Conceptions Of National History Proceedi:

Conceptions of National History Erik Lönnroth, Karl Molin, Ragnar Björk, 1994 *Concepts of Philosophy in Asia and the Islamic World* Raji C. Steineck, Ralph Weber, Robert Gassmann, Elena Lange, 2018-05-07 The contributions to Concepts of Philosophy in Asia and the Islamic World reflect upon the problems implied in the received notions of philosophy in the respective scholarly literatures They ask whether and for what reasons a text should be categorized as a philosophical text or excluded from the canon of philosophy and what this means for the concept of philosophy The focus on texts and textual corpora is central because it makes authors expose their claims and arguments in direct relation to specific sources and discourages generalized reflections on the characteristics of for example Japanese culture or the Indian mind The volume demonstrates that close and historically informed readings are the sine qua non in discussing what philosophy is in Asia and the Islamic world just as much as with regard to Western literature Contributors are Yoko Arisaka Wolfgang Behr Thomas Fr hlich Lisa Indraccolo Paulus Kaufmann Iso Kern Ralf M ller Gregor Paul Lisa Raphals Fabian Sch fer Ori Sela Rafael Suter Christian Uhl Viatcheslav Vetrov Yvonne Schulz Zinda and Nicholas Zufferey *A Global History of Modern Historiography* Georg G Iggers, Q. Edward Wang, Supriya Mukherjee, 2013-09-13 So far histories of historiography have concentrated almost exclusively on the West This is the first book to offer a history of modern historiography from a global perspective Tracing the transformation of historical writings over the past two and half centuries the book portrays the transformation of historical writings under the effect of professionalization which served as a model not only for Western but also for much of non Western historical studies At the same time it critically examines the reactions in post modern and post colonial thought to established conceptions of scientific historiography A main theme of the book is how historians in the non Western world not only adopted or adapted Western ideas but also explored different approaches rooted in their own cultures Western Historical Thinking Jörn Rüsen, 2002 Presents 17 contributions written by an international group of historians addressing the intercultural dimension of historical theory The editor s introduction discusses historical thinking as intercultural discourse and presents ten hypotheses that aim to define Western historical thinking Scholars from Asia and Africa comment on his position in light of their own ideas about the sense and meaning of historical thinking The volume wraps up with comments on the questions and issues raised by the authors and suggestions for the future of intercultural communication Annotation copyrighted by Book News Inc Portland OR *Storia della storiografia*, 2007 *Inventing China through History* Q. Edward Wang, 2001-01-01 A critical examination of the rise of national history in early twentieth century China *The Politics of Historical Production in Late Qing and Republican China* Tze-ki Hon, Robert Culp, 2007-09-30 This book examines forms of Chinese historical production happening outside the mainstream of academic history through such new measures as the publication of textbooks the writing of local history the preservation of archival materials and government attempts to establish orthodox historical accounts The book does so in order to broaden the scope of modern Chinese historiography

when it focuses primarily on a small group of writers such as Liang Qichao Gu Jiegang and Fu Sinian Directly linking historical writings to the formation of the nation the justification of elite authority and the cultivation of active citizenry this book shows that historiography is essential to understanding the uniqueness of Chinese modernity Also available in paperback Translation and Modernization in East Asia in the Nineteenth and Early Twentieth Centuries Wong Lawrence Wangchi,2018-03-15 This book discusses how Western ideas knowledge concepts and practices were imported adapted and even transformed into varied contexts in East Asia In particular authors in this rich volume focus on the role translation played in the processes of modernization in China Japan and Korea in the 19th and early 20th centuries *J. E. Lloyd and the Creation of Welsh History* Huw Pryce,2011-05-15 This is the first book about the historian John Edward Lloyd 1861 1947 whose *A History of Wales from the Earliest Times to the Edwardian Conquest* 1911 marks a turning point in the writing of Welsh history **The Many Faces of Clio** Q. Edward Wang,Franz L. Fillafer,Georg G. Iggers,2007 Born in Germany Georg Iggers escaped from Nazism to the United States in his adolescence where he became one of the most distinguished scholars of European intellectual history and the history of historiography In his lectures delivered all over the world and in his numerous books translated into many languages Georg Iggers has reshaped historiography and indefatigably promoted cross cultural dialogue This volume reflects the profound impact of his oeuvre Among the contributors are leading intellectual historians but also younger scholars who explore the various cultural contexts of modern historiography focusing on changes of European and American scholarship as well as non Western historical writing in relation to developments in the West Addressing these changes from a transnational perspective this well rounded volume offers an excellent introduction to the field which will be of interest to both established historians and graduate students Humanism in East Asian Confucian Contexts Chun-chieh Huang,2014-03-15 The past 60 years have seen the rediscovery of the immense cultural depth of Confucian humanist thought and its power to shape the way human beings are understood in East Asia In this volume renowned Confucian scholar Chun chieh Huang analyzes various East Asian contexts to identify the central pillars of the Confucian humanist spirit a continuum between mind and body harmony between oneself and others the unity of heaven and humanity and a profound historical consciousness Scholars of religion history philosophy and Asian studies will find this volume an indispensable guide to the rich tradition of East Asian Confucian humanism **The Challenge of Linear Time** ,2013-10-31 The papers collected in this volume congeal around a debate about the ways and extent of the dominance of linear time and progressive history and the concomitant delineation of the nation in Chinese and Japanese historiography As China and Japan entered the global capitalist system of nation states the Chinese and Japanese regimes implemented a number of reforms which resulted in transformations that affected everyday experience In the face of imperialism and the perceived threat of being split up the Meiji and late Qing governments radically reoriented policies in order to become wealthy and powerful in the global arena People not only began to experience time and space in new ways but elites also

were increasingly exposed to Western theories of history and concepts of nationhood which became dominant. These changes contributed to the production of new types of historical consciousness and collective identity. The essays in this volume each provide a perspective on the complex ways in which imagining national and regional identity in East Asia were and continue to be enmeshed with visions of time and history. This book should be of interest to all those who are interested in nationalism, modernity in China and Japan, global capitalism and the politics of time.

New Developments in Asian Studies Paul van der Velde, Alex McKay, 1998. This wide ranging volume presents new developments in Asian studies across many fields and periods of history. The geographical scope of the work ranges from Gujarat to the mountains of western Japan and from Tibet to Madagascar. They cover a time scale from tenth century China to the present situation in the Pacific Rim and deal with such political issues as minority rights and legal reforms and analyses of academic discourse in Asia.

The Allure of the Nation Tze-ki Hon, 2015-03-20. Covering half a century from 1895 to 1945, *The Allure of the Nation* examines three interlocking aspects of Chinese nationalist modernity: 1. the quest to balance global connectivity and ethnic authenticity; 2. the desire to balance national unity and local autonomy; 3. the drive to balance history's place as a tool of political propaganda and as a weapon used to critique orthodoxy and political suppression. By viewing the nation as a cluster of spatial-temporal relations that link individuals to a territorial state, this book provides a different view of early twentieth century China where the party state did not have full control of political and cultural affairs and alternative political perspectives such as local self-government and democratic aristocracy could be freely expressed.

New Developments in Asian Studies Van, 2013-01-11. First published in 1998, Routledge is an imprint of Taylor & Francis, an informa company.

Sinicization and the Rise of China Peter J. Katzenstein, 2013-03-01. China's rise and processes of Sinicization suggest that recombination of new and old elements rather than a total rupture with or return to the past is China's likely future. In both space and time, civilizational politics offers the broadest social context. It is of particular salience in China. Reification of civilizations into simple categories such as East and West is widespread in everyday politics and common in policy and academic writings. This book's emphasis on Sinicization as a specific instance of civilizational processes counters political and intellectual shortcuts and corrects the mistakes to which they often lead. Sinicization illustrates that like other civilizations, China has always been open to variegated social and political processes that have brought together many different kinds of peoples adhering to very different kinds of practices. This book tries to avoid the reifications and celebrations that mark much of the contemporary public debate about China's rise. It highlights instead complex processes and political practices bridging East and West that avoid easy shortcuts. The analytical perspectives of this book are laid out in Katzenstein's opening and concluding chapters. They are explored in six outstanding case studies written by widely known authors which cover questions of security, political economy and culture. Featuring an exceptional line up and representing a diversity of theoretical views within one integrative perspective, this work will be of interest to all scholars and students of international relations, sociology and political science.

Contemporary East Asia and the Confucian Revival Jana S. Rošker, Nataša Visočnik, 2015-10-28 The so called Confucian revival which came to prominence at the end of the twentieth century and which is manifested in the philosophical stream of Modern Confucianism is one of the most significant elements within new Asian modernisation ideologies By providing new insights into the culturally conditioned structure of Asian societies this book contributes to the improvement of political economic and cultural relations between Western and East Asian countries Most classical Western modernisation theories have assumed that Confucianism would have to be abandoned if East Asia wanted to dev

Cultural Centrality and Political Change in Chinese History Roger V. Des Forges, 2003 The Ming period of Chinese history is often depicted as one of cultural aridity political despotism and social stasis Recent studies have shown that the arts continued to flourish government remained effective people enjoyed considerable mobility and China served as a center of the global economy This study goes further to argue that China s perennial quest for cultural centrality resulted in periodic political changes that permitted the Chinese people to retain control over social and economic developments The study focuses on two and a half million people in three prefectures of northeast Henan the central province in the heart of the central plain a common synecdoche for China The author argues that this population may have been more representative of

the Chinese people at large than were the residents of more prosperous regions. Many diverse individuals in northeast Henan invoked historical models to deal with the present and shape the future. Though they differed in the lessons they drew, they shared the view that the Han dynasty was particularly relevant to their own time. Han and Ming politics were integral parts of a pattern of Chinese historical development that has lasted to the present.
