Nickens, 2008 *Italian Sign Language from a Cognitive and Socio-semiotic Perspective* Virginia Volterra, Maria Roccaforte, Alessio Di Renzo, Sabina Fontana, 2022-09-01 This volume reveals new insights on the faculty of language By proposing a new approach in the analysis and description of Italian Sign Language LIS that can be extended also to other sign languages this book also enlightens some aspects of spoken languages which were often overlooked in the past and only recently have been brought to the fore and described First the study of face to face communication leads to a revision of the traditional dichotomy between linguistic and enacted to develop a new approach to embodied language Kendon 2004 Second all structures of language take on a sociolinguistic and pragmatic meaning as proposed by cognitive semantics which considers it impossible to trace a separation between purely linguistic and extralinguistic knowledge Finally if speech from the point of view of its materiality is variable fragile and non segmentable i e not systematically discrete also signs are not always segmentable into discrete invariable and meaningless units This then calls into question some of the properties traditionally associated with human languages in general notably that of duality of patterning These are only some of the main issues you will find in this volume that has no parallel both in sign and in spoken languages linguistic research **Standardisation and the Wealth of Place Names: Aspects of a Delicate Relationship**

Chrismi-Rinda Loth, *Standardisation and the Wealth of Place Names Aspects of a Delicate Relationship* is a selection of double blind peer reviewed papers from the 6th International Symposium on Place Names that took place virtually 29 September 1 October 2021 The symposium explored the issues of multiple place names vis vis processes of standardisation These studies collectively show that there is not a simplistic dichotomy between standardisation and the protection of cultural heritage Some papers grapple with the implications and execution of standardisation processes while others explore the emergence of alternative or unofficial names in response to top down initiatives The matter of signed place names also receives some attention A number of papers excavate the layers of multiple place names thereby contributing to our wealth of toponymic knowledge These proceedings are the product of collaboration between Southern African and international researchers As such it is a valuable resource to local as well as international scholars who are interested in the

Taboo in Sign Languages Donna Jo Napoli, Jami Fisher, Gene Mirus, 2023-10-26 Taboo topics in deaf communities include the usual ones found in spoken languages as well as ones particular to deaf experiences both in how deaf people relate to hearing people and how deaf people interact with other deaf people Attention to these topics can help linguists understand better the consequences of field method choices and lead them to adopt better ones Taboo expressions in American Sign Language are innovative regarding the linguistic structures they play with This creativity is evident across the grammar in non taboo expressions but seems to revel in profane ones When it comes to the syntax however certain types of structures occur in taboo expressions that are all but absent elsewhere showing grammatical possibilities that might have gone unnoticed without attention to taboo Taboo expressions are innovative as well in how they respond to changing culture where lexical items that are incoherent with community sensibilities are corrected

Structured activities for classroom use *Words Made Flesh* R. A. R. Edwards, 2014 During the early nineteenth century schools for the deaf appeared in the United States for the first time These schools were committed to the use of the sign language to educate deaf students Manual education made the growth of the deaf community possible for it gathered deaf people together in sizable numbers for the first time in American history It also fueled the emergence of Deaf culture as the schools became agents of cultural transformations Just as the Deaf community began to be recognized as a minority culture in the 1850s a powerful movement arose to undo it namely oral education Advocates of oral education deeply influenced by the writings of public school pioneer Horace Mann argued that deaf students should stop signing and should start speaking in the hope that the Deaf community would be abandoned and its language and culture would vanish In this revisionist history *Words Made Flesh* explores the educational battles of the nineteenth century from both hearing and deaf points of view It places the growth of the Deaf community at the heart of the story of deaf education and explains how the unexpected emergence of Deafness provoked the pedagogical battles that dominated the field of deaf education in the nineteenth century and still reverberate today Jordanian Sign Language Bernadet Hendriks, 2008
