written between 1970 and 2007 the period during which the feminist movement made rape a matter of public discourse These dramas reveal much about sexuality and masculine and feminine identity in the United States The author traces the impact of second wave feminism antifeminist backlash third wave feminism and postfeminism on the dramatic depiction of rape The prevalence of commonly accepted rape myths that women who dress provocatively invite sexual assault for example is well documented along with equally frequent examples which dispute these myths **Handbook of Remote Biometrics** Massimo Tistarelli, Stan Z. Li, Rama Chellappa, 2009-06-02 The development of technologies for the identification of individuals has driven the interest and curiosity of many people Spearheaded and inspired by the Bertillon coding system for the classification of humans based on physical measurements scientists and engineers have been trying to invent new devices and classification systems to capture the human identity from its body measurements One of the main limitations of the precursors of today's biometrics which is still present in the vast majority of the existing biometric systems has been the need to keep the device in close contact with the subject to capture the biometric measurements This clearly limits the applicability and convenience of biometric systems This book presents an important step in addressing this limitation by describing a number

of methodologies to capture meaningful biometric information from a distance. Most materials covered in this book have been presented at the International Summer School on Biometrics which is held every year in Alghero, Italy, and which has become a flagship activity of the IAPR Technical Committee on Biometrics (IAPR TC4). The last four chapters of the book are derived from some of the best presentations by the participating students of the school. The educational value of this book is also highlighted by the number of proposed exercises and questions which will help the reader to better understand the proposed topics.
