McKee, 2010-06-15 Contesting claims that postwar American liberalism retreated from fights against unemployment and economic inequality The Problem of Jobs reveals that such efforts did not collapse after the New Deal but instead began to flourish at the local rather than the national level With a focus on Philadelphia this volume illuminates the central role of these local political and policy struggles in shaping the fortunes of city and citizen alike In the process it tells the remarkable story of how Philadelphia s policymakers and community activists energetically worked to challenge deindustrialization through an innovative series of job retention initiatives training programs inner city business development projects and early affirmative action programs Without ignoring the failure of Philadelphians to combat institutionalized racism Guian McKee s account of their surprising success draws a portrait of American liberalism that evinces a potency not usually associated with the postwar era Ultimately interpreting economic decline as an arena for intervention rather than a historical inevitability The Problem of Jobs serves as a timely reminder of policy s potential to combat injustice Low-Cost Approaches to

Promote Physical and Mental Health Luciano L'Abate, 2007-06-06 Most physical and mental health professionals will agree that their time space and funds are generally in short supply even under optimal conditions Their participants clients or patients too will admit to similar deficits of time and patience even with optimal motivation Overburdened mental health facilities are trying to cope with limited budgets and overworked and underpaid personnel Low Cost Approaches to Promote Physical and Mental Health addresses both sides of this shortfall by offering either self administered or easily administered verbal and non verbal interventions designed to promote positive health behaviors while requiring little or no outside funding Editor Luciano L Abate continues his long tradition of prolific innovations by identifying major changes in today s health care systems and explaining how targeted prescriptive promotion prevention strategies can enhance traditional primary secondary and tertiary interventions in key behavioral and relational areas Nutrition weight obesity control diets meal planning vitamins and minerals herbal supplements Exercise expressive movement relaxation meditation and mindfulness Writing for mental health promotion from structured protocols workbooks to less structured focused expressive and guided writing including diaries and autobiographies Sex sexuality affection intimacy and fear of intimacy Mother child bonding as well as couple and family togetherness Spirituality and forgiveness in dealing with inevitable life hurts and disappointments Friendships and support groups Plus leading edge interventions including emotional intelligence animal companionship and computer technology Reviews of each promotional approach are engaging effective and consistent with standard psychological practice for lasting results either away from or in addition to non clinical and clinical settings schools hospitals seniorcitizen centers etc L Abate and his fifty colleagues have designed a future oriented sourcebook for mental and public health professionals who want to maximize their resources and those of their participants *G.K. seek to steer their economies rather than leaving them to free markets Despite the ambitions of international economic cooperation such interventionism is decidedly local Some politicians even proudly evoke economic patriotism to justify their choices This volume links such populism to a specific set of tensions the paradox of neo liberal democracy and argues that the phenomenon is ubiquitous The mandate of politicians is to defend the economic interests of their constituents under conditions where large parts of economic governance are no longer exclusively within their control Economic patriotism is one possible reaction to this tension As old style industrial policy and interventionism gained a bad reputation governments had to become creative to assure traditional economic policy objectives with new means However economic patriotism is more than just a fashionable word or a fig leaf for protectionism This volume employs the term to signal two distinctions the diversity of policy content and the multiplicity of territorial units it can refer to Comparing economic interventionism across countries and sectors it becomes clear that economic liberalism will always be accompanied by counter movements that appeal to territorial images This book was published as a special issue of the Journal of European Public Policy

Heredity Produced Staffan Müller-Wille,Hans-Jörg Rheinberger,2007 The cultural history of heredity scholars from a range of disciplines discuss the evolution of the concept of heredity from the Early Modern understanding of the act of generation to its later nineteenth century definition as the transmission of characteristics across generations Until the middle of the eighteenth century the biological makeup of an organism was ascribed to an individual instance of generation involving conception pregnancy embryonic development parturition lactation and even astral influences and maternal mood rather than the biological transmission of traits and characteristics Discussions of heredity and inheritance took place largely in the legal and political sphere In *Heredity Produced* scholars from a broad range of disciplines explore the development of the concept of heredity from the early modern period to the era of Darwin and Mendel The contributors examine the evolution of the concept in disparate cultural realms including law medicine and natural history and show that it did not coalesce into a more general understanding of heredity until the mid nineteenth century They consider inheritance and kinship in a legal context the classification of certain diseases as hereditary the study of botany animal and plant breeding and hybridization for desirable characteristics theories of generation and evolution and anthropology and its study of physical differences among humans particularly skin color The editors argue that only when people animals and plants became more mobile and were separated from their natural habitats through exploration colonialism and other causes could scientists distinguish between inherited and environmentally induced traits and develop a coherent theory of heredity Contributors David Sabeau Silvia De Renzi Ulrike Vedder Carlos L pez Beltr n Phillip K Wilson Laure Cartron Staffan Müller-Wille Marc J Ratcliff Roger Wood Mary Terrall Peter McLaughlin François Duchesneau Ohad Parnes Renato Mazzolini Paul White Nicolas Pethes Stefan Willer Helmuth Müller Sievers
