Nelson Algren Richard F. Bales, 2024-11-07 This book addresses critical gaps in existing biographies of Nelson Algren providing new perspectives on his writing style literary contributions professional colleagues and personal life especially his relationship with Simone de Beauvoir Although Beauvoir maintained a simultaneous relationship with philosopher Jean Paul Sartre the correspondence exchanged between Beauvoir Algren and Sartre as this book discusses sheds new light on her transatlantic love affair with Algren Moreover this work challenges the assertion that Algren's writing aligns seamlessly with the New Journalism style popularized by Tom Wolfe It investigates how Algren's literary legacy might have diverged had he embraced more of the principles associated with New Journalism The Science of Gun Policy RAND Corporation, 2018-03-02 This report synthesizes the available scientific evidence on the effects of various firearm policies on firearm deaths violent crime the gun industry participation in hunting and sport shooting and other outcomes Based on this synthesis the authors highlight policies whose effects are better supported by evidence and areas where more and better information could contribute to establishing fair and effective gun policies Journal of Biblical and Theological Studies Daniel S. Diffey, Ryan A. Brandt, 2016-10-12 The Journal of Biblical and Theological Studies JBTS is an academic journal focused on the fields of Bible and Theology from an inter denominational point of view The journal is comprised of an editorial board of scholars that represent several academic institutions throughout the world IBTS is concerned with presenting high level original scholarship in an approachable way Academic journals are often written by scholars for other

scholars They are technical in nature assuming a robust knowledge of the field There are fewer journals that seek to introduce biblical and theological scholarship that is also accessible to students JBTS seeks to provide high level scholarship and research to both scholars and students which results in original scholarship that is readable and accessible As an interdenominational journal JBTS is broadly evangelical We accept contributions in all theological disciplines from any evangelical perspective In particular we encourage articles and book reviews within the fields of Old Testament New Testament Biblical Theology Church History Systematic Theology Practical Theology Philosophical Theology Philosophy and Ethics Latin American Literary Boom and U.S. Nationalism During the Cold War Deborah N. Cohn, 2012 How the dissemination of Latin American literature in the U S was caught between the desire to support the literary revolution of the Boom writers and the fear of revolutionary politics John King A Manual for Writers of Research Papers, Theses, and **Dissertations, Seventh Edition** Kate L. Turabian, 2009-08-14 Dewey Bellow Strauss Friedman The University of Chicago has been the home of some of the most important thinkers of the modern age But perhaps no name has been spoken with more respect than Turabian The dissertation secretary at Chicago for decades Kate Turabian literally wrote the book on the successful completion and submission of the student paper Her Manual for Writers of Research Papers Theses and Dissertations created from her years of experience with research projects across all fields has sold more than seven million copies since it was first published in 1937 Now with this seventh edition Turabian's Manual has undergone its most extensive revision ensuring that it will remain the most valuable handbook for writers at every level from first year undergraduates to dissertation writers apprehensively submitting final manuscripts to senior scholars who may be old hands at research and writing but less familiar with new media citation styles Gregory G Colomb Joseph M Williams and the late Wayne C Booth the gifted team behind The Craft of Research and the University of Chicago Press Editorial Staff combined their wide ranging expertise to remake this classic resource. They preserve Turabian's clear and practical advice while fully embracing the new modes of research writing and source citation brought about by the age of the Internet Booth Colomb and Williams significantly expand the scope of previous editions by creating a guide generous in length and tone to the art of research and writing Growing out of the authors best selling Craft of Research this new section provides students with an overview of every step of the research and writing process from formulating the right questions to reading critically to building arguments and revising drafts This leads naturally to the second part of the Manual for Writers which offers an authoritative overview of citation practices in scholarly writing as well as detailed information on the two main citation styles notes bibliography and author date This section has been fully revised to reflect the recommendations of the fifteenth edition of The Chicago Manual of Style and to present an expanded array of source types and updated examples including guidance on citing electronic sources. The final section of the book treats issues of style the details that go into making a strong paper Here writers will find advice on a wide range of topics including punctuation table formatting and use of quotations The

appendix draws together everything writers need to know about formatting research papers theses and dissertations and preparing them for submission This material has been thoroughly vetted by dissertation officials at colleges and universities across the country This seventh edition of Turabian's Manual for Writers of Research Papers Theses and Dissertations is a classic reference revised for a new age It is tailored to a new generation of writers using tools its original author could not have imagined while retaining the clarity and authority that generations of scholars have come to associate with the name Justice Between Simplification and Formalism Christoph Kern, 2007 A recent study in the field of comparative economics or more precisely numerical comparative law constructed an index of procedural formalism of dispute resolution for more than 100 countries and analyzed the relationship between procedural formalism and certain aspects of quality of the judicial systems The study s results suggest a strong relationship between legal origins formalism and the quality of dispute resolution Not surprisingly the study closes with a recommendation for reform What makes this study so important is not only its findings backed by an amount of data which seems to be a guarantee for the study s universal validity but also the financial support of the World Bank an indicator of the Bank s interest in these questions Similar studies in the area of banking securities and corporate law have received much attention from the legal community However for the recent study on civil procedure this is not the case Christoph Kern provides a first critical approach to the study from the perspective of a legal scholar He does not suggest a mere re coding but focuses on the methodology and the underlying legal questions After an extensive discussion of the input to the study the author turns to the way the study combines the data and in particular how it interprets the results He concludes that the study leaves a mixed impression and that therefore doubts remain as to its results and interpretation
