By Investment Advisor magazine details why so many investors fail to get the long-term results they desire. The short answer is many investors fail to question if what they believe is true and are therefore blinded by tradition, biases, ideology, or any number of cognitive errors. Your goal as an investor shouldn't be to be error-free; that's impossible. Rather, to be more successful, you should aim to lower your error rate. *Debunkery* gets you started by debunking 50 common myths, but that's just the beginning. It also gives you the tools you need to continue to do your own debunkery for the rest of your investing career.
