Alternatives For Environmental Evaluation:

Alternatives for Environmental Valuation Michael Getzner, Clive Spash, Sigrid Stagl, 2004-10-21 Methods for raising awareness of how humans value the environment range from monetary valuation through to greater public participation in decisions. In this book a group of international experts explore innovative alternatives which are critically evaluated and compared. Lessons are drawn from both the successes and failures of different approaches. Case studies address a wide variety of cutting edge environmental problems from agro forestry and wetlands to climate change biodiversity and genetically modified organisms.

So far both transitions have been spectacularly successful. China is the fastest growing economy in the world with per capita incomes more than quadrupling since 1978.
