Logistics Social Responsibility and Dynamic Capabilities: Conceptualization and Empirical Analysis Tim Gruchmann, 2018-09-17 Logistics Social Responsibility LSR emerged as a concept to integrate sustainability throughout logistics oriented processes in the supply chain Hence logistics services are linked to sustainability requirements To meet these requirements logistics service providers can respond to their responsibility by reducing the ecological and social impact in the supply chain Moreover it has been recognized that consumers also need to adapt to sustainability requirements e g by supporting sustainable logistics strategies with their monetary votes or by changing their own consumption behavior This shared responsibility requires mutual support and cooperation Therefore the core of this dissertation is that logistics service providers can further support sustainable development by facilitating more sustainable consumer choices To enhance LSR activities the link to the dynamic

capabilities theory is investigated Here several capabilities have been identified through which managers can pool their knowledge and skills to generate new knowledge solutions or resource configurations Using these capabilities in a strategic manner logistics service providers can purposefully change their business environment by forming new partnerships or changing existing relationships to gain from developing new business practices stressing sustainable purposes

Conceptualizing Germany's Energy Transition Ludger Gailing,Timothy Moss,2016-05-06 This is the first book to explore ways of conceptualizing Germany s ongoing energy transition Although widely acclaimed in policy and research circles worldwide the Energiewende is poorly understood in terms of social science scholarship There is an urgent need to delve beyond descriptive accounts of policy implementation and contestation in order to unpack the deeper issues at play in what has been termed a grand societal transformation The authors approach this in three ways First they select and characterize conceptual approaches suited to interpreting the reordering of institutional arrangements socio material configurations power relations and spatial structures of energy systems in Germany and beyond Second they assess the value of these concepts in describing and explaining energy transitions pinpointing their relative strengths and weaknesses and exploring areas of complementarity and incompatibility Third they illustrate how these concepts can be applied individually and in combination to enrich empirical research of Germany s energy transition

Productive Multivocality in the Analysis of Group Interactions Daniel D. Suthers,Kristine Lund,Carolyn Penstein Rosé,Chris Teplovs,Nancy Law,2013-12-02 The key idea of the book is that scientific and practical advances can be obtained if researchers working in traditions that have been assumed to be mutually incompatible make a real effort to engage in dialogue with each other comparing and contrasting their understandings of a given phenomenon and how these different understandings can either complement or mutually elaborate on each other This key idea applies to many fields particularly in the social and behavioral sciences as well as education and computer science The book shows how we have achieved this by presenting our study of collaborative learning during the course of a four year project Through a series of five workshops involving dozens of researchers the 37 editors and authors involved in this project studied and reported on collaborative learning technology enhanced learning and cooperative work The authors share an interest in understanding group interactions but approach this topic from a variety of traditional disciplinary homes and theoretical and methodological traditions This allows the book to be of use to researchers

in many different fields and with many different goals and agendas **Dimensional Approach to the conceptualization and measurement of the broad autism phenotype** Marta Godoy Giménez, 2023-06-26 The present dissertation has converged the knowledge of three fundamental areas of psychology cognitive psychology psychobiology and psychometrics with the purpose of improving the operational and relational definitions of the broad autism phenotype BAP and its measurement process Especially it lies essence in psychometrics and its role in reconnecting how people show certain milder autistic behaviours with a theoretical and psychometric model capable of representing an operationalization of the construct in the Spanish and English general populations and developing a new measurement tool This book is organized into three blocks in the theoretical framework we define autism and BAP from a dimensional perspective and expose the state of the art in its conceptualization and measurement We finish by establishing the objectives and the research plan The second block deepens into the empirical studies conducted during my Ph D apprenticeship The first study presents the Spanish adaptation of the Broad Autism Phenotype Questionnaire BAPQ and the second study deepens into the BAPQ psychometric properties from the item response theory IRT perspective In the third study the ASD and BAP definitions are harmonized and then a group of experts attempts to reshape the items of the most applied tests to assess BAP into its updated operationalization The sixth chapter introduces the Broad Autism Phenotype International Test BAP IT which assesses the BAP two domain operationalization in two different languages Spanish and English Finally the third block exposes a general discussion of the overall results draws certain conclusions states the research limitations and delineates future research approaches

Data-driven School Improvement Series Peter Holly, 2006 Theory and Practice from a Cognitive Perspective Renia Lopez-Ozieblo, 2023-08-22 This book is intended as a theoretical and practical resource for both new and experienced teachers of a second language It integrates some of the ideas from cognitive linguistics into existing classroom approaches for teaching English as a second language through a series of lesson plans developed by teachers of English from Mainland China and Hong Kong The lesson plans provide step by step instructions for teachers including resources and an explanation of the theories underpinning each step These plans many of which are integrated into specific English as a foreign language textbook units encourage teachers to be creative by adding or adapting the material they have in order to engage their students Although the main audience is English teachers the theoretical principles covered are applicable to teachers of any foreign language and the practical examples provided in the lesson plans can be easily modified to teach other languages as well Similarly it is not just for teachers working in Chinese contexts but for anyone interested in embodied cognition as a teaching approach I intend these pages to serve as a companion for teachers to reflect on their existing practices to provide new ideas and to make them aware of the many factors affecting learning On Qian Zhongshu's Conceptualization of Translation Chang, Chung-An, 2025-10-14 This book brings new perspectives and insights to the discipline of translation studies at a time when Western theories dominate its main discourse By highlighting the significant contribution of Chinese

scholar Qian Zhongshu which encompasses a theoretical probing of the process and product of translation in both China and the West the author demonstrates how Qian's reconceptualization of the concept of translation expands the discourse to include and integrate concepts from the history of translation in China The concept of *huajing* which is one of these cultural perspectives developed by Qian transcends the conventional view of translation as a linguistic transfer envisioning it instead as a dynamic realm where encounters with meaning between the textual worlds of China and the West can take place Through a meticulous analysis of Qian's profound though stylistically fragmentary commentaries the author reveals how his comparative vision creates connections by breaking down linguistic and cultural barriers challenging notions of untranslatability that often hinder cross cultural exchange and anticipating an inclusive and globalized understanding of translation so urgently needed today

Advances in the Conceptualization of the Stress Process William R.

Avison,Carol S. Aneshensel,Scott Schieman,Blair Wheaton,2009-10-21 In 1981 Leonard Pearlin and his colleagues published an article that would radically shift the sociological study of mental health from an emphasis on psychiatric disorder to a focus on social structure and its consequences for stress and psychological distress Pearlin et al 1981 proposed a deceptively simple conceptual model that has now influenced sociological inquiry for almost three decades With his characteristic penchant for reconsidering and elaborating his own ideas Pearlin has revisited the stress process model periodically over the years Pearlin 1989 1999 Pearlin et al 2005 Pearlin and Skaff 1996 One of the consequences of this continued theoretical elaboration of the stress process has been the development of a sociological model of stress that embraces the complexity of social life Another consequence is that the stress process has continued to stimulate a host of empirical investigations in the sociology of mental health Indeed it is no exaggeration to suggest that the stress process paradigm has been primarily responsible for the growth and sustenance of sociological research on stress and mental health Pearlin et al 1981 described the core elements of the stress process in a brief paragraph The process of social stress can be seen as combining three major conceptual domains the sources of stress the mediators of stress and the manifestations of stress Each of these extended domains subsumes a variety of subparts that have been intensively studied in recent years
