Barberini became active participants in the governing of the countryside Villagers cultivated and exploited interference from the aristocratic family and the papal government but they also kept urban elites at bay defending their rights through the strategies of adversarial literacy Such literate practices drew on village mastery of local constitutions debates in the village assembly and brilliant use of the legal system of the papacy to thwart the designs of the Barberini Later villagers created and interpreted sources for themselves effectively challenging the elite monopoly on making and interpreting texts A lost world of increasingly savvy villagers irate nobles and exasperated bureaucrats emerges here in an engaging narrative that chronicles how seemingly marginalized villagers challenged the pragmatic control of the Roman countryside using texts and ideas that urban elites had exported to the countryside for other purposes *Early Modern Europe, 1450-1789* Merry E.

Wingfield College and Its Patrons Peter Bloore, Edward A. Martin, 2015 The 650th anniversary of the foundation of Wingfield College was the occasion for a special two day symposium marking the culmination of a three year UEA funded research project into the college and castle The building projects of the late medieval aristocracy focused on their homes and the monasteries churches or chantry foundations under their patronage where their family were buried and commemorated This commemoration allowed a visual celebration of their achievements status and lineage the scale and prestige of which reflected on the fortunes of the family as a whole Wingfield is explored in the context of both the actual building of the castle

chantry chapel and the college and that of the symbolic function of these as a demonstration of aristocratic status The contributions to this book examine many topics which have hitherto been neglected such as the archaeology of the castle which had never been excavated the complex history of the college s architecture and the detailed study of the monuments in the church The latest techniques are used to reconstruct the college and castle with a DVD to demonstrate these And the context of the family and its fortunes are explored in chapters on the place of the de la Poles in fifteenth century history as soldiers administrators and potential claimants to the throne

settlements and the effects of recreation on rural landscapes **Under the Ancestors' Eyes** Martina Deuchler, 2020-05-11
Under the Ancestors Eyes presents a new approach to Korean social history by focusing on the origin and development of the indigenous descent group Martina Deuchler maintains that the surprising continuity of the descent group model gave the ruling elite cohesion and stability and enabled it to retain power from the early Silla fifth century to the late nineteenth century This argument underpinned by a fresh interpretation of the late fourteenth century Kory Chos n transition illuminates the role of Neo Confucianism as an ideological and political device through which the elite regained and maintained dominance during the Chos n period Neo Confucianism as espoused in Korea did not level the social hierarchy but instead tended to sustain the status system In the late Chos n it also provided ritual models for the lineage building with which local elites sustained their preeminence vis vis an intrusive state Though Neo Confucianism has often been blamed for the rigidity of late Chos n society it was actually the enduring native kinship ideology that preserved the strict social status system By utilizing historical and social anthropological methodology and analyzing a wealth of diverse materials Deuchler highlights Korea s distinctive elevation of the social over the political **The Park Chung Hee Era** Byung-Kook Kim, Ezra F. Vogel, 2013-03-11 In 1961 South Korea was mired in poverty By 1979 it had a powerful industrial economy and a vibrant civil society that led to democracy eight years later This volume examines the transformation as a study in the politics of modernization contextualizing many historical ambiguities in South Korea s trajectory toward sustainable economic growth

Fascism and Dictatorship Nicos Poulantzas, 2019-01-15 Poulantzas s book is the first major Marxist study of German and Italian fascism to appear since the Second World War It carefully distinguishes between fascism as a mass movement before the seizure of power and fascism as an entrenched machinery of dictatorship It compares the distinct class components of the counter revolutionary blocs mobilized by fascism in Germany and Italy analyses the changing relations between the petty bourgeoisie and big capital in the evolution of fascism discusses the structures of the fascist state itself as an emergency regime for the defense of capital and provides a sustained and documented criticism of official Comintern attitudes and policies towards fascism in the fateful years after the Versailles settlement Fascism and Dictatorship represents a challenging synthesis of factual evidence and conceptual analysis that has been rare in Marxist political theory to date

Beyond Urban Bias Ashutosh Varshney, 2014-02-04 First Published in 1993 This title sets out to spark debate and learn from the urban bias theory The author suggests that recent political economy research suggests that it is time to redefine the problem of urban bias Viewed as a collective engagement with the urban bias theory this volume presents the new research along with the responses of Bates and Lipton These studies do not add up to an alternative theory of why the state behaves the way it does towards the countryside They do however point to the factors that need careful attention in future research These papers can be seen as building blocks for the construction of an alternative theory of the state and agriculture
