Subcommittee on Crime, Terrorism, and Homeland Security,2008 **Cuts and Criminality** Theodore Bennett,2016-03-09 This book investigates how and why the criminal law differentiates between different types of body alterations with particular reference to how they are conceptualised within legal discourse By drawing connections between types of body alteration that have traditionally been considered separately and discretely the book allows analytical conclusions to be made about the law s treatment of the general category of body alteration rather than merely about specific types of body alteration Taking legal discourse as its analytical focus the author critically examines a number of case studies to determine the techniques and processes by which some body alterations are discursively constructed as legitimate and legally approved and by which other body alterations are discursively constructed as illegitimate and legally sanctioned Specifically the body alterations that are addressed include sadomasochistic injuries female genital modification and male circumcision cosmetic surgery body modification and healthy limb amputation and sex reassignment surgery and genital normalisation surgery International in scope the discursive analysis in the book will be of interest to academics and researchers working in the areas of socio legal and cultural studies

**Law and Ethnic Plurality** Prakash Shah, 2007-10-30 The large scale establishment of ethnic minorities and diasporic communities in Europe has gained the attention of social science scholars for a number of decades now However legal interest in this field has remained relatively underdeveloped and few scholars have addressed emerging legal issues to any significant degree This collection of contributions by leading writers in the field of ethnic migration and diaspora studies therefore provides some important interdisciplinary perspectives of how ethnic diasporic minorities in British and European contexts interact with the official legal system This volume makes a significant contribution in assessing the role of law in current debates on the integration of ethnic and religious minorities of migrant origin in the EU The chapters derive from papers first delivered at a lecture series on Cultural Diversity and Law at the Institute of Advanced Legal Studies The contributors disciplinary interests range across law anthropology sociology geography and political theory and each one addresses the issues within

his or her field of study by adopting approaches that place law within its wider social and political context. The topics covered range from a number of public and private law issues as well as the more conceptual realms of jurisprudence. They include marriage laws, approaches to dispute resolution, the role of courts and juries in the criminal justice system, drugs policies and the criminalisation of minorities, free speech and blasphemy, planning laws and the construction of religious buildings, composition of the judiciary, the normative foundations of cultural diversity in law and integration and law. The compilation should therefore attract an interest beyond its core readership in law, making legal issues accessible to a whole range of students and policy makers within the social sciences.

**Crack Cocaine Users** Daniel Briggs, 2013-03-01 Crack cocaine users have significant health problems and place a significant burden on social services, the criminal justice system and drug treatment agencies. Among policymakers, professionals and the wider section of society, they are the most poorly understood drug using group and have the worst retention rate in prison drug programmes and community drug agencies. This book is about their addictions and the realities of their lives. Based on ethnographic research, observation and interviewing conducted in south London, it aims to highlight their day to day struggles as they attempt to survive in a violent and intimidating street drug scene while trying to make changes to their lives. The book unpacks the myths and stigma of their drug use, highlighting their fragile position in society in an effort to better understand them. With the help of several key characters, the book uses their words and experiences to take the reader on a journey through their crack addiction from a life in and out of crack houses, their experiences with law enforcement and welfare agencies to their life aspirations. The findings have important policy implications and are relevant and accessible to academics and students in the field of criminology, sociology, psychology and research methods. The research is equally relevant for central and local government policymakers and frontline healthcare and drug agency staff.

This new edition of Visiting College Campuses is the one stop source for plotting a college journey, whether it's by plane, train or automobile. The Princeton Review's profiles of the 249 most toured campuses include Maps and precise directions to get there by any mode of transportation. Nearby hotels, motels, B&Bs and resorts for every budget. The best and worst times to visit each campus. Dates and times when campus tours are available. How to arrange an overnight stay in a dormitory. Information on meeting professors, admissions officers and coaches. Visiting College Campuses also gives readers mileage charts by state and region so they'll know exactly how far those targeted schools are from one another and how many campuses can be covered each day of the trip. Month by month academic calendars let readers know when school is in session so they won't show up to find an empty campus. Customized trips help to avoid hassles and disappointments and
