Spector,T.M. Anderson,2005-12-17 One outcome of recent progress in educational technology is strong interest in providing effective support for learning in complex and ill structured domains We know how to use technology to promote understanding in simpler domains e g orientation information procedures with minimal branching etc but we are less sure how to use technology to support understanding in more complex domains e g managing limited resources understanding environmental impacts etc Such domains are increasingly significant for society Technology e g collaborative tele learning digital repositories interactive simulations etc can provide conceptually and functionally rich domains for learning However this introduces the problem of determining what works in which circumstances and why Research and development on these matters is reflected in this collection of papers This research suggests a need to rethink foundational issues in educational philosophy and learning technology One major theme connecting these papers is the need to address learning in the large from a more holistic perspective A second theme concerns the need to take learners where and as they are integrating technology into effective learning places Significant and systematic progress in learning support for complex domains demands further attention to these important issues   *Discussion-Based Online Teaching To Enhance Student Learning* Tisha Bender,2023-07-03 The new edition of what is

now considered a classic on online learning has been expanded by about a third to reflect new opportunities offered by social media new insights and ideas derived from the author s teaching in the eight years since she wrote the first edition as well as from extensive research in the latest literature In particular Tisha Bender investigates whether the existing paradigm of teaching and learning has been changed not so much because of the advent of the Internet but because of the potential divide between the expectations and practices of students who are digital natives of the digital revolution and those of their teachers who are mostly digital immigrants She addresses the question do we need to change the way we teach in order to reach and engage digital natives fruitfully and enjoyably in their education This accessible and comprehensive book offers an engaging and practical approach to online teaching that is rooted in the author s experience and enthusiasm for creating a virtual environment that engages students and fosters their deep learning This is a book for all educators and administrators in higher education in any discipline engaged in or contemplating offering online classes that involve discussion or collaborative learning It is relevant both to faculty teaching a hybrid and face to face classes and courses conducted entirely online **Developing an Online Course** Carol A. O'Neil,Cheryl A. Fisher,Susan K.
