Cattle Country Kathryn Cornell Dolan, 2021-06 As beef and cattle production progressed in nineteenth century America the cow emerged as the nation's representative food animal and earned a culturally prominent role in the literature of the day In *Cattle Country* Kathryn Cornell Dolan examines the role cattle played in narratives throughout the century to show how the struggles within U.S. food culture mapped onto society's broader struggles with colonization environmentalism U.S. identity ethnicity and industrialization Dolan examines diverse texts from Native American African American Mexican American and white authors that showcase the zeitgeist of anxiety surrounding U.S. identity as cattle gradually became an industrialized food source altering the country's culture while exacting a high cost to humans animals and the land From Henry David Thoreau's descriptions of indigenous cuisines as a challenge to the rising monoculture to Washington Irving's travel narratives that foreshadow cattle replacing American bison in the West to Mar a Amparo Ruiz de Burton's use of cattle to connect race and imperialism in her work authors' preoccupations with cattle underscored their concern for resource depletion habitat destruction and the wasteful overproduction of a single breed of livestock *Cattle Country* offers a window into the ways authors worked to negotiate the consequences of the development of this food culture and by excavating the history of U.S. settler colonialism through the figure of cattle sheds new ecocritical light on nineteenth century literature

Hufsmith,1993 The Lynching of Cattle Kate Ellen Watson and Jim Averell by six prominent cattlemen filled the pages of Wyoming newspapers in 1889 The popular myth of the West was that Watson was a prostitute who galloped across the prairies and bartered sex for calves For years residents of the Sweetwater Valley knew that these stories were not true They knew that Ellen Watson s biggest crime was legally claiming a homestead on a piece of ground being used as a hay meadow by cattleman Albert Bothwell Now for the first time an author has searched through the layers of fabrication and uncovered the true story

Matej's Legacy DONALD F. CHMELKA,2003-12-02 Matej s Legacy is a nonfiction chronicle following the author s Czech family through 20th century history It is a sequel to Matej s Journey to America that creatively traced the Chmelkas to biblical times and then journeyed with them through six millennia from present day Iraq to the Czech Republic and finally to America The author s great great grandfather was born as the Rocky Mountain fur trade boomed in 1825 and grew up on a 13 acre farm in Moravia where the Chmelkas had been serfs since Charlemagne was crowned the first Holy Roman Emperor Gold homesteads and Texas longhorns lured thousands of oppressed Europeans to America in the mid 1800s riding on steamships and railroads that now made long distance travel feasible Prussia established its European dominance in 1871 when railroads closed by war reopened to civilians allowing Matej to flee his beloved motherland for a free homestead in Nebraska He found a difficult life on the prairie with grasshoppers drought hail and fires destroying crops spurring his 14 year old son to join a Texas cattle drive and then to dodge Indians and gunfighters throughout the romantic era of the Wild West Matej died in 1902 leaving his family little wealth but a legacy the first 100 years of which is covered in this book Henry Ford the Wright brothers Thomas Edison and other inventors were creating a New World and the Czechs finally found independence thanks to World War I which put an end to feudalism but gave birth to Communism Technology in transportation agriculture and communications continued to expand during the Roaring Twenties and a Democratic America became the hope to millions still victimized by brutal dictators Good times gave way to the Great Depression and the author was born on a primitive Nebraska farm as a new war spread around the globe Germany and Japan were brought to their knees but the world was introduced to nuclear horror and was soon threatened by Russian Chinese Korean and Vietnamese

Communists ungrateful allies vowing to bury American Capitalism The Middle East and Africa were now freed from European colonialism but instead of developing natural resources for the benefit of their citizens rival leaders wallowed in tribal warfare Israel became the incendiary target for Muslims who controlled much of the world's oil now in great demand as the automobile and airplane gave new mobility to man As the world's leader America became its policeman taking on one evil empire after another Korea and Vietnam were not proud moments yet Communism fell to economic demands that only Democratic Capitalism could meet The Czech Republic and the entire Russian Bloc were suddenly free but as the world relaxed a war of terror began financed by Arab oil and executed by Muslim extremists Outmatched in technology failing regimes retreated to guerilla warfare determined to outlast a culture softened by instant gratification Lebanon Palestine Yugoslavia Afghanistan and Iraq became major hotspots while Africa simmered under tribal warfare with millions dying from AIDS and starvation Matej's Legacy integrates the world events of the past 100 years with the Chmelka family story including the author's journey from farm boy to engineer and executive in the automotive and aerospace industries He retired in 1997 and began writing a two volume epic concluding in 2003 when the United States remained the world's primary protector but sadly often criticized and hated by cynics and political opportunists American immigrants are generally grateful for the opportunities and freedom our great country offers and many of the world's downtrodden continue their desperate journeys to our shores Others jealously preach hatred and death to America but as descendants of those who sacrificed much to be here let us never forget our legacy

A Legacy of Change Conrad J. Bahre, 1991-01-01 The arrival of Anglo settlers in the 1870s marked the beginning of major vegetation changes in southeastern Arizona including an increase in woody plants in rangelands the degradation of riparian wetlands and the spread of non native plants While many of these changes have already been linked to human land use through comparative photographs and historic descriptions it has long been presumed that changes in the region s climate have also contributed to vegetation change Geographer Conrad Bahre now challenges the view that these vegetation changes are due to climatic change Correlating his own field research with archival records and photographs Bahre demonstrates that most of the changes follow some type of human disturbance such as cattle grazing fuelwood cutting wildfire suppression agriculture and road construction Indeed all available evidence suggests that Anglo settlement brought unprecedented changes to the land Vegetation change in the American West has long been an issue of concern This careful scrutiny of one corner of that region one of the most ecologically diverse areas of the United States shows how poorly understood is the

relationship between human activities and vegetation More important it introduces new techniques for differentiating between natural and anthropogenic factors effecting vegetation change that can be used to help ecologists understand vegetation dynamics worldwide
