Bent,E.B. Bennion,G.S.T. Bamford,2013-03-09 The popularity of the 1973 fifth edition of *The Technology of Cake Making* has continued in many of the English speaking countries throughout the world This sixth edition has been comprehensively revised and brought up to date with new chapters on Cream butter and milkfat products Lactose Yeast aeration Emulsions and emulsifiers Water activity and Reduced sugar Eggs and egg products Baking fats and lower fat goods The chapters on Sugars Chemical aeration Nuts in confectionery Chocolate Pastries Nutritional value and Packaging have been completely rewritten The increased need for the continuous development of new products does not of necessity mean that new technology has to be constantly introduced Many of the good old favourites may continue to be produced for many years and they form suitable bench marks for new product development The sixth edition introduces the use of relative density to replace specific volume as a measure of the amount of aeration in a cake batter the use of relative density is in line with international agreement Specific volume is kept as a measurement of baked product volume since the industry is comfortable with the concept that subject to an upper limit an increase in specific volume coincides with improvement in cake quality **United States Code** United States,1976 **Soybeans and Peanuts** Bradley M. Crowder,1990 Peanut producers in the United States have elected mandatory marketing quotas with a two tiered price support program Peanuts sold within a

producer's quota qualify for a higher support price than peanuts sold outside the quota. A major issue for the peanut program in forthcoming legislation is whether to continue the current program or to include peanuts in a general agricultural program with other commodities. **Agricultural Economics Bibliography** United States.
