Massachusetts Covered Bridges John S. Burk,2010-08-16 From hidden valleys in the Berkshire Hills to the North Shore 275 documented highway and railroad covered bridges have been constructed in Massachusetts from the early 19th century onward a figure that often comes as a surprise to those who traditionally associate these unique structures with northern New England All but a small handful of these are long gone lost to modern replacements fires wear and the regions notorious weather especially the devastating storms of the late 1930s The bridges came in all shapes and sizes from diminutive 50 foot spans to multitiered structures of nearly 900 feet that crossed the Merrimack and Connecticut Rivers and were stout enough to support railroads across their roofs

landscape is transformed and the challenge of preserving their historic character while making them safe for modern traffic. Conwill guides the reader across the diverse range of covered bridges to be found throughout the North America. **Early American Technology** Judith A. McGaw, 2014-01-01 This collection of original essays documents technology's centrality to the history of early America. Unlike much previous scholarship, this volume emphasizes the quotidian rather than the exceptional: the farm household seeking to preserve food or acquire tools; the surveyor balancing economic and technical considerations while laying out a turnpike; the woman of child-bearing age employing herbal contraceptives; and the neighbors of a polluted urban stream debating issues of property, odor, and health. These cases and others drawn from brewing, mining, farming, and woodworking enable the authors to address recent historiographic concerns, including the environmental aspects of technological change and the gendered nature of technical knowledge. Brooke Hindle's classic 1966 essay on early American technology is also reprinted, and his view of the field is reassessed. A bibliographical essay and summary of Hindle's bibliographic findings conclude the volume. The contributors are Judith A. McGaw, Robert C. Post, Susan E. Klepp, Michal McMahon, Patrick W. O'Bannon, Sarah F. McMahon, Donald C. Jackson, Robert B. Gordon, Carolyn C. Cooper, and Nina E. Lerman. **Bridges Over the Delaware River** Frank T. Dale, 2003 Dale brings us the stories behind each bridge, covering design, engineering, ownership, finances, and politics. He chronicles the life of each from the original construction through modifications and sometimes through the bridge's multiple destructions and reconstructions. Dozens of rare photos give readers a captivating window back into the past. **Covered Bridge Manual** Phillip C. Pierce, 2005
