Two Worlds, One Consciousness: Unifying Lucid Dreaming and Conscious Living Steven Ernenwein, 2011

Theory and Practice of Psychiatry Bruce J. Cohen, 2003-02-06 Based on years of teaching psychiatry to medical students and residents this single authored textbook offers a conversational yet detailed guide to modern psychiatric theory and practice Exploring various approaches to psychiatric disorders including neurobiology dimensional personality assessment behavioral science and psychodynamic and cognitive theories it lucidly illustrates each approach's strengths and weaknesses and suggests how clinicians can interweave them in working with patients Using clinical vignettes and recent research findings to illustrate the connections between phenomenology pathophysiology and treatment it covers all of the major psychiatric disorders and includes tables listing their DSM IV TR diagnostic criteria The book offers balanced coverage of subjects that receive scant attention in other introductory textbooks including the limitations of the DSM IV categorical approach to psychiatric diagnosis controversies surrounding the dissociative disorders and recovered memories and the prescription of stimulant medications to children with suspected attention deficit hyperactivity disorder Later chapters provide practical guidelines for

estimating a patient's risk of suicide and violence and for assessing competence to consent to medical or psychiatric treatment. In eschewing a dry recitation of clinical syndromes for an engaging discussion aimed at teaching the reader how to think psychiatrically, the book will appeal to medical students, psychiatric residents, mental health clinicians, and primary care physicians. *The Therapist's Answer Book* Jerome S. Blackman, 2012-11-27

Therapists inevitably feel more gratified in their work when their cases have better treatment outcomes. This book is designed to help them achieve that by providing practical solutions to problems that arise in psychotherapy, such as: Do depressed people need an antidepressant or psychotherapy alone? How do you handle people who want to be your friend, who touch you, who won't leave your office, or who break boundaries? How do you prevent people from quitting treatment prematurely? Suppose you don't like the person who consults you? What if people you treat with CBT don't do their homework? When do you explain defense mechanisms, and when do you use supportive approaches? Award-winning professor Jerome Blackman answers these and many other tricky problems for psychotherapists. Dr. Blackman punctuates his lively text with tips and snippets of various theories that apply to psychotherapy. He shares his advice and illustrates his successes and failures in diagnosis, treatment, and supervision. He highlights fundamental, fascinating, and perplexing problems he has encountered over decades of practicing and supervising therapy.
