Concorde And Dissent Explaining High Technology Project Failures In Britain And France:

Concorde and Dissent Elliot J. Feldman, 2009-04-09 This book is a study of the joint British and French construction of Concorde and their separate projects to build new international airports in London the repeatedly abandoned third airport and Paris Charles de Gaulle Conventional explanations of these projects all of which can be seen as failures in some sense contrast French professional and rational planning expertise with the amateurishness of the British Professor Feldman challenges such stereotypes arguing instead that policy failures in the two countries can be explained in terms of political instability His book is unique in developing such detailed controlled case studies for the comparison of political systems and offers new insights into public policy making in Britain and France

The Light-Green Society Michael Bess, 2003-11-15 The accelerating interpenetration of nature and culture is the hallmark of the new light green social order that has emerged in postwar France argues Michael Bess in this penetrating new history On one hand a preoccupation with natural qualities and equilibrium has increasingly infused France's economic and cultural life On the other human activities have laid an ever more potent and pervasive touch on the environment whether through the intrusion of agriculture industry and urban growth or through the much subtler and more well intentioned efforts of ecological management The Light Green Society limns sharply these trends over the last fifty years The rise of environmentalism in the 1960s stemmed from a fervent desire to save wild nature nature conceived as a qualitatively distinct domain wholly separate from human designs and endeavors And yet Bess shows after forty years of environmentalist agitation much of it remarkably successful in achieving its aims the old conception of nature as a separate sphere has become largely untenable In the light green society where ecology and technological modernity continually flow together a new hybrid vision of intermingled nature culture has increasingly taken its place

The French and Italian Communist Parties Cyrille Guiat, 2004-08-02 This volume is a systematic comparative study of the French and Italian Communist parties in the period from the early 1960s to the early 1980s

The Enigma of the Aerofoil David Bloor, 2011-10-03 Why do aircraft fly How do their wings support them In the early years of aviation there was an intense dispute between British and German experts over the question of why and how an aircraft wing provides lift The British under the leadership of the great Cambridge mathematical physicist Lord Rayleigh produced highly elaborate investigations of the nature of discontinuous flow while the Germans following Ludwig Prandtl in Göttingen relied on the tradition called technical mechanics to explain the flow of air around a wing Much of the basis of modern aerodynamics emerged from this remarkable episode yet it has never been subject to a detailed historical and sociological analysis In *The Enigma of the Aerofoil* David Bloor probes a neglected aspect of this important period in the history of aviation Bloor draws upon papers by the participants their restricted technical reports meeting minutes and personal correspondence much of which has never before been published and reveals the impact that the divergent mathematical traditions of Cambridge and Göttingen had on this great debate Bloor also addresses why the British even after discovering the failings of their own theory

remained resistant to the German circulation theory for more than a decade The result is essential reading for anyone studying the history philosophy or sociology of science or technology and for all those intrigued by flight Understanding Policy Fiascoes Paul 't Hart, 2017-09-08 A crisis of governance is widespread in western societies Public administration is caught in a web of personal and organizational inter dependencies that require continuous awareness and readjustment on the part of its practitioners Understanding Policy Fiascoes applies policy analysis to come to terms with policy fiascoes with a full appreciation of its limits Despite the fact that policy failures may seem universal they are in fact better understood as social political and academic constructions Bovens and tHart trace how and why certain episodes of public policymaking become labeled as fiascoes They highlight the analytical and political biases that shape our judgments of policy outcomes and the performance of policymakers and institutions When put in their proper historical institutional and policymaking perspective many policy fiascoes could easily have turned out quite differently The authors show that the fact that these policy episodes unfolded as they did does not mean that they were inevitable Careful analysis indicates that a whole series of variables if not always manageable can through careful configurations of decisions alter the course and outcomes of policies and programs as well as the post hoc judgments made about them In examining public policymaking certain questions arise If public policymaking has failed so miserably what does this tell us about the state of policy analysis While policymakers are facing a crisis of legitimacy policy analysis have been forced to reconsider the validity of their knowledge claims and the extent of their impact on the practice of policymaking Understanding Policy Fiascoes will provide social scientists policymakers and political scientists with compelling perspectives on old problems and a path breaking way to handle new problems *The Anthro Factor in Warfare* ,1988 *Geography, Resources and Environment, Volume 2* Gilbert F. White, 1986 Over the course of half a century Gilbert F White s work has served to shape and in several instances establish many of the fields that have come to be known as the environmental sciences In this collection of original essays a companion volume to White s selected writings volume I leading scholars in areas such as water supply environmental hazards and natural resource management interpret changes in these fields since White s work and assess present and future problems With volume 1 this collection presents a complete and cogent picture of Gilbert White s contribution and the work he inspired **The Management of Projects** Peter W. G. Morris, 1994 This book will undoubtedly become one of the classics of the project management literature There will be a growing need for project managers who can look beyond the internal processes of their projects to the organisational technological and socio economic contexts in which projects must be managed A good starting point would be for all project managers to read this book Construction Management and Economics **From State to Market?** Vivien A. Schmidt, 1996-04-26 The Mitterrand years saw the transformation of business and its relationship to government From State to Market first published in 1996 details the governmental policies toward business that went from nationalization to privatization deregulation and ever increasing European integration bringing with them the

move from a dirigiste or state directed economy to a more market oriented one Professor Schmidt profiles the players the interpenetrating elite of top business and government officials who share common state educational history and career track and who as the beneficiaries of the all pervasive culture of the state have managed not only to maintain their hold in the ministries but also to colonize industry This book which spans the fields of public policy and political economy contains both empirical information the results of over forty interviews with top business and government officials and a theoretical framework that sets French state society relations in comparative perspective

Reconstructing Project Management

Peter W. G. Morris, 2013-05-28 This hugely informative and wide ranging analysis on the management of projects past present and future is written both for practitioners and scholars Beginning with a history of the discipline s development Reconstructing Project Management provides an extensive commentary on its practices and theoretical underpinnings and concludes with proposals to improve its relevancy and value Written not without a hint of attitude this is by no means simply another project management textbook The thesis of the book is that it all depends on how you define the subject that much of our present thinking about project management as traditionally defined is sometimes boring conceptually weak and of limited application whereas in reality it can be exciting challenging and enormously important The book draws on leading scholarship and case studies to explore this thesis The book is divided into three major parts Following an Introduction setting the scene Part 1 covers the origins of modern project management how the discipline has come to be what it is typically said to be how it has been constructed and the limitations of this traditional model Part 2 presents an enlarged view of the discipline and then deconstructs this into its principal elements Part 3 then reconstructs these elements to address the challenges facing society and the implications for the discipline in the years ahead A final section reprises the sweep of the discipline s development and summarises the principal insights from the book This thoughtful commentary on project and program and portfolio management as it has developed and has been practiced over the last 60 plus years and as it may be over the next 20 to 40 draws on examples from many industry sectors around the world It is a seminal work required reading for everyone interested in projects and their management

Doctors and the State David Wilsford, 1991 All advanced health care systems face severe difficulties in financing the delivery of today s sophisticated medical care In this study David Wilsford compares the health systems in France and the United States to demonstrate that some political systems are considerably more effective at controlling the cost of care than others He argues that two variables the autonomy of the state and the strength and cohesiveness of organized medicine explain this variance In France Wilsford shows the state is strong in the health policy domain while organized medicine is weak and divided Consequently physicians exercise little influence over health care policymaking By contrast in the United States the state is weak the employers and insurers who pay for health care are fragmented and organized medicine is strong and well financed As a result medical professionals are able to exert a greater influence on policymaking thus making cost control more difficult Wilsford extends his comparison to health care

systems in the United Kingdom West Germany Italy Canada and Japan Whether the private or public sector finances health care he discovers there is now an important trend in all of the advanced industrial countries toward controlling escalating costs by curbing both the medical profession's clinical autonomy and physicians' incomes *Site Fights* Daniel P.

Aldrich, 2011-03-15 One of the most vexing problems for governments is building controversial facilities that serve the needs of all citizens but have adverse consequences for host communities Policymakers must decide not only where to locate often unwanted projects but also what methods to use when interacting with opposition groups In *Site Fights* Daniel P. Aldrich gathers quantitative evidence from close to five hundred municipalities across Japan to show that planners deliberately seek out acquiescent and unorganized communities for such facilities in order to minimize conflict When protests arise over nuclear power plants dams and airports agencies regularly rely on the coercive powers of the modern state such as land expropriation and police repression Only under pressure from civil society do policymakers move toward financial incentives and public relations campaigns Through fieldwork and interviews with bureaucrats and activists Aldrich illustrates these dynamics with case studies from Japan France and the United States The incidents highlighted in *Site Fights* stress the importance of developing engaged civil society even in the absence of crisis thereby making communities both less attractive to planners of controversial projects and more effective at resisting future threats *Facility Siting in the AsiaPacific* Fung Tung, S. Hayden Lesbirel, Kin-che Lam, 2011-07-18 This volume explores the management of conflicts arising from the siting of unwanted projects in the AsiaPacific a region inadequately explored by the relevant literature The work includes studies on a variety of locations including Hong Kong Japan Mainland China Taiwan Vietnam Singapore and others Contributions are drawn from several leading scholars intimately familiar with the locations under study and employ theoretical comparative and policybased approaches to analysis of environmental conflict risk management and public participation The editors also provide introductory and concluding sections in which the siting issues under discussion are summarized and contextualized The result is a collection that serves as an invaluable aid and source of information for policymakers environmentalists and scholars of the AsiaPacific and elsewhere **Italy in Space** Michelangelo De Maria, Lucia Orlando, 2008 [Mobility, Space and Culture](#) Peter Merriman, 2012-07-26 Over the past ten to fifteen years there has emerged an increasing concern with mobility in the social sciences and humanities In *Mobility Space and Culture* Peter Merriman provides an important and timely contribution to the mobilities turn in the social sciences encouraging academics to rethink the relationship between movement embodied practices space and place The book takes an interdisciplinary approach drawing upon theoretical and empirical work from across the social sciences and humanities to provide a critical evaluation of the relationship between mobility and place site reformulating places as in process open and dynamic spatial formations Merriman draws upon post structuralist writings on space practice and society to demonstrate how movement is not simply practised or experienced in relation to space and time but gives rise to rhythms forces atmospheres affects and materialities which are often more

crucial to embodied apprehensions of events than sensibilities of spatiality and temporality He draws upon detailed empirical research on experiences of and social reactions to driving in late Victorian and Edwardian Britain to trace how the motor car became associated with sensations of movement space and enmeshed with debates about embodiment health visibility gender and politics The book will be essential reading for undergraduates and postgraduates studying mobility in sociology geography cultural studies politics transport studies and history

Organizations, Uncertainties, And Risk James F. Short, Jr., Lee Clarke, 1992-08-26 Every day individuals groups and organizations make decisions that involve uncertainty and risk and often important consequences for society Increasingly our lives are being defined by large scale organizational decision processes involving governments businesses and other institutions This book examines the nature of decisionmaking by organizations confronted with various risks focusing on choices in which technology and scientific advances play major roles The contributors also look at the regulatory agencies that set and enforce standards of health and safety Within the literature on risk analysis this book is unique in its integration of social theory with wide variety of case examples Theories of rational choice advanced by neoclassical economics and cognitive psychology are critically examined in view of the importance of the context for decisionmaking Specific avenues for the study of the organizational institutional contexts of decisionmaking and the process of socially constructing risk objects are proposed as a means of correcting the weaknesses of these theories The contributors examine the strategies of manufacturing and communications firms neonatal intensive care units of hospitals and a major U S governmental strategies are given how energy choices are made in France and how expert advice and formal public involvement are incorporated into risk related policy decisions in Britain Field studies of regulatory agencies in Britain at both policymaking and enforcement levels are also included
