Come Home, America William

Greider,2009-03-17 Asserts that America is straying from its democratic ideals and faltering in a rapidly globalized world community and challenges policies that are based on a priority of making America number one in the world while examining the economic and political forces that have brought about contemporary problems **Rebuilding War-Torn States**

Graciana del Castillo,2008-09-25 Post conflict economic reconstruction is a critical part of the political economy of peacetime and one of the most important challenges in any peace building or state building strategy After wars end countries must negotiate a multi pronged transition to peace Violence must give way to public security lawlessness political exclusion and violation of human rights must give way to the rule of law and participatory government ethnic religious ideological or class caste confrontation must give way to national reconciliation and ravaged and mismanaged war economies must be reconstructed and transformed into functioning market economies that enable people to earn a decent living Yet how can these vitally important tasks each be successfully managed How should we go about rehabilitating basic services and physical and human infrastructure Which policies and institutions are necessary to reactivate the economy in the short run and ensure sustainable development in the long run What steps should countries take to bring about national reconciliation and the consolidation of peace In all of these cases unless the political objectives of peacetime prevail at all times peace will be ephemeral while policies that pursue purely economic objectives can have tragic consequences This book argues that any strategy for post conflict economic reconstruction must be based on five premises and examines specific post conflict reconstruction experiences to identify not only where these premises have been disregarded but also where policies have worked and the specific conditions that have influenced their success and failure **Southeast Asia in the Global Economy**

Helen E S Nesadurai,J Soedradjad Djiwandono,2009 While economic globalization benefited Southeast Asia especially during the 1990s boom the region now seems to be caught between two emerging economic giants China and India What challenges and opportunities does the rise of China and India pose for Southeast Asia and how should policy makers respond Are bilateral free trade arrangements and bilateral economic partnerships a boon or bane for competitiveness In identifying approaches and strategies to coping with these challenges and leveraging on the opportunities available this book also links the quest for competitiveness with the necessity of social protection The link comes in the form of the people who work for firms as human resources and as users and innovators of technology The book acknowledges and discusses the problems of inadequate technological and innovative capacity and the problems of managing labour productivity in Southeast Asia However the book also cautions against focusing on people solely as productive labour whether in production or the knowledge sector By highlighting the adverse social economic and political consequences of ignoring social protection issues and challenging the myth that addressing social protection undermines competitiveness the book emphasizes the social responsibilities incumbent on governments and firms in this age of growing economic insecurities

New Critical Writings in Political Sociology Alan Scott,2024-11-01 The articles collected together in this volume are

concerned with why and how people get involved in politics whether through formal mechanisms such as voting through some of the more informal means and settings of social movement networks and political protest or through engagement in public debate But just as important is the question of why people do not get involved in politics What social conditions ideas and values facilitate or discourage political activity How is it that some people are systematically disempowered in democratic societies in comparison with others What social forms offer the most promise for extending and deepening democracy This volume brings together the most seminal papers which together form a record of how political sociologists since the 1970s have framed questions about the range and limits of democratic political engagement and developed concepts and methodologies in order to research the answers to those questions
