Karell, 2002-01-01 In this study of collaborative writing in western American literature Linda K Karell asks broad and fruitful questions about how writing in general is produced By examining collaboration both as a process and as a product she challenges the definition of an author as an individual genius who creates original works of art in isolation From a collaborative view what was a fairly direct cause and effect scenario individual author inspiration original literary masterpiece becomes something much less clear An individual is always located within a shifting context of texts from which he or she draws to produce often with substantial and varied support from other writers editors spouses or partners and institutions a work that will be termed original Collaboration insists on recognizing this oft hidden contribution of others as an important component of meaning something our traditional understanding of the author persists in ignoring or displacing Karell provides a close analysis of the various means by which writers work with others to produce their final literary products Methods include traditional joint writing practices such as ghostwriting or edited texts as in the case of Mourning Dove and ethnographer Lucullus McWhorter the incorporation of existing diaries or letters from other writers for example Wallace Stegner's *Angle of Repose* with Mary Hallock Foote and dual authored texts such as those produced by Louise Erdrich and Michael Dorris By challenging the seductive myth of the solitary writer within the context of the myth of the independent westerner Karell makes the compelling argument that collaboration is an inescapable part of writing **A Companion to the American West** William Devereaux, 2008-04-15 *A Companion to the American West* is a rigorous illuminating introduction to the history of the American West Twenty five essays by expert scholars synthesize the best and most provocative work in the field and provide a comprehensive overview of themes and historiography Covers the culture politics and environment of the American West through periods of migration settlement and modernization Discusses Native Americans and their conflicts and integration with American settlers **Fifty Years After The Big Sky** William E.
