**Elsewhere Elements** Elaine Grolla,2010-08-11 This book investigates the acquisition of pronominal elements by monolingual children acquiring English and Brazilian Portuguese as their native languages Previous studies have found non adult behavior in children s use and comprehension of pronouns in two syntactic contexts resumptive pronouns in relative clauses and anaphoric pronouns bound by argumental noun phrases Children perform similarly on both contexts incorrectly accepting these cases at chance level The age range when this chance performance is detected is the same in both cases around 4 and 5 years The present study offers a unifying account for such behavior assuming that bound pronouns are always last resort whose use requires trans derivational comparison Along the lines of previous work done by Grodzinsky and Reinhart 1993 it is claimed that such a comparison is too demanding for young children as their limited working memory cannot handle complex computations Two sets of experiments were carried out testing the same children on both contexts The results show that those behaving at chance in one context had the same behavior in the other They also showed that children had chance level performance not only with pronouns bound by referential antecedents but also with quantified ones These results are compatible with the view that children s problems with bound pronouns are related to processing difficulties rather than to the lack of some linguistic knowledge **Timed Math Problems Workbook**

Fairground Attractions Deborah Philips,2012-01-01 The study investigates the cultural production of the visual iconography of popular

pleasure grounds from the eighteenth century pleasure garden to the contemporary theme park Deborah Philips identifies the literary genres including fairy tale gothic horror Egyptiana and the Western which are common to carnival sites and traces their historical transition across a range of media to become familiar icons of popular culture Though the bricolage of narratives and imagery found in the contemporary leisure zone has been read by many as emblematic of postmodern culture the author argues that the clash of genres and stories is less a consequence of postmodern pastiche than it is the result of a history and popular tradition of conventionalized iconography
