**Droit de la concurrence et droit de la consommation** Marie-Stéphane Payet, 2019 Instruments de politique économique le droit de la concurrence et le droit de la consommation sont classiquement définis par les finalités économiques qu'ils servent Cette définition n'est pas sans soulever des difficultés qui conduisent à interroger sur la pertinence d'une telle définition Une autre méthode juridique peut être employée Appliquée au concept d'abus dans ces droits elle permet de révéler certains principes juridiques communs qu'ils utilisent La définition des droits naît alors de la combinaison de ces deux approches L'unité substantielle de certaines de leurs règles est renforcée par une unité matérielle Ce constat permet tout à la fois de mieux comprendre leur fonctionnement et de déterminer leur place à l'égard du droit commun

**Le concept de concurrence en droit** Lionel Zevounou (juriste.), 2010 La concurrence en droit est de près ou de loin associée au bien-être de la collectivité dans son ensemble Ce mythe reste omniprésent dans le discours des interprètes chargés d'appliquer le droit de la concurrence Or le monde des affaires tel qu'il fonctionne de manière ordinaire reste totalement loigné de cette image monopoles oligopoles monopsones constituent le quotidien des structures de marchés auxquelles sont confrontés les autorités de la concurrence et les juges Pourtant force est d'admettre que le fonctionnement imparfait de la concurrence ne peut se passer d'un mythe qui l'érige en institution politique et sociale De ce point de vue le dogme d'une concurrence utile à l'intérêt public reste incontournable pour justifier une réalité largement plus complexe et malaisée appréhender dans son ensemble Partant si l'on aborde la concurrence dans sa dimension idéologique laquelle présente aussi une grande part de complexité il va sans dire que le droit de la concurrence participe sans conteste à son institutionnalisation politique Mais outre qu'il fonde la croyance dans les bienfaits naturels de la libre concurrence le droit de la concurrence fournit aux acteurs économiques les ressources argumentatives nécessaires au développement de stratégies concurrentielles Ainsi le droit de la concurrence engendre-t-il un discours qui n'admet pas l'analyse économique que la forme S'il existe sans conteste un vocable emprunté à l'économie ce dernier se traduit dans le discours des interprètes par la production de catégories juridiques et de moyens probatoires Car si la concurrence était en tout point conforme au modèle de concurrence pure et parfaite les acteurs économiques n'auraient nul besoin de se servir de la rhétorique du droit pour justifier leurs comportements sur le marché Voilà pourquoi la production d'une telle rhétorique présente un intérêt majeur pour les acteurs économiques d'elle dépend le cadre d'appréciation de pratiques anticoncurrentielles futures Il en résulte inévitablement dans le champ dogmatique un affrontement entre écoles de pensées qui prescrivent aux interprètes différents modes de valuation des pratiques d'entreprises Néanmoins il convient de ne pas se méprendre sur les termes d'un débat qui en dépit des apparences relève du domaine de l'éthique En effet le droit de la concurrence ramène aux vieilles controverses quant à la définition d'un cadre adéquat de composition des intérêts Les affects qui

sont la source du phénomène concurrentiel peuvent autant engendrer la prospérité que la détruire La véritable question reste de savoir s'il est possible de parvenir à les gouverner et de quelle manière

**Greening EU Competition Law and Policy** Suzanne Kingston, 2011-10-27 One of the fundamental challenges currently facing the EU is that of reconciling its economic and environmental policies Nevertheless the role of environmental protection in EU competition law and policy has often been overlooked Recent years have witnessed a shift in environmental regulation from reliance on command and control to an increased use of market based environmental policy instruments such as environmental taxes green subsidies emissions trading and the encouragement of voluntary corporate green initiatives By bringing the market into environmental policy such instruments raise a host of issues that competition law must address This interdisciplinary treatment of the interaction between these key EU policy areas challenges the view that EU competition policy is a special case insulated from environmental concerns by the overriding efficiency imperative and puts forward practical proposals for achieving genuine integration
