Crab And Frog Motion Paradigm Shift:

The Crab and Frog Motion Paradigm Shift Peter Kien-hong Yu, 2002-01-09 In Crab and Frog Motion Paradigm Shift Peter Kien hong Yu presents a dialectical approach to the study of Chinese Communist politics Yu demonstrates that the application of non dialectical approaches to the study of Chinese politics over the last eighty years is misguided due to ample evidence showing that Chinese political figures made use of a particular version of dialectics in their thought and actions Through case studies Yu demonstrates that the perception of reality in terms of dialectics and non dialectics makes a striking difference to political analysis and shows that this framework of thought and action can be applied to any case word number letter or symbol This book was awarded a grant by the East Asian Research Institute U S October 2001 **One-dot Theory Described, Explained, Inferred, Justified, and Applied** Peter Kien-hong Yu, 2011-12-23 The ancient Chinese scholars are fond of applying the Yin and Yang diagram to correlate almost everything This book continues that tradition and uses the model to study other non dialectical theories and models The major finding qua contribution in this publication is to point out that the four diagrams are equivalent to the BaGua or BaGuaTu BG a set of eight ancient China symbolic notations gossip Another finding is that dialectical crab and frog motion remark is just the opposite of a non dialectical crab and frog motion usually deductive linear or cause and effect remark or at best they must meet half way The two major tasks of this book are to first apply the author s one dot theory which is shored up by the crab and frog motion model to convert other theories and models as well as studies and second apply his theory and model to reinvent some well known western derived theories and models and studies such as game theory The attempt is to narrow down the gap between the East and the West scholarship XueShu broadly defined making the book of interest to Eastern and Western philosophers and scholars alike **Ocean Governance, Regimes, and the South China Sea Issues** Peter Kien-hong YU, 2015-05-05 This book uses Chinese version of dialectics to present interpretations of ocean governance international regimes issues in the South China Sea in general and the Chinese U shaped line in particular through the one dot theory It especially serves as a tool for non Chinese researchers and experts interested in analyzing international relations issues from a Chinese perspective The dialectical one dot theory which is a superior model to the dialectical Yin and Yang or the dialectical crab and frog motion model provides research and findings that more closely mirror reality than do other non dialectical approaches and research methods Further it can be applied to both the natural and social sciences The book is divided into three parts Methodology Case Studies Related to International Regimes and Non International Regimes and Issues Related to the U shaped Line in the South China Sea with each chapter structured in terms of the one dot theory In addition to researchers and experts involved in marine and maritime affairs this book will also appeal to all readers interested in Chinese Philosophy International Relations and Strategic Culture *Reinventing the Methodology of Studying Contemporary China* Peter Kien-hong YU, 2017-07-03 This book illustrates how the one dot theory which is a dialectical study is well suited to describing explaining

and inferring contemporary China's past, present and future. It argues that since October 1949 the field of contemporary China studies has been dominated by modified and abandoned non dialectical theories and models. It also challenges selected non dialectical theories and models which were first generated in the West such as the game theory and rational choice theory. With its emphasis on methodology the book offers a valuable resource for academics, researchers and practitioners alike with an interest in logically, systematically and coherently unraveling Taiwan's and mainland China's contemporary politics and international relations.

God Is, by Inference, One Dot Peter Kien-Hong Yu, 2010. In September 2008 the European Organization for Nuclear Research (CERN) scientists successfully switched on the historic biggest physics device the Large Hadron Collider (LHC) to search for the Higgs boson or the God particle which is but a dot. The ultimate question in the context of Panentheism and or Pantheism is: Surrounded by an infinite number of dots, good or bad, is God also a partial dot? This author calls for a paradigm shift in our mind by inferring that God is the superior original dot of all dots.

International Governance, Regimes, and Globalization Peter Kien-hong Yu, Emily W. Chow, Shawn S.F. Kao, 2010-04-27. In this collection International Governance Regimes and Globalization the writers explore international relations and globalization by using specific examples from Beijing and Taipei. In December 1949 when China was politically divided the People's Republic of China (PRC) central government was in control of most resources, tangible and intangible. For that reason our unit of analysis has to be the state, meaning a government or a politically organized body. With the rise of civil society at both national and international levels, applying the international global governance theory should be closer to reality because we have to look at both the state and non state sponsored dimensions which are more complex and complicated. Indeed international global governance could become a new school of thought and will continue to expand as academics explore. For example, neo liberalism primarily focuses on market and contract. When people buy and sell something they are in a market. In other words, politics is the superstructure of economics or as Karl Marx said, what prevails in economy will ultimately prevail in politics. In a sense, subscribers to this school of thought are Marxian. However, the study of international global governance embraces the non state sponsored dimension. Hence it is broader than that of the neo liberalism school of thought.

Chinese Dialectics Chenshan Tian, 2005-01-01. The history of Chinese Marxist thought is intimately intertwined with ancient autochthonous philosophical texts. In Chinese Dialectics the complete intellectual history of Chinese Marxism is laid bare.

China Factors Gordon Cheung, 2017-07-28. China Factors offers a first hand perspective on political and socio economic changes in Hong Kong after the official handover to control by China. It reflects the author's observations, personal encounters, interviews and experiences especially after 1997 when the handover occurred and also when the Asian financial crisis emerged. The focus here is on the political economy of Greater China, China, Taiwan and Hong Kong. The author witnessed the subtle political and economic changes in Hong Kong during the period and the clear and present influence of China on Hong Kong as well as Taiwan. China Factors illustrates the full import of the rise of China and

the impact of political social and economic relations around Greater China Gordon Cheung shows the key factors for the region are integration interdependence identity and independence otherwise known as the four i s Individually each factor spurs new directions in the ever changing political economy of that region Other factors such as cross strait relations and Hong Kong and Macau s reversion to China are also creating new interactions within the region Politically these China factors challenge traditional bilateral and multilateral relations Conceptually they require further investigation as possible new Chinese interactions with other states may influence regional affairs Cheung believes the examination of the China factors he identifies here will help to shed light on evolving East Asian relations as well as to spur reexamination of governance of this important region The book will be of keen interest to specialists in Asian studies and China in particular as well as those interested in international affairs and U S foreign policy

International Governance and Regimes Peter Kien Hong Yu, 2012-08-21 This book examines China s involvement in international governance international regimes and globalization Peter Kien hong Yu offers a new framework with which to understand international regimes and applies it to important Chinese case studies such as arms control disarmament and non proliferation the counter piracy regime and the environmental issue Whilst internationally important matters related to such systems are identified Yu s discussions attempt to find out whether any particular system works better in relation to China and asks if not why not After examining eight different cases the author concludes that these regimes are working but there is ample room for improvement and that the Chinese Communists for one have to enhance their understanding of international governance and try to export their experience to other parts of the world International Governance and Regimes will be appeal to anyone interested in International Politics Chinese Studies Political theory and International Relations

The Second Long March Peter Kien-Hong YU, 2011-11-03 This work written by an expert in the politics of Mainland China and Taiwan looks at the role the Constitution of the Republic of China has played in the development of Taiwan since 1949 and its potential influence on the People s Republic of China The Chinese Communists conducted the first long march for the sake of

the majority of Chinese people with the victory of MAO Zedong In the second long march CHIANG Kai shek and his successors tried to convert the Chinese mainland from a Communist totalitarian system into a democratic prosperous one by relying on the spirit of the Republic of China ROC constitution and by setting itself as a good example in gradually guaranteeing freedom and democracy Needless to say this march is long and difficult The Second Long March challenges other models and theories on the study of the relationship between the ROC Taiwan area and mainland China or the People s Republic of China PRC since China became politically as opposed to legally divided in December 1949 Arguably it is the ROC Constitution that has helped ROC citizens to live in a non Communist or anti Communist political system Actively promoting democracy and freedom on the Chinese mainland neidi can further guarantee the Taiwan area s survival The book will provide valuable scholarship of interest to anyone researching the political history of China and its prospects for democratization

Hu Jintao and the Ascendancy of China Peter Kien-hong Yu,2005 A Dutch sinologist Hans Kuijper once wrote that if you do not apply a model or theory in your study of Chinese Communist affairs you are a pseudo scientist The paper was published in the July September 2000 issue of China Report According to the latest findings the dialectical and non dialectical China can be said to have a recorded history of 10 000 years Noted historian Professor Wang Gungwu had said that there were many problems with Western books on Zhongguo and the dialectical China Yu Ying shih another noted historian had stated that it was not proper to apply theories in the West to study Zhongguo Professor Tu Wei ming wrote any approach we choose to study China is inevitably theory laden and value laden it is naive to believe that we can ever arrive at a totally objective analysis or strictly factual explanation of China and that our interpretation is value free The author also refers to Shi
