exercise on cancer may be partially mediated through obesity control it is clear that considerable research is required and is ongoing at both the molecular and clinical levels to better understand the associated mechanisms and to develop optimal exercise strategies This volume will contain chapters on the effect of exercise on biological pathways in tumor growth state art exercise strategies and cutting edge research focused on different cancers and patient groups It will provide an important volume in this series on energy balance and cancer and a basis for ongoing research experimental approaches and application of evidence based practices to clinical care for patients with cancer Marketing Research Report ,1980
