Conceptions of God in Ancient Egypt Erik Hornung, 1983 **Conceptions of God in Ancient Egypt** Erik Hornung, 1982 An excellent historical overview of the gods It is a recommended necessary reading for those studying Ancient Egyptian religion Frankie s Reviews in Egyptology A work of extraordinary distinction Hornung s book will appeal to anyone interested in ancient Egypt in ancient religion and in the history of religion as well as students and scholars of ancient history anthropology and archaeology Osiris Horus Isis Thoth Anubis the many strange and compelling figures of the Egyptian gods and goddesses seem to possess endless fascination The renowned Egyptologist Erik Hornung here studies the ancient Egyptians conceptions of god basing his account on a thorough reappraisal of the primary sources His book now available in English for the first time is the most extensive exploration yet undertaken of the nature of Egyptian religion Hornung examines the characteristics spheres of action and significance of Egyptian gods and goddesses analyzing the complex and changing iconography used to represent them and disentangling the many seemingly contradictory aspects of the religion of which they are a part He seeks to answer two basic questions How did the Egyptians themselves see their gods Did they believe there was an impersonal anonymous force behind the multiplicity of their deities Throughout he attempts to evoke the complexity and richness of the religion of the ancient Egyptians and of their worldview which differs so greatly from our own Sensitively translated by John Baines and with a new preface by the author this edition has been amplified and updated with an English language audience in mind Religion in Ancient Egypt John Baines, Leonard H. Lesko, David P. Silverman, 1991 Lectures given at a symposium held in 1987 sponsored by Fordham University *Conceptions of Justice from Earliest History to Islam* Abbas Mirakhor, Hossein Askari, 2019-04-17 This book examines the conceptions of justice from Zarathustra to Islam The text explores the conceptions of justice by Zarathustra Ancient Egypt India Mesopotamia Noah Abraham and Moses During the Axial Age 800 200 BCE the focus of justice is in India China and Greece In the post Axial age the focus is on Christianity The authors then turn to Islam where justice is conceived as a system which emerges if the Quranic rules are followed This work concludes with the views of early Muslim thinkers and on how these societies deteriorated after the death of the Prophet The monograph is ideal for those interested in the conception of justice through the ages Islamic studies political Islam and issues of peace and justice The Origins of Biblical Monotheism Mark S. Smith, 2003-11-06 One of the leading scholars of ancient West Semitic religion discusses polytheism vs monotheism by covering the fluidity of those categories in the ancient Near East He argues that Israel s social history is key to the development of monotheism **God's Wife, God's Servant** Mariam F. Ayad, 2009-06-02 Drawing on textual iconographic and archaeological evidence this book highlights a historically documented but often ignored instance where five single women were elevated to a position of supreme religious authority The women were Libyan and Nubian royal princesses who consecutively held the title of God s Wife of Amun during the Egyptian Twenty third to Twenty sixth dynasties c 754 525 BCE

At a time of weakened royal authority rulers turned to their daughters to establish and further their authority Unmarried the princess would be dispatched from her father's distant political

The Routledge Companion to Theism Charles Taliaferro, Victoria S. Harrison, Stewart Goetz, 2013 There are deep and pervasive disagreements today in universities and colleges and popular culture in general over the credibility and value of belief in God This has given rise to an urgent need for a balanced comprehensive accessible resource book that can inform the public and scholarly debate over theism While scholars with as diverse interests as Daniel Dennett Terry Eagleton Richard Dawkins Jürgen Habermas and Rowan Williams have recently contributed books to this debate theism as a concept remains poorly understood and requires a more thorough and systematic analysis than it has so far received in any single volume The Routledge Companion to Theism addresses this need by investigating theism's history as well as its relationship to inquiry in the sciences social sciences and humanities and to its wider cultural contexts The contents are not confined within the philosophy of religion or even within the more expansive borders of philosophy Rather The Routledge Companion to Theism investigates its subject through the lens of a wide variety of disciplines and explores the ramifications of theism considered as a way of life as well as an intellectual conviction The five parts of the volume indicate its inclusive scope I What is Theism II Theism and Inquiry III Theism and the Socio Political Realm IV Theism and Culture V Theism as a Way of Life The result is a well ordered and thorough collection that should provide a wide spectrum of readers with a better understanding of a subject that's much discussed but frequently misunderstood As the editors note in their Introduction while stimulating and informing the contemporary debate a key aim of the volume is to open new avenues of inquiry into theism and thereby to encourage further research into this vital topic Comprised of 54 essays by leading scholars in philosophy history theology religious studies political science education and sociology The Routledge Companion to Theism promises to be the most useful comprehensive resource on an emerging subject of interest for students and scholars

In Quest of the Historical Adam William Lane Craig, 2021-09-28 Was Adam a real historical person If so who was he and when did he live William Lane Craig sets out to answer these questions through a biblical and scientific investigation He begins with an inquiry into the genre of Genesis 1:11 determining that it can most plausibly be classified as mytho history a narrative with both literary and historical value He then moves into the New Testament where he examines references to Adam in the words of Jesus and the writings of Paul ultimately concluding that the entire Bible considers Adam the historical progenitor of the human race a position that must therefore be accepted as a premise for Christians who take seriously the inspired truth of Scripture Working from that foundation of biblical truth Craig embarks upon an interdisciplinary survey of scientific evidence to determine where Adam could be most plausibly located in the evolutionary history of humankind ultimately determining that Adam lived between 750 000 and 1 000 000 years ago as a member of the archaic human species *Homo heidelbergensis* He concludes by reflecting theologically on his findings and asking what all this might mean for us as human beings created in the image of God literally descended from a common

ancestor albeit one who lived in the remote past **An Excellent Fortress for His Armies, a Refuge for the People”**

A. North, John North, 2023 The Religious History of the Roman Empire The Republican Centuries consists of fourteen chapters all dealing with aspects of the religious life of Republican Rome between c 500 BCE and the fall of the Republican constitution in c 30 BCE Mediterranean Identities Borna Fuerst-Bjeliš, 2017-11-08 What is the Mediterranean The perception of the Mediterranean leans equally on the nature culture history lifestyle and landscape To approach the question of identity it seems that we have to give importance to all of these There is no Mediterranean identity but Mediterranean identities Mediterranean is not about the homogeneity and uniformity but about the unity that comes from diversities contacts and interconnections The book tends to embrace the environment society and culture of the Mediterranean in their multiple and unique interconnections over the millennia contributing to the better understanding of the essential human environmental interrelations The choice of 17 chapters of the book written by a number of prominent scholars clearly shows the necessity of the interdisciplinary approach to the Mediterranean identity issues The book stresses the most serious concerns of the Mediterranean today threats to biodiversity risks and hazards mostly the increasing

wildfires and finally depletion of traditional Mediterranean practices and landscapes as constituent parts of the Mediterranean heritage
