REIS - Enero/Marzo 1981, *Semantic Primes and Universal Grammar* Bert Peeters, 2006-01-01 This volume is part of a research program which started with the publication in 1972 of Anna Wierzbicka's groundbreaking work on Semantic Primitives. The first within the program to focus on a number of typologically similar languages it proposes a French Spanish Portuguese and Italian version of the Natural Semantic Metalanguage (NSM) elaborated over the years by Wierzbicka and colleagues. Repetition is avoided through teamwork: a number of authors working on the languages under examination have had equal input in a set of five papers dealing with distinct parts of the metalanguage. Some of the findings presented here invite us to have a fresh look at what has already been achieved and to amend some of the working hypotheses of the NSM approach accordingly. The volume also contains six case studies on Italian *sfogarsi*, Portuguese *saudades*, Spanish *crisis*, French *certes*, Spanish expressions of sincerity and Italian and Spanish diminutives respectively.
