Chapter 2: Psychological Research Methods and Statistics

Lesson 1: Approaches to Research

Guiding Question: Why is it important that samples be representative?

Pre-Research Decisions

Researchers must begin by asking specific questions about a limited topic or hypothesis. The next step is to look for evidence. The method a researcher uses to collect information partly depends on the research topic.

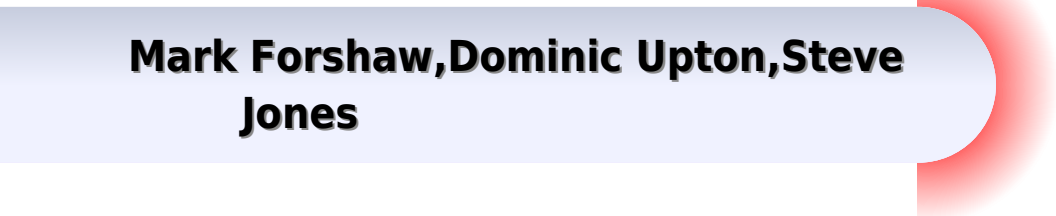

Sampling

Suppose a psychologist wanted to know how the desire to get into college affects the attitudes of high school students. It would be impossible to study **EVERY** high school student in the country. Instead, the psychologist would select a **SAMPLE**, or a relatively small group out of the total population.
