Conditions Of Awareness Subjective Facto

Brian Cronin

Conditions Of Awareness Subjective Facto:

Kant's Transcendental Idealism Henry E. Allison, 2004-01-01 This landmark book is now reissued in a rewritten updated edition that takes account of recent Kantian literature It includes a new discussion of the Third Analogy an expanded discussion of Kant's Paralogisms new chapters on Kant's theory of reason theology the Appendix to the Dialectic **The Law of Refugee Status** James C. Hathaway, Michelle Foster, 2014-07-03 The long awaited second edition of this seminal text reconceived as a critical analysis of the world's leading comparative asylum jurisprudence *Phenomenology of Human Understanding* Brian Cronin, 2017-05-09 The problem of human knowing has been foundational for the enterprise of philosophy since the time of Descartes The great philosophers have offered different accounts of the power and limits of human knowing but no generally acceptable system has emerged Contemporary writers have almost given up on this most intractable issue In this book Brian Cronin suggests using the method of introspective description to identify the characteristics of the act of human understanding and knowing Introspection far from being private and unverifiable can be public communal and verifiable If we can describe our dreams and our feelings then we can describe our acts of understanding Using concrete examples one can identify the activities involved namely questioning researching getting an idea expressing a concept reflecting on the evidence and inferring a conclusion Each of these activities can be described clearly and in great detail If we perform these activities well we can understand and know both truth and value The text invites readers to verify each and every statement in their own experience of understanding This is a detailed and verifiable account of human knowing an extremely valuable contribution to philosophy and a solution to the foundational problem of knowing **Invisible, but how? The depth of unconscious processing as inferred from different suppression techniques.** Julien Dubois, Nathan Faivre, 2015-02-09 To what level are invisible stimuli processed by the brain in the absence of conscious awareness It is widely accepted that simple visual properties of invisible stimuli are processed however the existence of higher level unconscious processing e.g involving semantic or executive functions remains a matter of debate Several methodological factors may underlie the discrepancies found in the literature such as different levels of conservativeness in the definition of unconscious or different dependent measures of unconscious processing In this research topic we are particularly interested in yet another factor inherent differences in the amount of information let through by different suppression techniques In the same conditions of well controlled conservatively established invisibility can we show that some of the techniques in the psychophysical magic arsenal e.g masking but also visual crowding attentional blink etc reliably lead to higher level unconscious processing than others e.g interocular suppression Some authors have started investigating this question using multiple techniques in similar settings We argue that this approach should be extended and refined Indeed in order to delineate the frontiers of the unconscious mind using a contrastive method one has to disentangle the limits attributable to unawareness itself and those attributable to the technique inducing unawareness The scope of this

research topic is to provide a platform for scientists to contribute insights and further experiments addressing this fundamental question

The Citizen Factory Aurolyn Luykx, 1998-12-03 This vivid ethnography of Bolivian students explores the challenges they confront as they try to maintain their indigenous identity In examining how the concrete practices of schooling shape student identities this book looks at how the discourses and texts produced by students themselves are appropriated toward this end and how students mobilize their own cultural resources to contest this process critiquing and subtly transforming the agenda of state run education These issues are addressed as they are played out in the lives of young Native South Americans Aymaras studying to become rural schoolteachers in Bolivia the poorest and most indigenous of all Latin American countries It is a vivid ethnographic account of how these students confront the assaults which their professional training wages against their indigenous identity as they alternately absorb and contest the ethnic class and gender images meant to transform them from Aymara Indians into Bolivian citizens

Factory of Strategy Antonio Negri, 2014-02-04 Translation of the author's *Fabbrica della strategia*

Understanding Educational Research David Scott, Robin Usher, 2002-08-26 This book explores educational research in terms of the relationship between epistemology methodology and practice Divided into two sections the first examines the frameworks which underpin the methods educational researchers use The second looks at a broad spectrum of approaches including feminist approaches action research ethnography and biographical research The issues covered are central to all within the research community including students undertaking research degrees or research methodology courses

Consciousness and Self-Consciousness Rocco J. Gennaro, 1996-03-20 This interdisciplinary work contains the most sustained attempt at developing and defending one of the few genuine theories of consciousness Following the lead of David Rosenthal the author argues for the so called higher order thought theory of consciousness This theory holds that what makes a mental state conscious is the presence of a suitable higher order thought directed at the mental state In addition the somewhat controversial claim that consciousness entails self consciousness is vigorously defended The approach is mostly analytic in style and draws on important recent work in cognitive science perception artificial intelligence neuropsychology and psychopathology However the book also makes extensive use of numerous Kantian insights in arguing for its main theses and in turn sheds historical light on Kant's theory of mind A detailed analysis of the relationships between self consciousness behavior memory intentionality and de se attitudes are examples of the central topics to be found in this work Series A

The Social Bases of Politics Arnold K. Sherman, Aliza Kolker, 1986

Emotions and Personhood Giovanni Stanghellini, René Rosfort, 2013-02-07 Emotions and personhood are important notions within the field of mental health care How they are related is less evident This book provides a framework for understanding the important and complex relationship between our emotional wellbeing and our sense of self drawing on psychopathology philosophy and phenomenology

The Neural Underpinnings of Vicarious Experience Bernadette M. Fitzgibbon, Jamie

Ward,2014-08-27 Everyday we vicariously experience a range of states that we observe in other people we may feel embarrassed when witnessing another making a social faux pas or we may feel sadness when we see a loved one upset In some cases this process appears to be implicit For instance observing pain in others may activate pain related neural processes but without generating an overt feeling of pain In other cases people report a more literal conscious sharing of affective or somatic states and this has sometimes been described as representing an extreme form of empathy By contrast there appear to be some people who are limited in their ability to vicariously experience the states of others This may be the case in several psychiatric neurodevelopmental and personality disorders where deficits in interpersonal understanding are observed such as schizophrenia autism and psychopathy In recent decades neuroscientists have paid significant attention to the understanding of the social brain and the way in which neural processes govern our understanding of other people In this Research Topic we wish to contribute towards this understanding and ask for the submission of manuscripts focusing broadly on the neural underpinnings of vicarious experience This may include theoretical discussion case studies and empirical investigation using behavioural techniques electrophysiology brain stimulation and neuroimaging in both healthy and clinical populations Of specific interest will be the neural correlates of individual differences in traits such as empathy how we distinguish between ourselves and other people and the sensorimotor resonant mechanisms that may allow us to put ourselves in another s shoes

The Permanence of the Political Joseph M. Schwartz,1995-11-13 Why have radical political theorists whose thinking inspired mass movements for democracy been so suspicious of political plurality According to Joseph Schwartz their doubts were involved with an effort to transcend politics Mistakenly equating all social difference with the harmful way in which particular interests dominated marketplace societies radical thinkers sought a comprehensive set of true human interests that would completely abolish political strife In extensive analyses of Rousseau Hegel Marx Lenin and Arendt Schwartz seeks to mediate the radical critique of democratic capitalist societies with the concern for pluralism evidenced in both liberal and postmodern thought He thus escapes the authoritarian potential of the radical position while appropriating its more democratic implications In Schwartz s view a reconstructed radical democratic theory of politics must sustain liberalism s defense of individual rights and social pluralism while redressing the liberal failure to question structural inequalities In proposing such a theory he criticizes communitarianism for its premodern longing for a monolithic virtuous society and challenges the politics of difference for its failure to question the undemocratic terrain of power on which difference is constructed In conclusion he maintains that an equitable distribution of power and resources among social groups necessitates not the transcendence of politics but its democratic expansion

False Consciousness and Ideology in Marxist Theory Ron Eyerman,1981 Fichte's Transcendental Philosophy G Nter Z Ller,2002-11-07 The first book in

English on Fichte s major works examines the transcendental theory of self *Problems of Theoretical Psychology*

International Society for Theoretical Psychology. Conference,1996 Limbic-Brainstem Roles in Perception, Cognition,

Emotion and Behavior Hisao Nishijo, Robert Rafal, Marco Tamietto, 2018-08-03 The brainstem limbic regions including the superior colliculus pulvinar and amygdala receive direct perceptual information as a rapid coarse subcortical sensory system bypassing early sensory cortical systems and play a central role in innate behaviors including motivated and avoidance behaviors Recent human neuropsychological studies including those on cortical blindness suggest that these subcortical sensory pathways are functional in the intact human brain and interact with more evolutionary recent cortical systems This eBook presents up to date advancements in this area and to highlight the functions of the brainstem limbic regions in a variety of perceptual cognitive affective and behavioral domains We hope that this current Research Topic provides a comprehensive review to understand roles of the subcortical brainstem limbic regions in some forms of sensory motor coupling cognitive and affective functions

Towards Process Safety 4.0 in the Factory of the Future André Laurent, 2023-08-15 The rapid development of new technologies in the industry of the future implies a major evolution in the industrial safety measures needed to be met such as societal requirements Towards Process Safety 4 0 in the Factory of the Future presents the concept of Safety 4 0 from the point of view of process safety occupational safety and health as well as systems cyber security Numerous examples illustrate the different approaches of the identified methods and techniques of Safety 4 0 Their concepts paradigms structural bases couplings complexities and flaws are systematically analyzed This comprehensive approach to Safety 4 0 is aimed at the wide variety of actors working in the industry of the future

Arguments and Analysis in Bioethics Matti Häyry, 2010 Values in Bioethics ViB co sponsored by the International Association of Bioethics makes available original philosophical books in all areas of bioethics including medical and nursing ethics health care ethics research ethics environmental ethics and global bioethics

Recent Trends in Theoretical Psychology Henderikus J. Stam, Leendert P. Mos, Warren Thorngate, Bernie Kaplan, 2012-12-06 I was asked and alas with little reflection on the magnitude of the task thoughtlessly consented to take on the simple job of writing a preface to the collection of essays comprising this volume That I was asked to carry out this simple task was probably due to one consideration I was the main representative of the host institution Clark University for the 1991 ISTP Conference at which the talks foreshadowing and outlining the extended remarks here printed were originally presented and hence as a token of gratitude I was vouchsafed the honor of setting the stage It did not dawn on me until I began piecemeal to receive and accumulate over a period of months the remarkably diverse and heterogeneous essays precipitated by the conference how mind boggling it would be to pen a preface pertinent to such an aggregate of prima facie unrelated articles Typically prefaces to collections of essays from different hands are attempts by the prefator or a pride of prefators to provide an overview a concise map of the complex terrain which readers are invited to enter or to direct the attention of potential readers to what the editors take to be the essential or central themes of each of the variegated articles a practice which not infrequently and often not unjustifiably irritates and even enrages individual authors who object to the complexity profundity and nuanced

character of their thought being reduced to clicMs and editorial equivalents of sound bites

Agenda Relevance: A Study in Formal Pragmatics, 2003-05-29 Agenda Relevance is the first volume in the authors omnibus investigation of the logic of practical reasoning under the collective title A Practical Logic of Cognitive Systems In this highly original approach practical reasoning is identified as reasoning performed with comparatively few cognitive assets including resources such as information time and computational capacity Unlike what is proposed in optimization models of human cognition a practical reasoner lacks perfect information boundless time and unconstrained access to computational complexity The practical reasoner is therefore obliged to be a cognitive economizer and to achieve his cognitive ends with considerable efficiency Accordingly the practical reasoner avails himself of various scarce resource compensation strategies He also possesses neurocognitive traits that abet him in his reasoning tasks Prominent among these is the practical agent's striking though not perfect adeptness at evading irrelevant information and staying on task On the approach taken here irrelevancies are impediments to the attainment of cognitive ends Thus in its most basic sense relevant information is cognitively helpful information Information can then be said to be relevant for a practical reasoner to the extent that it advances or closes some cognitive agenda of his The book explores this idea with a conceptual detail and nuance not seen in the standard semantic probabilistic and pragmatic approaches to relevance but wherever possible the authors seek to integrate alternative conceptions rather than reject them outright A further attraction of the agenda relevance approach is the extent to which its principal conceptual findings lend themselves to technically sophisticated re-expression in formal models that marshal the resources of time and action logics and labelled deductive systems Agenda Relevance is necessary reading for researchers in logic belief dynamics computer science AI psychology and neuroscience linguistics argumentation theory and legal reasoning and forensic science and will repay study by graduate students and senior undergraduates in these same fields Key features relevance action and agendas practical reasoning belief dynamics non classical logics labelled deductive systems
