With Her Own Eyes Emily Sampson, 2006 Working in isolation on a Connecticut farm Julia Smith 1792 1886 translated the Bible into English She was the only woman to translate the entire Bible but her work has been alternately ignored or disparaged by subsequent biblical scholars This is in part because no English translation other than the King James Version attracted significant attention until the appearance of the Revised Standard Version in 1952 In *With Her Own Eyes* Emily Sampson argues that Smith's work anticipated trends followed by later usually male translators and that she deserves recognition as a pioneering and influential biblical scholar in her own right Smith was the daughter of a preacher and lawyer and a mother who wrote poetry and studied linguistics mathematics and astronomy When William Miller's predictions of the end of the world failed she began translating for herself from the original languages Trained in Greek and Latin Smith taught herself Hebrew and ultimately produced five translations In 1876 Smith published a very literal translation at her own expense She hoped not only that her Bible would reveal additions made to the King James Version but that her work would help bolster the case that women were in many respects the equal of men Sampson also details Smith's striking personal history She and her four sisters were seen as eccentrics in the small town of Glastonbury They were active in the abolitionist movement in the decades before the Civil War and later in the temperance and women's suffrage movements Smith attended the first meeting of the Association of the Advancement of Women and she and her sister Abby became famous in Connecticut for their refusal to pay taxes until given the right to vote in town meetings A comprehensive look at the intellectual social and political circles of Julia Smith *With Her Own Eyes* is a singular portrait of one of the most remarkable autodidacts in the history of American intellectual life

Crusading for Chemistry Germaine M.

Reed,2010-05-01 In this biography of Charles Holmes Herty 1867 1938 Germaine M Reed portrays the life and work of an internationally known scientist who contributed greatly to the industry of his native region and who played a significant role in the development of American chemistry As president of the American Chemical Society editor of its industrial journal adviser to the Chemical Foundation and as a private consultant Herty promoted southern industrial development through chemistry On a national level he promoted military preparedness with the Wilson administration lobbied Congress for protection of war born chemical industries and sought cooperation and research by business government and universities In 1932 he established a pulp and paper laboratory in Savannah Georgia to prove that cheap fast growing southern pine could replace Canadian spruce in the manufacture of newsprint and white paper As a direct result of Herty s research and his missionary like zeal construction of the south s first newsprint plant was begun near Lufkin Texas in 1938 Gentlemen Merchants Philip N. Racine,2008 Gentlemen Merchants preserves the correspondence between members of two wealthy slaveholding merchant families the Gourdins and the Youngs in nineteenth century Charleston South Carolina Because the correspondence lasts over forty years the letters provide a significant record of historical Southern themes Plantation born urban dwellers the correspondents comment deeply and widely on their own family history religion in the South slavery and race business secession Civil War and Reconstruction Gentlemen Merchants offers a fresh perspective on the Old South s elite slaveholders from the vantage point of commercial offices docks and wharves instead of the rural plantation These prominent Charleston families grew wealthy through commercial trading of Sea Island and upland cotton rice and wine Charleston emerges as a main character in these letters as the discrepancy between the wealthy upper class and working class immigrants becomes more pronounced There are also letters from family members who traveled widely for business and pleasure They recount travel adventures in England and France on the slopes of Mount Vesuvius and at Niagara Falls The Gourdins and Youngs lived in material comfort for over three decades and fought to preserve their way of life the basis of which was made possible by slavery The family was one shaped by privilege and destroyed by war When the world changed as a result of the Civil War the family members were left penniless It is unusual that both sides of this correspondence have survived making this collection an extraordinary primary source for historical research Historically minded general readers will also enjoy the perspective on the urban South that these letters provide Philip N Racine published numerous articles and books about southern history including Piedmont Farmer He is currently the William R Kenan Professor of History at Wofford College where he has taught since 1969 **Southern Women in the Recent Educational Movement in the South** A. D. Mayo,2001-03-01 Like many other northern clergymen after the Civil War A D Mayo became interested in the role that education could play in rebuilding southern society From 1880 to 1900 he traveled from Virginia to Texas as an educational missionary advocating the new education theories of the 1840s and 1850s In time he came to be considered one of the most perceptive observers of southern education during the period from the end of Reconstruction to the rise of the Redeemer

governments in the 1890s Mayo was convinced that the changes in southern society that Reconstruction had failed to bring about could be realized under a sound educational system Learning he believed should be based on individual needs rather than on rote memorization of facts and teachers should be recruited from those trained in the civilizing values In Southern Women Mayo set forth at length the ideas that southern white women were the ideal ones to transmit learning to the young blacks Stressing the greatly expanding role of these women because of the war Mayo saw them as a kind of elite trained in the ideals and culture of the Old South but receptive to the values of the New South In their introduction Dan Carter and Amy Friedlander place Mayo in the context of nineteenth century intellectual and social currents and provide an interesting perspective on his often surprisingly contemporary sounding ideas on education
