*Concepts and Challenges in Retinal Biology* H. Kolb, H. Ripps, Samuel Miao-sin Wu, S. Wu, 2003-09-11 In August 2000 a Festschrift was held at the Marine Biological Laboratory Woods Hole Massachusetts to celebrate the career of Professor John E Dowling on the occasion of his 65th birthday Containing contributions from more than 50 of John's colleagues representing a Who's Who of the vision research community this work not only provides a memento of the occasion but will hopefully serve as a basic reference for future researchers in retinal biology The volume is divided somewhat arbitrarily into seven areas of retinal research containing chapters that present in some cases a broad overview of a particular topic and in others an account of current research and studies in progress These chapters exemplify the richness diversity and excitement of contemporary retinal research They also remind us of how much more needs to be done before we understand fully the interrelationship between retinal neurons the complex interactions between neurons and glial cells and the mechanisms that govern retinal development A final chapter contributed by John Dowling provides an overview of past accomplishments and offers some future perspectives on retinal research in the 21st century

ENC Focus ,2003      Memetics and Evolutionary Economics Michael P. Schlaile, 2020-12-21 This book explores the question of whether and how meme theory or memetics can be fruitfully utilized in evolutionary economics and proposes an approach known as economemetics which is a combination of meme theory and complexity theory that has the potential to combat the fragmentation of evolutionary economics while re connecting the field with cultural evolutionary theory By studying the intersection of cultural and economic evolution complexity economics computational economics and network science the authors establish a connection between memetics and evolutionary economics at different levels of investigation The book first demonstrates how a memetic approach to economic evolution can help to reveal links and build bridges between different but complementary concepts in evolutionary economics Secondly it shows how organizational memetics can help to capture the complexity of organizational culture using meme mapping Thirdly it presents an agent based simulation model of knowledge diffusion and assimilation in innovation networks from a memetic perspective The authors then use agent based modeling and social network analysis to evaluate the diffusion pattern of the Ice Bucket Challenge as an example of a viral meme Lastly the book discusses the central issues of agency creativity and normativity in the context of economemetics and suggests promising avenues for further research
