Steel,2014-11-28 125 000 men volunteer 75 000 become casualties 55 000 are killed During World War II the most dangerous place to be as a member of the British and Commonwealth forces was in an aircraft of RAF Bomber Command Before war broke out in 1939 those who fought were ordinary husbands sons fathers and brothers Unbeknown to them they would soon become extraordinary men Describing what life was like for thousands of brave airmen Bombing Hitler tells the true story of one such unsung hero from the outbreak of war following each stage of his training to his 33 operational missions over enemy territory each of which is recreated in detail Detailing the life of Bernard Steel and his comrades this story reflects on all aspects of Bomber Command life from the dangers of training to being an instructor as well as the effects six years of war had on his family and ultimately himself Providing a full and detailed story of World War II from one man s perspective Bombing Hitler is inspired by the work of authors such as Patrick Bishop Kevin Wilson and John Sweetman and will appeal to those who enjoy reading about the military in particular World War II **The Leadership, Direction and Legitimacy of the RAF Bomber Offensive from Inception to 1945** Peter Gray,2012-05-31 An examination of the strategic leadership and legitimacy of the RAF bombing offensive against Germany in the Second World War **Torpedo Bombers, 1900-1950** Jean-Denis Lepage,2020-01-27 The torpedo bomber was a very short lived weapon system operational for scarcely half a century from just prior WWI to the 1960s Yet during its brief existence it transformed naval warfare extending the ship killing range of ships and coastal defences to hundreds of miles The Royal Navy and Fleet Air Arm led the way recording the first sinking of a ship by aerial torpedo in August 1915 but all major navies eagerly developed their own torpedo bomber forces The torpedo bomber reached its zenith in WWII particularly from 1940 42 with notable successes at the Battle of Taranto the sinking of the Bismarck and Pearl Harbor It was the weapon of choice for both the US and Japanese in the big Pacific battles such as Midway In the latter stages of the war increasingly effective anti aircraft fire and interceptor aircraft started to render it obsolete a process completed post war by long range anti ship missiles Jean Denis Lepage traces the development of torpedo bombers worldwide describing their tactics operational history and the aircraft themselves

including such well loved types as the Swordfish Beaufighter and Avenger Over 300 aircraft are beautifully illustrated

**Review of Current Military Literature** ,1953-04      **The Bomber Boys** Mona D. Sizer,2013-01-03 At the beginning of World War I the English were more fascinated than frightened by the gigantic silently floating Zeppelins Using their flashlights they sought them through the fog unthinking that they were guiding them to drop bombs over London At Pearl Harbor the Japanese samurai damaged or destroyed all the ships on Battleship Row almost destroying the harbor s usefulness for the duration of the war Over Ploesti Rumania the American Fifteenth Air Force never did succeed in destroying Hitler s primary source of oil for his tanks Colonel Paul Tibbets pulled the Enola Gay back on her tail and aimed her skyward to take off from the carrier Hornet to bomb Tokyo THE BOMBER BOYS is the story of all those raids and more Author Mona Sizer is noted for her exciting scenes and careful research      Effectiveness of Efforts to Address Deficiencies in the B-1B Bomber Program United States. Congress. House. Committee on Government Operations. Legislation and National Security Subcommittee,1994      **Professional Journal of the United States Army** ,1953      *Bombers* Francis Crosby,2004      **The Aircraft Flash** ,1953      **Military Review** ,1940      Physiological Problems Of Bomber Crews In The Eighth Air Force During WWII Major James J. Carroll,2014-08-15 Aviation physiology is a highly relevant field to flyers of unpressurized aircraft that flew at altitudes in excess of 25 000 feet Crew members had to contend with severe environmental factors while flying long bombing missions during WWII The limits of human physiology must be the main concern of any battle plan involving flyers and fatality mortality rates should be the primary focus in evaluating the success or failure of such a plan The purpose of this research project is to determine if human factors were overlooked intentionally or by accident If they were overlooked unintentionally then what was done to resolve the physiological problems of the aircrews The project will also underscore the continued need to address the human machine during any plan in today s demanding aviation environment Chapter one explores whether or not the limits of the human being was taken into account when the WWII bombing planners developed AWPD 1 It provides an insight into why AWPD 1 was created without regard to the aircrew members and how this neglect could have possibly been remedied Chapter two examines the machines of the day in particular the B 17 to see if it was ready to carry out the assigned missions envisioned by the war planners The early wartime experience of the B 17 by the Royal Air Force was disappointing but nevertheless it was looked upon by the U S Army Air Force USAAF as the ultimate bomber that could complete any assignment This chapter also provides some insight into a typical mission the B 17 aircrew had to endure and the aircraft s ability to carry out the assigned bombing missions Chapter three deals with the physiological problems experienced by the aircrews and what was done to alleviate them Chapter four focuses on the non combat accident rates of the Eighth Air Force what they meant and how the leadership reacted to them      **Simulation of Suicide Bombing** Zeeshan-Ul-Hassan Usmani,Daniel Kirk,2011 This book introduces BlastSim a physics based simulation platform to model and simulate suicide bombing events The BlastSim software is

designed to test analyze and validate the results of different explosive and injury model combinations under various conditions with different sets of parameters such as explosive and crowd formation characteristics blockage and human shielding effects fragmentation and shrapnel and the bomber s position in 2 and 3 dimensional environments The suicide bombing event can also be re created for forensic analysis The number of fatalities and injured after a suicide bombing event can be predicted using this software with 91% accuracy The assessment of an explosion s effect on a crowd can lead to better management of disasters triage of patients locating blast victims under the debris development of protective gear and safe distance recommendations to reduce casualties
