## **Concrete The Vision Of A New Architecture Second Edition:**

*Concrete* Peter Collins, 2004-05-10 From the Foreword by Kenneth Frampton *Concrete* remains a valuable historical text that in many respects has never been given its due It is an unmatched pioneering history of the development of reinforced concrete up to 1914 It records and analyses the densely articulated if provincial English debate with respect to the aesthetic challenge posed by the increasing popularity of concrete from around 1870 onwards Finally until very recently it was the only readily available monograph on Auguste Perret in English In this regard it is particularly valuable as a thorough and perceptive assessment of Perret's life and career one that still stands as a point of departure for all current attempts to situate this seminal architect within the wider trajectory of twentieth century culture *Concrete: the Vision of a New*

*Architecture* Peter Collins, 1959 **Concrete: the Vision of a New Architecture** Peter Collins, 1959 **Rethinking Technology** William W. Braham, Jonathan A. Hale, 2006-12-05 This essential reference for all students of architecture design and the built environment provides a convenient single source for all the key texts in the recent literature on architecture and technology The book contains over fifty carefully selected essays manifestoes reflections and theories by architects and architectural writers from 1900 to 2004 This mapping out of a century of architectural technology reveals the discipline's long and close attention to the experience and effects of new technologies and provides a broad picture of the shift from the age of tools to the age of systems Chronological arrangement and cross referencing of the articles enable both a thematic and historically contextual understanding of the topic and highlight important thematic connections across time With the ever increasing pace of technological change this Reader presents a clear understanding of the context in which it has and does affect architecture **2006 Building Technology Educators' Symposium Proceedings** Deborah Oakley, Ryan

Smith, 2008-09-03 Proceedings of the 2006 Building Technology Educators Symposium held at the University of Maryland School of Architecture Planning and Preservation **A History of Architecture and Urbanism in the Americas** Clare Cardinal-Pett, 2015-11-19 A History of Architecture and Urbanism in the Americas is the first comprehensive survey to narrate the urbanization of the Western Hemisphere from the Arctic Circle to Antarctica making it a vital resource to help you understand the built environment in this part of the world The book combines the latest scholarship about the indigenous past with an environmental history approach covering issues of climate geology and biology so that you'll see the relationship between urban and rural in a new more inclusive way Author Clare Cardinal Pett tells the story chronologically from the earliest known human migrations into the Americas to the 1930s to reveal information and insights that weave across time and place so that you can develop a complex and nuanced understanding of human made landscape forms patterns of urbanization and associated building typologies Each chapter addresses developments throughout the hemisphere and includes information from various disciplines original artwork and historical photographs of everyday life which along with numerous maps diagrams and traditional building photographs will train your eye to see the built environment as you read

about it     Henri Labrouste Henri Labrouste, Corinne Bélier, Barry Bergdoll, Marc Le Cœur, Martin Bressani, 2012 Henri Labrouste is one of the few nineteenth century architects consistently lionized as a precursor of modern architecture throughout the twentieth century and into our own time The two magisterial glass and iron reading rooms he built in Paris gave form to the idea of the modern library as a collective civic space His influence was both immediate and long lasting not only on the development of the modern library but also on the exploration of new paradigms of space materials and luminosity in places of great public assembly Published to accompany the first exhibition devoted to Labrouste in the United States and the first anywhere in the world in nearly 40 years this publication presents nearly 225 works in all media including drawings watercolors vintage and modern photographs film stills and architectural models Essays by a range of international architecture scholars explore Labrouste's work and legacy through a variety of approaches     Modern Architecture Graham Livesey, 2024-11-15 Modern Architecture The Basics examines technological stylistic socio political and cultural changes that have transformed the history of architecture since the late 18th century Broad definitions of modernity and postmodernity introduce the book which comprises 24 short thematic chapters looking at the concepts behind the development of modern and postmodern architecture These include major historical movements key figures and evolving building typologies There is also an emphasis on the changing city during the 19th and 20th centuries Approaches to representation and its impacts on architecture are studied along with the changing global role of architecture as cultural expression The book introduces new topics including gender race postcolonialism and indigeneity An undaunting contemporary and inclusive account of modern architectural history this is a must read for all students of architecture as well as those outside the discipline approaching the subject for the first time     *Digital Wood Design* Fabio Bianconi, Marco Filippucci, 2019-02-24 This book explores various digital representation strategies that could change the future of wooden architectures by blending tradition and innovation Composed of 61 chapters written by 153 authors hailing from 5 continents 24 countries and 69 research centers it addresses advanced digital modeling with a particular focus on solutions involving generative models and dynamic value inherent to the relation between knowing how to draw and how to build Thanks to the potential of computing areas like parametric design and digital manufacturing are opening exciting new avenues for the future of construction The book's chapters are divided into five sections that connect digital wood design to integrated approaches and generative design to model synthesis and morphological comprehension to lessons learned from nature and material explorations to constructive wisdom and implementation related challenges and to parametric transfigurations and morphological optimizations     **Proceedings of the First Conference of the Construction History Society** James Campbell, Nicholas Bill, Karey Draper, Patrick Fleming, Yiting Pan, Wendy Andrews, 2014 The proceedings of the first conference of the Construction History Society which took place on 11 and 12 April 2014 at Queens College Cambridge featuring 48 peer reviewed papers covering a wide variety of subjects on the theme of construction history     **Between**

**Nature And Society: Biographies Of Materials** Bernadette Bensaude-vincent,2022-04-14 This volume opens the readers eyes to the central role of materials in human societies and in the environment by telling the life stories of fifteen materials In this rich collection of stories materials are found at the complex interface between nature and society They are not just atomic structures with a set of properties and behaviors They capture the attention of nations worldwide because materials have major impacts on our welfare and can affect international peace and security

**Angels in America at the British National Theatre** Emily Garside,2022-10-21 Angels in America was one of the most significant pieces of American theatre in the 20th Century Much has been written on Tony Kushner s epic drama However the National Theatre of Great Britain s productions of the show are relatively under discussed Not only was the National Theatre responsible for helping to originate the play in the early 1990s but it helped revitalize interest in 2018 with Marianne Elliott s reimaged version starring Andrew Garfield and Nathan Lane This book considers the role of the National in the play s history and how Elliott s production reframed the play 25 years after the original it chronicles the tumultuous first production and the play s successes in London and New York The book also looks at the key features of the play its representation of AIDS its status as an iconic gay play and its searing political commentary Concluding with an in depth analysis of Marianne Elliott s reimaging of the play this book is an up to date history of Angels in America and a reflection on its continued importance

**High-performance Construction Materials: Science And Applications** Caijun Shi,Yi-lung Mo,2008-06-11 This book describes a number of high performance construction materials including concrete steel fiber reinforced cement fiber reinforced plastics polymeric materials geosynthetics masonry materials and coatings It discusses the scientific bases for the manufacture and use of these high performance materials Testing and application examples are also included in particular the application of relatively new high performance construction materials to design practice Most books dealing with construction materials typically address traditional materials only rather than high performance materials and as a consequence do not satisfy the increasing demands of today s society On the other hand books dealing with materials science are not engineering oriented with limited coverage of the application to engineering practice This book is thus unique in reflecting the great advances made on high performance construction materials in recent years This book is appropriate for use as a textbook for courses in engineering materials structural materials and civil engineering materials at the senior undergraduate and graduate levels It is also suitable for use by practice engineers including construction materials mechanical and civil engineers

*The Feel of the City* Nicolas Kenny, 2014-01-01 At the start of the twentieth century the modern metropolis was a riot of sensation City dwellers lived in an environment filled with smoky factories crowded homes and lively thoroughfares Sights sounds and smells flooded their senses while changing conceptions of health and decorum forced many to rethink their most banal gestures from the way they negotiated speeding traffic to the use they made of public washrooms *The Feel of the City* exposes the sensory experiences of city dwellers in Montreal and Brussels at the turn of the century and the ways in which these shaped the social and cultural significance of urban space Using the experiences of municipal officials urban planners hygienists workers writers artists and ordinary citizens Nicolas Kenny explores the implications of the senses for our understanding of modernity

*Owen Williams* David Yeomans, David Cottam, 2001 Be honest first and if you are honest you will be beautiful but do not attempt to be beautiful and dishonest Sir Owen Williams Sir Owen Williams influence on architecture of the first half of the twentieth century stemmed from a demonstration of what a functionalist approach to architecture could achieve Blurring the roles of engineer and architect during the period between the wars Williams produced a series of innovative reinforced concrete buildings whose aesthetic treatment depended upon an expression of their structures

*The Maze of Ingenuity, second edition* Arnold Pacey, 1992-01-23 From cathedrals to star wars Arnold Pacey looks at the interaction of technologies and society over the last thousand years and uses that survey to argue for a more humane form of future technological development The second edition of *The Maze of Ingenuity* concentrates on Europe and North America and incorporates recent insights from the history and sociology of technology A new series of chapters extends Pacey s discussion of the role of ideas and ideals in technology in the period since the industrial revolution Contents The Cathedral Builders European Technical Achievement between 1100 and 1280 A Century of Invention 1250 1350 Mathematics and the Arts 1450 1600 The Practical Arts and the Scientific Revolution Social Ideals in Technical Change German Miners and English Puritans 1450 1650 The State and Technical Progress 1660 1770 Technology in the Industrial Revolution Conflicting Ideals in Engineering America and Britain 1790 1870 Institutionalizing Technical Ideals 1820 1920 Idealistic Trends in Twentieth Century Technology

**William L. Price** George E. Thomas, 2000-03 Price a disciple of Frank Furness who practiced in Philadelphia from 1883 to 1916 established the character of two of the nation s greatest resorts Atlantic City and Miami thus shaping the architecture of the Roaring Twenties

**Changing Ideals in Modern Architecture, 1750-1950** Peter Collins, 1998 *Changing Ideals in Modern Architecture* revolutionized the understanding of

modernism in architecture pushing back the sense of its origin from the early twentieth century to the 1750s and thus placing architectural thought within the a broader context of Western intellectual history This new edition of Peter Collins s ground breaking study includes all seventy two illustrations of the original hard cover edition which has been out of print since 1967 and restores the large format

**Model Perspectives: Structure, Architecture and Culture** Mark R.

Cruvellier,Bjorn N. Sandaker,Luben Dimcheff,2017-09-25 This book contains a unique collection of various perspectives on the relationship between structures and the forms and spaces of architecture As such it provides students and professionals alike with an essential sourcebook that can be mined for visual inspiration as well as for textually rich and authoritative insight into the links between structure architecture and cultural context The chapters address fundamental structural elements and systems columns walls beams trusses frames tensile structures arches domes and shells Each chapter is subdivided into two parts The essays introduce the chapters with the reprinting of a curated set of essays and excerpts by various authors that uniquely address how particular structural elements or systems relate in essential fashion to architectural design concepts The model studies physical models of the overall structural systems of several notable contemporary buildings from Europe North and South America Africa and Asia are illustrated with large photographs detail close ups and views of their external forms and internal spaces that establish the exceptional qualities of these projects in connecting structural form to architectural design objectives Mosaic layouts complete the chapters with a collection of photographs of yet more models whose particular details and unique features serve to extend the visual repertoire of the structural type being considered The combination juxtaposition and mutual positive reinforcement of these two collections one largely textual and the other image based provides the reader with unique and multifaceted insights into how structural forms and systems can be related to architectural design intentions Conveyed by a strong and deliberate graphical design format this assembly of materials gets to the very essence of structures within the context of architecture and will inspire students and practitioners alike to make strategic design decisions for their own projects
