Zitarelli,2019-10-21 This is the first truly comprehensive and thorough history of the development of mathematics and a mathematical community in the United States and Canada This first volume of the multi volume work takes the reader from the European encounters with North America in the fifteenth century up to the emergence of a research community the United States in the last quarter of the nineteenth In the story of the colonial period particular emphasis is given to several prominent colonial figures Jefferson Franklin and Rittenhouse and four important early colleges Harvard Qu bec William Mary and Yale During the first three quarters of the nineteenth century mathematics in North America was largely the occupation of scattered individual pioneers Bowditch Farrar Adrain B Peirce This period is given a fuller treatment here than previously in the literature including the creation of the first PhD programs and attempts to form organizations and found journals With the founding of Johns Hopkins in 1876 the American mathematical research community was finally and firmly founded The programs at Hopkins Chicago and Clark are detailed as are the influence of major European mathematicians including especially Klein Hilbert and Sylvester Klein s visit to the US and his Evanston Colloquium are extensively detailed The founding of the American Mathematical Society is thoroughly discussed David Zitarelli was emeritus Professor of Mathematics at Temple University A decorated and acclaimed teacher scholar and expositor he was one of the world s leading experts on the development of American mathematics Author or co author of over a dozen books this was his magnum opus sure to become the leading reference on the topic and essential reading not just for historians In clear and compelling prose Zitarelli spins a tale accessible to experts generalists and anyone interested in the history of science in North America      **Boundary and Eigenvalue Problems in Mathematical Physics** Hans Sagan,2012-04-26 Well known text uses a few basic concepts to solve such problems as the vibrating string vibrating membrane and heat conduction Problems and solutions 31 illustrations      **Math Makers: The Lives and Works of 50 Famous Mathematicians** Alfred S. Posamentier,Christian Spreitzer,2024-11-20 Discover the captivating stories behind the greatest minds in mathematics Mathematics today is the fruit of centuries of brilliant insights by men and women whose personalities and life experiences were often as extraordinary as their mathematical achievements This entertaining history of mathematics chronicles those achievements through 50 short biographies that bring these great thinkers to life while making their contributions understandable to the masses Among the fascinating characters profiled are Isaac Newton 1642 1727 the founder of classical physics and infinitesimal calculus he frequently quarrelled with fellow scientists and was obsessed with alchemy and arcane Bible interpretation Sophie Germain 1776 1831 who studied secretly at the cole Polytechnique in Paris using the name of a previously enrolled

male student she is remembered for her work on Fermat's Last Theorem and on elasticity theory and Srinivasa Ramanujan 1887-1920 who came from humble origins in India and had almost no formal training yet made substantial contributions to mathematical analysis number theory infinite series and continued fractions The unusual behavior and life circumstances of these and many other intriguing personalities make for fascinating reading and a highly enjoyable introduction to mathematics

**Writing the History of Mathematics: Its Historical Development** Joseph W. Dauben, Christoph J. Scriba, 2002-09-23 As an historiographic monograph this book offers a detailed survey of the professional evolution and significance of an entire discipline devoted to the history of science It provides both an intellectual and a social history of the development of the subject from the first such effort written by the ancient Greek author Eudemus in the Fourth Century BC to the founding of the international journal *Historia Mathematica* by Kenneth O May in the early 1970s

**Mathematical Expeditions** Reinhard Laubenbacher, David Pengelley, 2013-12-01 This book contains the stories of five mathematical journeys into new realms told through the writings of the explorers themselves Some were guided by mere curiosity and the thrill of adventure while others had more practical motives In each case the outcome was a vast expansion of the known mathematical world and the realization that still greater vistas remained to be explored The authors tell these stories by guiding the reader through the very words of the mathematicians at the heart of these events and thereby provide insight into the art of approaching mathematical problems The book can be used in a variety of ways The five chapters are completely independent each with varying levels of mathematical sophistication The book will be enticing to students to instructors and to the intellectually curious reader By working through some of the original sources and supplemental exercises which discuss and solve or attempt to solve a great problem this book helps the reader discover the roots of modern problems ideas and concepts even whole subjects Students will also see the obstacles that earlier thinkers had to clear in order to make their respective contributions to five central themes in the evolution of mathematics
