Peter Collins

Concrete The Vision Of A New Architecture:

Concrete Peter Collins, 2004 Collins provides a thorough history of the new nineteenth century material and goes on to examine the theories on its architectural expression focussing on determining role of the reinforced concrete frame He argues that Perret provides the first rational and effective expression of classical principles in modern construction Published in 1959 and out of print since 1975 this new edition of *Concrete* includes a foreword by Kenneth Frampton a scholarly introduction by R jean Legault and several additional essays on Perret by Peter Collins From the Foreword by Kenneth Frampton *Concrete* remains a valuable historical text that in many respects has never been given its due It is an unmatched pioneering history of the development of reinforced concrete up to 1914 It records and analyses the densely articulated if provincial English debate with respect to the aesthetic challenge posed by the increasing popularity of concrete from around 1870 onwards Finally until very recently it was the only readily available monograph on Auguste Perret in English In this regard it is particularly valuable as a thorough and perceptive assessment of Perret s life and career one that still stands as a point of departure for all current attempts to situate this seminal architect within the wider trajectory of twentieth century culture

Concrete: the Vision of a New Architecture Peter Collins, 1959 **Concrete: the Vision of a New Architecture** Peter Collins, 1959 *Concrete* Peter Collins, 2004 Concrete Collins (architetto.), 1959 **Introducing Architectural Theory** Korydon Smith, Miguel Guitart, 2024-01-22 Building on the success of the first edition an engaging and reader friendly work on complex ideas *Introducing Architectural Theory* Expanding the Disciplinary Debate broadens the range of themes voices and geographies represented to provide a more comprehensive and contemporary theory book This book presents major discourses in architectural theory and design in a debate like format integrating a series of edited texts across architectural history with context and newly written commentaries by the authors This new edition has been fully revised updated and expanded to include long standing debates such as simplicity vs complexity or the relationship between form and function as well as newer discussions on innovation globalization and social equity Authors Smith and Guitart provide a comprehensive means and conceptual framework for readers to compare multiple points of view The chapter structure discussion questions and additional resources allow teachers to facilitate in class discussions and writing assignments This book remains the most accessible architectural theory textbook written for beginning architecture students and those outside the discipline Its reflective and critical approach will equally engage the minds of upper level students and experts

Owen Williams David Yeomans,David Cottam,2001 Be honest first and if you are honest you will be beautiful but do not attempt to be beautiful and dishonest Sir Owen Williams Sir Owen Williams influence on architecture of the first half of the twentieth century stemmed from a demonstration of what a functionalist approach to architecture could achieve Blurring the roles of engineer and architect during the period between the wars Williams produced a series of innovative reinforced concrete buildings whose aesthetic treatment depended upon an expression of their structures

The Architecture of Paul Rudolph Timothy M. Rohan,2014-07-10 Equally admired and maligned for his remarkable Brutalist buildings Paul Rudolph 1918 1997 shaped both late modernist architecture and a generation of architects while chairing Yale s department of architecture from 1958 to 1965 Based on extensive archival research and unpublished materials The Architecture of Paul Rudolph is the first in depth study of the architect neglected since his postwar zenith Author Timothy M Rohan unearths the ideas that informed Rudolph s architecture from his Florida beach houses of the 1940s to his concrete buildings of the 1960s to his lesser known East Asian skyscrapers of the 1990s Situating Rudolph within the architectural discourse of his day Rohan shows how Rudolph countered the perceived monotony of mid century modernism with a dramatically expressive architecture for postwar America exemplified by his Yale Art and Architecture Building of 1963 famously clad in corrugated concrete The fascinating story of Rudolph s spectacular rise and fall considerably deepens longstanding conceptions about postwar architecture Rudolph emerges as a pivotal figure who anticipated new directions for architecture ranging from postmodernism to sustainability

modernism the story of husband and wife design team Antonin and Noemi Raymond This is the first comprehensive book in English on the duo that creatively transformed design from 1917 to 1966 **BOOK JACKET** **Flexible Forming for Fluid Architecture** Arno Pronk, 2021-10-11 This book on flexible formwork for fluid architecture is a multi faceted research that covers a broad field from design to material and technology and from history to future developments It offers a pragmatic approach that can be extended with more cases materials techniques and methods for fluid architecture and provides a better understanding of the main aspects of fluid architecture and to help them find the most suitable combinations of all aspects The book is a challenging experience with many new discoveries including two patents one on moulding of fluid surfaces and one on 3D printing of fibre reinforced ice It also features two world records the largest span 30 meters and the highest thin shell structure 30.5 meters in ice as well as a method for the construction of a fully laminated shell structure in insulated glass

Studies in Tectonic Culture Kenneth Frampton, 2001-08-24 Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction the book's analytical framework rests on Frampton's close readings of key French and German and English sources from the eighteenth century to the present Kenneth Frampton's long awaited follow up to his classic *A Critical History of Modern Architecture* is certain to influence any future debate on the evolution of modern architecture *Studies in Tectonic Culture* is nothing less than a rethinking of the entire modern architectural tradition The notion of tectonics as employed by Frampton the focus on architecture as a constructional craft constitutes a direct challenge to current mainstream thinking on the artistic limits of postmodernism and suggests a convincing alternative Indeed Frampton argues modern architecture is invariably as much about structure and construction as it is about space and abstract form Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction the book's analytical framework rests on Frampton's close readings of key French and German and English sources from the eighteenth century to the present He clarifies the various turns that structural engineering and tectonic imagination have taken in the work of such architects as Perret Wright Kahn Scarpa and Mies and shows how both constructional form and material character were integral to an evolving architectural expression of their work Frampton also demonstrates that the way in which these elements are articulated from one work to the next provides a basis upon which to evaluate the works as a whole This is especially evident in his consideration of the work of Perret Mies and Kahn and the continuities in their thought and attitudes that linked them to the past Frampton considers the conscious cultivation of the tectonic tradition in architecture as an essential element in the future development of architectural form casting a critical new light on the entire issue of modernity and on the place of much work that has passed as avant garde A copublication of the Graham Foundation for Advanced Studies and The MIT Press
