## **Course In Romance Linguistics Vol 1 A Synchronic View:**

**A Course in Romance Linguistics** Frederick Browning Agard, 1984 A comparative contrastive description of five modern Romance languages French Spanish Portuguese Italian Roumanian in terms of underlying grammar manifested in surface similarities and differences *Toward a Typology of European Languages* Johannes Bechert, Giuliano Bernini, Claude Buridant, 1990 The series is a platform for contributions of all kinds to this rapidly developing field General problems are studied from the perspective of individual languages language families language groups or language samples Conclusions are the result of a deepened study of empirical data Special emphasis is given to little known languages whose analysis may shed new light on long standing problems in general linguistics Sentential Negation in French Paul Rowlett Lecturer in French Language and Linguistics University of Salford, 1998-08-26 This is the first full length study of sentential negation phenomena in French Paul Rowlett assesses from a generative perspective the respective contribution made to the expression of clausal polarity by ne pas and elements such as jamais and personne His conclusions have far reaching implications leading to the controversial hypothesis that despite widespread belief French is not a negative concord language

*Spanish in the Americas* Eleanor Greet Cotton, John M. Sharp, 2001-11-14 This encyclopedic text focuses on the nature of Hispanic dialects the spread of Spanish and contemporary Spanish dialects in the Americas **Sentential Negation in French** Paul Rowlett, 1998-09-24 This is the first full length study of sentential negation phenomena in French Paul Rowlett assesses from a generative perspective the respective contribution made to the expression of clausal polarity by ne pas and elements such as jamais and personne His conclusions have far reaching implications leading to the controversial hypothesis that despite widespread belief French is not a negative concord language **American Spanish Pronunciation** Peter C. Bjarkman, Robert Matthew Hammond, 1989 The scholar editors and eight accomplished colleagues together offer views of phonological research on American Spanish **Bilingualism and Linguistic Conflict in Romance** Rebecca Posner, John N. Green, 1993 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by approaching language from an interdisciplinary perspective TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing **Linguistic Universals and Language Variation** Peter Siemund, 2011-06-30 The volume explores the relationship between linguistic universals and language variation Its

contributions identify the recurrent patterns and principles behind the complex spectrum of observable variation. The volume bridges the gap between cross linguistic variation, regional variation, diachronic variation, contact induced variation, as well as socially conditioned variation. Moreover, it addresses fundamental methodological and theoretical issues of variation research. The volume brings together internationally renowned specialists of their fields while at the same time offering a platform for gifted and highly talented young researchers. The authors come from different theoretical backgrounds and through their work illustrate a rich array of scientific methods. All authors share a strong belief in empirically founded theoretical work. The contributions span a high number of languages and dialects from many parts of the world. They are extremely broad in their empirical coverage, addressing an impressive selection of grammatical domains.

### **Synchronic Romance Linguistics**

Rebecca Posner, John N. Green, 2011-04-20. *TRENDS IN LINGUISTICS* is a series of books that open new perspectives in our understanding of language. The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. *TRENDS IN LINGUISTICS* considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations, including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. *TRENDS IN LINGUISTICS* publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

*C-ORAL-ROM* Emanuela Cresti, Massimo Moneglia, 2005. The *C-ORAL-ROM* book and DVD provide a unique set of comparable corpora of spontaneous speech for the main Romance languages: French, Italian, Portuguese, and Spanish. The corpora are accompanied by comparative linguistic studies, models, and standard linguistic measures of spoken language variability. Each corpus is built to the same design using identical sampling techniques, and each corpus is presented in multimedia format, allowing simultaneous access to aligned acoustic and textual information. Texts are headed with information about provenance, participants, etc., and the transcriptions show changes of speaker. Speech acts are tagged according to the evidence of prosodic criteria. Each corpus totals 300,000 words and presents formal and informal speech in a variety of contexts of use, dialogue structure, and text genres, semantic domains, and speech act typologies. The corpora have great statistical relevance for spoken language structures and can address key issues in human language technology, such as speech recognition in unrestricted discourse, the suitability of speech synthesis in natural prosody, and multilingual applications of the spoken language interface. The work provides new data and innovative theoretical perspectives that are relevant for corpus linguistics, Romance linguistics, syntactic theory, speech and prosody research, and second language acquisition.
