## Concepts And Society:

*Concepts and Society (RLE Social Theory)* Ian C. Jarvie, 2014-08-21 The main concern of Dr Jarvie's book is the relation of belief to action. He argues that people act in society because of beliefs because of the way they see things. There is the world of physical and social conditioning where fixed roles tropisms adaptations seem to operate; there is the world of mind where action alternatively seems to originate; but then there is Karl Popper's third world where dwell the objects of thought, ideals, theories, beliefs, values which directly affect how people act and thus affect the way the world is. Reform, change, improvement, modification all proceed from the competitive interaction between our private beliefs about the world and their third world brothers. Jarvie contends that the struggle of privately held beliefs to realize themselves in the world through the actions of their believers is a fundamental force behind social change. *Mutual Funds, Hedge Funds, and the Public-Private*

*Dichotomy in a Macrosociological Framework for Law*, **Hermann Cohen** Frederick C. Beiser, 2018 This book is the first complete intellectual biography of Hermann Cohen 1842-1918 and the only work to cover all his major philosophical and Jewish writings. Frederick C. Beiser pays special attention to all phases of Cohen's intellectual development, its breaks and its continuities throughout seven decades. The guiding goal behind Cohen's intellectual career, he argues, was the development of a radical rationalism, one committed to defending the rights of unending enquiry and unlimited criticism. Cohen's philosophy was therefore an attempt to defend and revive the Enlightenment belief in the authority of reason, his critical idealism an attempt to justify this belief and to establish a purely rational worldview. According to this interpretation, Cohen's thought is resolutely opposed to any form of irrationalism or mysticism because these would impose arbitrary and artificial limits on criticism and enquiry. It is therefore critical of those interpretations which see Cohen's philosophy as a species of proto-existentialism, Rosenzweig or Jewish mysticism. Adelman and Kohnke's *Hermann Cohen: An Intellectual Biography* attempts to unify the two sides of Cohen's thought, his philosophy and his Judaism. Maintaining that Cohen's Judaism was not a limit to his radical rationalism but a consistent development of it, Beiser contends that his religion was one of reason. He concludes that most critical interpretations have failed to appreciate the philosophical depth and sophistication of his Judaism, a religion which committed the believer to the unending search for truth and the striving to achieve the cosmopolitan ideals of reason.

Anheier, Stefan Toepler, 2009-11-24 Recently the topic of civil society has generated a wave of interest and a wealth of new information. Until now no publication has attempted to organize and consolidate this knowledge. Global in scope and authoritative in content, the Encyclopedia offers succinct summaries of core concepts and theories, definitions of terms, biographical entries on important figures and organizational profiles. In addition, it serves as a reliable and up-to-date guide to additional sources of information. In sum, the Encyclopedia provides an overview of the

and how law feeds back to constitute international relations and world politics This new perspective on the politics of international law is illustrated through detailed case studies of the use of force climate change landmines migrant rights the International Criminal Court the Kosovo bombing campaign international financial institutions and global governance

**The Color of Equality** Devin J. Vartija, 2021-08-06 The Enlightenment is often either praised as the wellspring of modern egalitarianism or condemned as the cradle of scientific racism How should we make sense of this paradox The Color of Equality is the first book to investigate both the inclusive language of common humanity and the hierarchical language of race in Enlightenment thought seeking to understand how eighteenth century thinkers themselves made sense of these tensions Using three major Enlightenment encyclopedias from England France and Switzerland the book provides a rich contextualization of the conflicting ideas of equality and race in eighteenth century thought Enlightenment thinkers used physical features to categorize humanity into novel racial groups in a discourse that was imbued with Eurocentric aesthetic and moral judgments Simultaneously however these very same thinkers politicized equality by putting it to new uses such as a vitriolic denunciation of slavery and inhumane treatment that was grounded in the nascent philosophy of human rights Vartija contends that the tension between Enlightenment ideas of race and equality can best be explained by these thinkers attempt to provide a naturalistic account of humanity including both our physical and moral attributes Enlightenment racial classification fits into the novel inclusion of humanity in histories of nature while the search for the origins of morality in social experience alone lent equality a normative authority it had not previously possessed Eschewing straightforward approbation or blame of the Enlightenment The Color of Equality demonstrates that our present day thinking about human physical and cultural diversity continues to be deeply informed by an eighteenth century European intellectual revolution with global ramifications

**Youth in Europe: An international empirical study about the impact of religion on life orientation** Hans-Georg Ziebertz, William K. Kay, 2005 This book draws upon empirical data collected from 10 000 adolescent young people in 10 European countries The first volume of this project was about young people s life perspectives and the second about their religious attitudes and practices The current and final volume of this cross cultural study connects both research dimensions The analyses make clear that the influence of religion on values life orientation and politics differs strongly between different groups within Christianity and between Christians Jews and Muslims Many findings contain obvious surprises because they refute mainstream opinion on many topics The book gives detailed and new insights in the public relevance of the religiosity of young people across Europe All three volumes together are indispensable for scholars who work in public religious and educational contexts

**A Social Theory of the Nation-State** Daniel Chernilo, 2008-03-25 A Social Theory of the Nation State the political forms of modernity beyond methodological nationalism construes a novel and original social theory of the nation state It rejects nationalistic ways of thinking that take the nation state for granted as much as globalist orthodoxy that speaks of its current and definitive decline Its main aim is therefore to

provide a renovated account of the nation state's historical development and recent global challenges via an analysis of the writings of key social theorists. This reconstruction of the history of the nation state into three periods: classical (K Marx, M Weber, E Durkheim), modernist (T Parsons, R Aron, R Bendix, B Moore), and contemporary (M Mann, E Hobsbawm, U Beck, M Castells, N Luhmann, J Habermas). For each phase, it introduces social theory's key views about the nation state, its past, present, and future. In so doing, this book rejects methodological nationalism, the claim that the nation state is the necessary representation of the modern society, because it misrepresents the nation state's own problematic trajectory in modernity. And methodological nationalism is also rejected because it is unable to capture the richness of social theory's intellectual canon. Instead, via a strong conception of society and a subtler notion of the nation state, *A Social Theory of the Nation State* tries to account for the opacity of the nation state in modernity.

### **Conceptual and Ethical Challenges of Evolutionary**

**Medicine** Ozan Altinok, 2023-11-11. This book analyses the concept of disease as defined in the context of evolutionary medicine. Upon introducing the reader to evolutionary medicine in its current form and describing its approach to disease instances, the book leverages thoughts and instruments of knowledge of epistemology, social sciences, and ethics to answer the question: How can we build a timely and appropriate concept of disease? At first, it looks at the social concerns of medicalization, for example, focusing on the suffering of people who have not been diagnosed or whose suffering is not caused by certain elements that falls under the definitions of disease. In turn, it merges different both conceptual and empirical considerations in one comprehensive analysis with the aim of fostering a multidisciplinary understanding of the phenomenon of disease. This book also highlights certain kinds of epistemic injustices that are taking place in the healthcare system as this is currently conceived in post-industrial societies, thus offering a timely contribution to the current debate around social justice in healthcare.
