O'Hagan, 2002-01-01 West is a concept widely used in international relations but we rarely reflect on what we mean by the term Conceptions of and what the West is vary widely This book examines conceptions of the West drawn from writers from diverse historical and intellectual contexts revealing both interesting parallels and points of divergence It also reflects on implications of these different perceptions of how we understand the role of the West and its interactions with other civilizational identities After Secularism E. Wilson, 2011-11-22 Having destabilized dominant assumptions about the nature of religion there is now a need to develop new ways of thinking about this ever present phenomenon in global politics This book outlines a new approach to understanding religion and its relationship with politics in the West and globally for International Relations Germany and 'The West' Riccardo Bavaj, Martina Steber, 2017-06 The West is a central idea in German public discourse yet historians know surprisingly little about the evolution of the concept Contrary to common assumptions this volume argues that the German concept of the West was not born in the twentieth century but can be traced from a much earlier time In the nineteenth century the West became associated with notions of progress liberty civilization and modernity It signified the future through the opposition to antonyms such as Russia and the East and was deployed as a tool for forging German identities Examining the shifting meanings political uses and transnational circulations of the idea of the West sheds new light on German intellectual history from the post Napoleonic era to the Cold War **Normative Change and Security Community Disintegration Simon** Koschut, 2016-06-23 This book develops a theoretical and empirical argument about the disintegration of security communities and the subsequent breakdown of stable peace among nations through a process of norm degeneration It draws together two key bodies of contemporary IR literature norms and security communities and brings their combined insights to bear on the empirical phenomenon of disintegration The investigation of normative change in IR is becoming increasingly popular Most studies however focus on its progressive connotation The possibility of a weakening or even disappearance of an established peaceful normative order by contrast tends to be often either neglected or implicitly assumed Normative Change and Security Community Disintegration Undoing Peace advances the contemporary body of research on the important role of norms and ideas by analytically extending recent Constructivist arguments about international norm degeneration to the regional level and by applying them to a particular type of regional order a security community The

**EU's Shifting Borders** Klaus Bachmann, Elzbieta Stadtmuller, 2012-03-12 The EU s internal borders have become mostly invisible Today external borders are at the centre of controversy about an alleged fortress Europe Using different theoretical and methodological perspectives this book examines the challenges facing the EU s external borders including Neighborhood Policy migration issues and the diffusion of norms and values to other countries Divided into two parts the book first presents different theoretical approaches and empirical studies of the EU s external borders mobility and security issues It is an invaluable guide to border research within a framework of European Integration and Globalization Studies The second part of this volume focuses on the analyses of the EU s Neighbourhood Policy the approach to Eastern Europe and EU energy policy Expert contributors collaborate to explore debates about migration the EU as a normative civil power energy security and the securitization of borders Highly relevant and insightful the text provides a timely assessment of EU borders in an increasingly globalized and integrated European neighbourhood The EU s Shifting Borders will be of interest to students and scholars of European Union Politics and International Relations *Civilization and Empire* Shogo Suzuki,2009-02-02 This book critically examines the influence of International Society on East Asia and how its attempts to introduce civilization to barbarous polities contributed to conflict between China and Japan Challenging existing works that have presented the expansion of European International Society as a progressive linear process this book contends that imperialism along with an ideology premised on civilising barbarous peoples played a central role in its historic development Considering how these elements of International Society affected China and Japan's entry into it Shogo Suzuki contends that such states envisaged a Janus faced International Society which simultaneously aimed for cooperative relations among its civilized members and for the introduction of civilization towards non European polities often by coercive means By examining the complex process by which China and Japan engaged with this dualism this book highlights a darker side of China and Japan's socialization into International Society which previous studies have failed to acknowledge Drawing on Chinese and Japanese primary sources seldom utilized in International Relations this book makes a compelling case for revising our understandings of International Society and its expansion This book will be of strong interest to students and researcher of international relations Culture and Order in World Politics Andrew Phillips, Christian international history European studies and Asian Studies Reus-Smit, 2020-01-09 Provides a new framework for reconceptualizing the historical and contemporary relationship between cultural diversity political authority and international order The Nation State and Beyond Isabella Löhr, Roland Wenzlhuemer, 2012-12-13 The history of globalization is anything but a no frills affair that moves smoothly along a clear cut unidirectional path of development eventually leading to seamless global integration Accordingly scholarship in the social sciences has increasingly argued against equating the history of globalization processes and transcultural entanglements with the master narrative of the gradual homogenization of the world Examining the shifting patterns of global connections has therefore become the main challenge for all those who seek to understand the past the present and the future of modern

societies And this challenge includes finding a place for the nation state The studies presented here argue that looking at the nation state from the perspective of global entanglements opens the door for its interpretation as a dynamic and multi layered structure that takes part in globalization processes and plays various and at times even contradictory roles at the The Idea of Civilization and the Making of the Global Order Linklater, Andrew, 2020-11-18 The idea of civilization recurs frequently in reflections on international politics However International Relations academic writings on civilization have failed to acknowledge the major 20th century analysis that examined the processes through which Europeans came to regard themselves as uniquely civilized Norbert Elias s On the Process of Civilization This book provides a comprehensive exploration of the significance of Elias s reflections on civilization for International Relations It explains the working principles of an Eliasian or process sociological approach to civilization and the global order and demonstrates how the interdependencies between state formation colonialism and an emergent international society shaped the European Civilization, Nation and Modernity in East Asia Chih-Yu Shih,2012-06-25 This book explores the civilizing process crisis of cultural identity which has assaulted Asian countries since Western countries began to have a profound impact on Asia in the nineteenth century Confronted by Western civilization and by modernity Asian countries have been compelled to rethink their identity and to consider how they should relate to Western civilization and modernity The result the author argues has been a redefining by Asian countries of their own character as nations and an adaptation of civilization and modernity to their own special conditions Asian nations the author contends have thereby engaged with the West and with modernity but on their own terms occasionally and in various inconsistent ways in which they could assert a sense of difference forcing changes in the Western concept of civilization Drawing on postmodern theory the Kyoto School Confucian and other traditional Asian thought and the actual experiences of Asian countries especially China and Japan the author demonstrates that Asian countries redefining of the concept of civilization in the course of their quest for an appropriate postmodern national identity is every bit as key a part of the rise of Asia as economic growth or greater international political Civilization, Nation and Modernity in East Asia Zhiyu Shi,2012 This book explores the crisis of cultural identity activity which has assaulted Asian countries since Western countries began to have a profound impact on Asia in the nineteenth century Confronted by Western civilization and by modernity Asian countries have been compelled to rethink their identity and to consider how they should relate to Western civilization and modernity The result the author argues has been a redefining by Asian countries of their own character as nations and an adaptation of civilization and modernity to their own special conditions Asian nations the author contends have thereby engaged with the West and with modernity but on their own terms occasionally and in various inconsistent ways in which they could assert a sense of difference forcing changes in the Western concept of civilization Drawing on postmodern theory the Kyoto School Confucian and other traditional Asian thought and the actual experiences of Asian countries especially China and Japan the author demonstrates that Asian
