Alternatives In Cancer Treatment The World And Wars Of Cancer Treatment:

Alternatives in Cancer Therapy Ross Pelton, 2009-09-29 Alternatives in Cancer Therapy offers help for all patients coping with cancer The therapies discussed in this book are primarily non toxic have few if any side effects and tend to strengthen the immune system They can be used as supplemental regimens that help maximize the effectiveness of traditional therapies such as surgery radiation and chemotherapy Patients have a right to know all of their treatment options and Dr Ross Pelton presents dozens of choices including Shark Cartilage Gerson Therapy Mistletoe Isoprinosine Laetrile Selenium Beta Carotene Hydrogen Peroxide Vitamins C and E The Hoxsey Treatment Non traditional therapies can enhance the quality of life and improve overall health while treating the disease Alternatives in Cancer Therapy provides information on the research efficacy potential side effects and availability of each treatment *We Lost the War on Cancer - Review of Alternative Cancer Therapies* John P. Thomas, 2014-08-25 We have lost the war on cancer At the beginning of the last century one person in twenty would get cancer In the 1940s it was one out of every sixteen people In the 1970s it was one person out of ten Today one person out of three gets cancer in the course of their life The cancer industry is probably the most prosperous business in the United States In 2014 there will be an estimated 1 665 540 new cancer cases diagnosed and 585 720 cancer deaths in the US 6 billion of tax payer funds are cycled through various federal agencies for cancer research such as the National Cancer Institute NCI The NCI states that the medical costs of cancer care are 125 billion with a projected 39 percent increase to 173 billion by 2020 The simple fact is that the cancer industry employs too many people and produces too much income to allow a cure to be found All of the current research on cancer drugs is based on the premise that the cancer market will grow not shrink John Thomas explains to us why the current cancer industry prospers while treating cancer but cannot afford to cure it in Part I In Part II he surveys the various alternative cancer therapies that have been proven effective but that are not approved by the FDA Alternative Medicine United States. Congress. Senate. Committee on Appropriations. Subcommittee on Departments of Labor, Health and Human Services, Education, and Related Agencies, 1993 *The Politics of Healing* Robert D. Travis A. Weisse,2024-09-03 Travis A Weisse tells a new history of modern diets in America that goes beyond the familiar narrative of the nation s collective failure to lose weight By exploring how the popularity of diets grew alongside patients frustrations with the limitations and failures of the American healthcare system in the face of chronic disease Weisse argues that millions of Americans sought fad diets such as the notorious Atkins program which ushered in the low carbohydrate craze to wrest control of their health from pessimistic doctors and lifelong pharmaceutical regimens Drawing on novel archival sources and a wide variety of popular media Weisse shows the lengths to which twentieth century American dieters went to heal themselves outside the borders of orthodox medicine and the subsequent political and scientific backlash they received Through colorful profiles of the leaders of four major diet movements Health Freaks demonstrates that these diet gurus weren t shady snake oil salesmen preying on the vulnerable rather they were vocal champions for millions of frustrated Americans seeking longer healthier lives Treating Cancer with Herbs Michael Tierra,2003

Cancer is the scourge of our age More than any other disease cancer has captured our fears and projected despair throughout society Our bodies have become the experimental real life testing grounds for countless chemical toxins pollutants refined foods and stresses These toxins are clearly exerting their effect in the rise of numerous forms of cancer striking every part of our bodies The medical profession is attempting to attack these cancers with every available form of chemical radiation and invasive surgery While modern medicine has long recognized the healing potential of herbs some of the most commonly used cancer medicines were originally developed from herbs we have been indoctrinated to believe that surgery radiation and chemical therapies are the only successful procedures even though they tend to fail much of the time and may actually destroy the quality of life to such a degree that many believe the cure is worse than the disease There is another approach to the treatment of cancer Finding cancer s root causes and applying a holistic understanding of lifestyle diet stress reduction and appropriate nutritional and herbal support can strengthen the body and its immune system restore the spirit and balance the psyche of the cancer patient With this integrative approach a healthy mental and emotional balance joins a healthy approach to life to truly treat cancer Not every cancer patient is cured but every patient is brought to a state of understanding which in many cases leads to what appear to be miraculous remissions In other cases it allows the individual to experience a quality of life and passing uncommon in our society the ability to face life and death with dignity and a sense of completion Book jacket

Oncofertility Teresa K. Woodruff,Laurie Zoloth,Lisa Campo-Engelstein,Sarah Rodriguez,2010-09-02 Oncofertility has emerged as a way to address potential lost or impaired fertility in cancer patients and survivors with active biomedical

research that is developing new ways to help these individuals preserve their ability to have biological children In order to move beyond oncofertility as a science and medical technology and begin to address the ethical legal and social ramifications of this emerging field we must give voice to scholars from the humanities and social sciences to engage in a multidisciplinary discussion This book brings together a pool of experts from a variety of fields including communication economics ethics history law religion and sociology to examine the complex issues raised by recent developments in oncofertility and to offer advice from national and international perspectives as we create new technology Given the inherent interdisciplinary nature of oncofertility this book is not only valuable but also necessary to cultivate a deep understanding of new issues with the eventual aim of offering proposals for addressing them Indeed this book will be useful for people not only within the humanities and social sciences disciplines but also for those who are confronted with cancer and the possibility of impaired fertility and the medical practitioners within oncology and reproductive medicine who are at the front lines of this emerging field
