**Concreteness in Generative Phonology** Bernard Tranel, 2024-06-04 Concreteness in Generative Phonology presents major topics in French phonology and morphology within the theoretical framework of generative grammar The concrete analyses advocated in Bernard Tranel's study constitute a radical departure from the abstract solutions proposed in previous generative treatments Abundant internal and external evidence anchors the concrete approach which is based on the recognition of the lexical nature of nasal vowels the absence of protective schwas and the necessity of a rule feature analysis for h aspiré words French phonology has been a well known subject of controversy both because French is an influential Indo European language and because the complexity of the data has made it difficult to decide certain issues This integrated account brings to bear data generally omitted from consideration demonstrates the critical role that substantive evidence plays as a tool of investigation and provides a data based comparison between two approaches within the same broad generative framework Taking advantage of certain theoretical developments Tranel presents each problem set of data alongside previous and logical possible analyses and clearly lays out the arguments for and against each analysis This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1981 *Geschichte der Sprachwissenschaften* Sylvain Auroux, Herbert Ernst Wiegand, 2000 Biographical note Sylvain Auroux is Professor at the ENS Lettres et Sciences Humaines University of Lyon France E F K Koerner is Professor at the Centre for General Linguistics Typology and Universals Research ZAS Berlin Germany Hans J Niederehe is Professor Emeritus for Romance Philology of the University of Trier Germany Kees Versteegh is Professor at the Institute of the Middle East of the University of Nijmegen Netherlands **Generative and Non-Linear Phonology** Jacques Durand, 2014-09-25 Generative phonology is a developing field of linguistics and is producing both rival interpretations and models This book provides a clear and accessible evaluation of the debate It provides a detailed overview of the main models revealing that they are often complimentary rather than contradictory and how these can be interconnect and be used together to explore the subject Prosodic Structure and French Morphophonology Stephn J. Hannahs, 2010-11-05 This study is an examination of morphophonology in terms of the interaction between morphological structure and phonological structure The goals of the study are to propose a coherent way of looking at morphophonology in structural terms while assuming a certain autonomy of the phonological and morphological components The study assumes the basic lexical postlexical dichotomy of Lexical Phonology but refers centrally to prosodic structure of the type proposed by Selkirk 1980 and further developed by among others Nespor Vogel 1986 rather than to level ordering The specific processes of French morphophonology examined here include certain aspects of prefixation and nasalization glide information closed syllable

adjustment and penultimate schwa specification which are reanalysed in structural terms in contrast to analyses in the literature relying on level ordering Other aspects of French morphophonology argued in the literature to be rule governed such as Learned Backing are reanalysed in terms of stem suppletion The study thus supports Aronoff Sridhar 1987 Fabb 1988 Booji 1989 and others in arguing against level ordering while following the lead of Booji Lieber 1993 Inkelas 1989 and others in advocating the concurrent existence of both morphological and prosodic structure *The Blackwell Companion to Phonology, 5 Volume Set* Marc van Oostendorp, 2011-04-04 Available online or as a five volume print set The Blackwell Companion to Phonology is a major reference work drawing together 124 new contributions from leading international scholars in the field It will be indispensable to students and researchers in the field for years to come Key Features Full explorations of all the most important ideas and key developments in the field Documents major insights into human language gathered by phonologists in past decades highlights interdisciplinary connections such as the social and computational sciences and examines statistical and experimental techniques Offers an overview of theoretical positions and ongoing debates within phonology at the beginning of the twenty first century An extensive reference work based on the best and most recent scholarly research ideal for advanced undergraduates through to faculty and researchers Publishing simultaneously in print and online visit [www.companiontophonology.com](http://www.companiontophonology.com) for full details Additional features of the online edition ISBN 978 1 4443 3526 2 Powerful searching browsing and cross referencing capabilities including Open URL linking with all entries classified by key topic subject place people and period For those institutions already subscribing to Blackwell Reference Online it offers fully integrated and searchable content with the comprehensive Handbooks in Linguistics series
