Condorcet From Natural Philosophy To Social Mathematics:

Condorcet Keith M. Baker, 1975 Condorcet and Modernity David Williams, 2004-09-16 The Marquis de Condorcet was one of the few Enlightenment ideologists to witness the French Revolution and participate as an elected politician at the centre of events during France's transition from monarchy to republic *Condorcet and Modernity* explores the interaction between Condorcet's political theory legislative pragmatism public policy proposals and the management of change David Williams examines key topics including rights the civil order the Church the slave trade women's civil rights judicial reform voting and representation economics monarchy power and revolution He explores the complex links between Condorcet as the visionary ideologist and Condorcet as the pragmatic legislator and between Condorcet's concept of modernity the application of social arithmetic to government policies Based on an extensive array of both printed and manuscript sources this major contribution to enlightenment studies is a full treatment of Condorcet's politics Duel at Dawn Amir Alexander, 2011-10-15 In the fog of a Paris dawn in 1832 variste Galois the 20 year old founder of modern algebra was shot and killed in a duel That gunshot suggests Amir Alexander marked the end of one era in mathematics and the beginning of another Arguing that not even the purest mathematics can be separated from its cultural background Alexander shows how popular stories about mathematicians are really morality tales about their craft as it relates to the world In the eighteenth century Alexander says mathematicians were idealized as child like eternally curious and uniquely suited to reveal the hidden harmonies of the world But in the nineteenth century brilliant mathematicians like Galois became Romantic heroes like poets artists and musicians The ideal mathematician was now an alienated loner driven to despondency by an uncomprehending world A field that had been focused on the natural world now sought to create its own reality Higher mathematics became a world unto itself pure and governed solely by the laws of reason In this strikingly original book that takes us from Paris to St Petersburg Norway to Transylvania Alexander introduces us to national heroes and outcasts innocents swindlers and martyrs all uncommonly gifted creators of modern mathematics **Utopian Moments** J. C. Davis, Miguel Avilés, J. Colin Davis, 2012-06-05 *Utopian Moments* is a collection of short essays designed to guide readers to informed engagement with the key works of the modern western utopian tradition It offers a fresh and original perspective on utopian writings and their interpretation **Science and Immortality** Charles B. Paul, 2024-06-21 From the eighteenth century until as recently as World War II the natural scientist was depicted as a kind of moral superhero objective modest ascetic and selflessly dedicated to the betterment of humanity What accounts for the widespread diffusion of this myth In *Science and Immortality* Charles B Paul provides a partial explanation The modern ideology of the scientist as disinterested seeker after truth arose partly through the transformation of an ancient literary form the commemoration of heroes In 1699 Bernard de Fontenelle as Secretary of the Paris Academy of Sciences inaugurated the tradition of the loge or eulogy in honor of members of the Academy The moral qualities that had once been attributed to the idealized Stoic philosopher were transferred in the

eulogies to the natural philosopher or scientist The over two hundred loges composed between 1699 and 1791 by Fontenelle and his successors Mairan Fouchy and Condorcet served as a powerful device for the popularization of science It was the intention of the secretaries though not only to exhibit the natural scientist as a modern day hero but also to present a truthful record of scientific activity in France Paul examines the loges both as a literary form that used rhetorical and stylistic devices to reconcile these two conflicting goals and as a collective biography of a new breed of savants one that already contained the seed of the conflict between self image and reality embedded in the modern scientific enterprise A unique history of science in eighteenth century France Science and Immortality illuminates the record in the loges of the professionalization of some sciences and the maturation of others the recognition of their utility to society and the state and the widening trust in science as the remedy to economic restriction and political absolutism Paul s thorough catalog of the loges extensive bibliography and translations of representative loges make this book an essential source for scholars in the field This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1980

Classical Probability in the Enlightenment, New Edition Lorraine Daston, 2023-08-08 An award winning history of the Enlightenment quest to devise a mathematical model of rationality What did it mean to be reasonable in the Age of Reason Enlightenment mathematicians such as Blaise Pascal Jakob Bernoulli and Pierre Simon Laplace sought to answer this question laboring over a theory of rational decision action and belief under conditions of uncertainty Lorraine Daston brings to life their debates and philosophical arguments charting the development and application of probability theory by some of the greatest thinkers of the age Now with an incisive new preface Classical Probability in the Enlightenment traces the emergence of new kind of mathematics designed to turn good sense into a reasonable calculus

Sentimental Savants Meghan K. Roberts, 2016-10-26 An illuminating study of the marriages and family lives of Diderot Lavoisier and other geniuses of the Age of Reason We may imagine the lone scientific or philosophical genius generating insights in isolation but in reality the families of scientists and philosophers during the Enlightenment played a substantial role not only making space for inquiry within the home but also assisting in observing translating calculating and illustrating Sentimental Savants is the first book to explore the place of the family among the savants of the French Enlightenment a group that openly embraced their families and domestic lives even going so far as to test out their ideas from education to inoculation on their own children Meghan K Roberts delves into the lives and work of such major figures as Denis Diderot Emilie Du Chatelet the Marquis de Condorcet Antoine Lavoisier and Jerome Lalande to paint a striking portrait of how sentiment and reason interacted in the eighteenth century to produce not only new kinds of knowledge but new kinds of families as well A well crafted study an important contribution to what Robert Darnton has called

the social history of ideas Choice Happiness and Utility Georgios Varouxakis, Mark Philp, 2019-07-29 Happiness and Utility brings together experts on utilitarianism to explore the concept of happiness within the utilitarian tradition situating it in earlier eighteenth century thinkers and working through some of its developments at the end of the nineteenth and beginning of the twentieth centuries Drawing on a range of philosophical and historical approaches to the study of the central idea of utilitarianism the chapters provide a rich set of insights into a founding component of ethics and modern political and economic thought as well as political and economic practice In doing so the chapters examine the multiple dimensions of utilitarianism and the contested interpretations of this standard for judgement in morality and public policy

The Secular City T. D. Hemming, 1994 Central to the Enlightenment is the ideal of the Secular City in militant reply to the Civitas Dei of St Augustine The essays in this volume illustrate the elaboration of that vision both in the planning and depiction of actual cities and in the speculation on social justice to which Voltaire in particular devoted himself Freedom in French Enlightenment Thought Mary Efrosini Gregory, 2010 Freedom in French Enlightenment Thought examines how five eighteenth century French theorists Montesquieu Diderot Rousseau Voltaire and Condorcet kindled the flame of freedom in America and France Each thinker laid down a building block that would eventually inspire the language in constitutions around the world They held that citizens have certain inalienable rights that are dictated by natural law and endowed to all by our Creator that these rights include equality before the law justice safety and security of persons and property and freedom of speech press assembly and religion Montesquieu recommended three separate branches of government that function independently of each other Diderot held that there is no true sovereign except the nation that there is no true legislator except the people Rousseau advised that the individual will must be subordinate to the general will and private interest to that of the community he warned against legislators who act from their own financial interests and enact laws to aggrandize themselves Voltaire believed that selfishness greed and the desire for luxury are not only part of human nature but that they compel people to achieve trade with others search explore and invent the passions are the engine that makes capitalism run and that stimulate all human endeavor Condorcet a champion of civil rights boldly proclaimed equality for women blacks and the poor The philosophes held that free and universal public education will permit more citizens to participate in the progress of the arts and sciences and will improve the standard of living among all strata of society An unrestrained press permits citizens to make informed decisions Their polemics have indeed changed the face of the world

Console and Classify Jan E. Goldstein, 2001 Since its publication in 1989 Console and Classify has become a classic work in the history of science and in French intellectual history Now with a new afterword this much cited and much discussed book gives readers the chance to revisit the rise of psychiatry in nineteenth century France the shape it took and why and its importance both then and in contemporary society Goldstein has raised our understanding of the politics of psychiatric professionalization on to a new plane Roy Porter Times Higher Education Supplement A n historiographical tour de force

quite simply the most insightful work on the subject in English or any other language A work of distinctive originality It is written with lucidity and elegance even a certain confident scholarly panache that make it a pleasure to read Toby Gelfand Social History Exhaustively researched elegantly written and persuasively argued Console and Classify is an excellent example of the sociologically informed intellectual history stimulated by Kuhn and Foucault Robert Alun Jones American Journal of Sociology

A Critical Dictionary of the French Revolution François Furet,Mona Ozouf,1989 The French Revolution that extraordinary event that founded modern democracy continues to provoke a reevaluation of essential questions This volume presents the research of a wide range of international scholars into those questions 58 color illustrations 10 halftones

[A History of Economic Theory and Method](#) Robert B. Ekelund, Jr.,Robert F. Hébert,2013-08-30 Known for its clarity comprehensiveness and balance the latest edition of A History of Economic Theory and Method continues that tradition of excellence Ekelund and Hébert's survey provides historical and international contexts for how economic models have served social needs throughout the centuries beginning with the ancient Greeks through the present time The authors not only trace ideas that have persisted but skillfully demonstrate that past discredited ideas also have a way of spawning critical thinking and encouraging new directions in economic analysis Coverage that distinguishes the Sixth Edition from its predecessors includes a detailed analysis of economic solutions by John Stuart Mill and Edwin Chadwick to problems raised by the Industrial Revolution the role of psychology and experiments in understanding demand and consumer behavior discussions of modern economic theory as it interrelates with other social sciences and a close look at the historical development of the critical role of entrepreneurship both in its productive and unproductive variants The authors creative approach gives readers a feel for the thought processes of the great minds in economics and underscores key ideas impacting contemporary thought and practice Well crafted discussions are further enriched by absorbing examples and figures Thorough suggested reading lists give options for more in depth explorations by interested readers

Progress Leo Marx,Bruce Mazlish,2025-10-01 Progress perhaps the fundamental secular belief of modern Western society has come under heavy fire recently because after three centuries advances in science and technology seem increasingly to bring problems in their wake alienation environmental degradation the threat of nuclear destruction The idea of progress is brought into question by postmodern critique attacking the notion of science as truth Yet no other meaningful organization of humankind's sense of time looms on the horizon This volume seeks to reassess the meaning and prospects of the idea of progress Looking toward the millennium the volume seeks to evaluate the idea's worth both in theory is it intellectually viable and defensible today and practice even if theoretically defensible is the idea undermined in actual life Approaching these questions from the perspectives of science anthropology economics religion political philosophy feminism medicine environmental studies and the Third World the contributors all distinguished scholars provide a unique and critical balance Ultimately the contributors find that progress is both a fact and an illusion it

does occur in certain areas but it does not sweep all before it as its Enlightenment votaries thought it would This foundational idea permeates discourse in the natural and social sciences as well as the humanities and will engage historians students of the history of science and technology sociologists political scientists philosophers literary scholars and art critics as well as those interested in civilization in general Contributors include Jill Ker Conway Zhiyuan Cui Leon Eisenberg Robert Heilbroner Gerald Holton Leo Marx Bruce Mazlish Ali A Mazrui Alan Ryan John M Staudenmaier George W Stocking Jr and Richard White A discerning reconsideration of the idea of progress in a variety of carefully defined theoretical and empirical historical contexts David Hollinger University of California Berkeley Leo Marx is Professor of American Cultural History Emeritus Massachusetts Institute of Technology Bruce Mazlish is Professor of History Massachusetts Institute of Technology

Locating American Studies Lucy Maddox, 1999 This collection of 17 essays first printed in *American Quarterly* the journal of the American Studies Association To mark the Association's 50th anniversary in 1998 the editor has brought together works by a group of scholars which she believes provide a window into the history and evolution of the practice of American studies Each essay originally published between 1950 and 1996 is accompanied by a commentary in which a scholar from a related field provides critical information for understanding the continuing importance of the work to the American Studies field Contributors include Gene Wise Henry Nash Smith Barbara Welter Alexander Saxton and Kevin Mumford

Toward an Intellectual History of Women Linda K. Kerber, 2017-12-10 As a leading historian of women Linda K Kerber has played an instrumental role in the radical rethinking of American history over the past two decades The maturation and increasing complexity of studies in women's history are widely recognized and in this remarkable collection of essays Kerber's essential contribution to the field is made clear In this volume is gathered some of Kerber's finest work Ten essays address the role of women in early American history and more broadly in intellectual and cultural history and explore the rhetoric of historiography In the chronological arrangement of the pieces she starts by including women in the history of the Revolutionary era then makes the transforming discovery that gender is her central subject the key to understanding the social relation of the sexes and the cultural discourse of an age From that fundamental insight follows Kerber's sophisticated contributions to the intellectual history of women Prefaced with an eloquent and personal introduction an account of the formative and feminist influences in the author's ongoing education these writings illustrate the evolution of a vital field of inquiry and trace the intellectual development of one of its leading scholars

James Madison and the Spirit of Republican Self-Government Colleen A. Sheehan, 2009-01-12 Sheehan argues that Madison's vision for the new nation was informed by the idea of republican self government

Enlightenment Biopolitics William Max Nelson, 2024-05-06 A wide ranging history tracing the birth of biopolitics in Enlightenment thought and its aftermath In *Enlightenment Biopolitics* historian William Max Nelson pursues the ambitious task of tracing the context in which biopolitical thought emerged and circulated He locates that context in the Enlightenment when emancipatory ideals sat

alongside the horrors of colonialism slavery and race based discrimination In fact these did not just coexist Nelson argues they were actually mutually constitutive of Enlightenment ideals In this book Nelson focuses on Enlightenment era visions of eugenics including proposals to establish programs of selective breeding forms of penal slavery and spurious biological arguments about the supposed inferiority of particular groups The Enlightenment he shows was rife with efforts to shape harness and organize the minds and especially the bodies of subjects and citizens In his reading of the birth of biopolitics and its transformations Nelson examines the shocking conceptual and practical connections between inclusion and exclusion equality and inequality rights and race and the supposed improvement of the human species and practices of dehumanization

The World of the Enlightenment Vincenzo Ferrone, 2025-03-24 The Enlightenment was a laboratory of modernity that changed the history of the Western world helping to bring about globalisation and the rise of a powerful intellectual class It gave the scientific revolution new methods and a new purpose by ushering in the sciences of man At the same time it constantly interrogated these new sciences wary of the possibility that they might lead to discrimination rather than emancipation The late Enlightenment the most mature and productive period developed its values and political ideals such as the concept of liberty and of a constitutional and republican government through its confrontation with the Ancien r gime the slave trade and imperial colonialism and the betrayal of the revolutionary ideals in the Americas The World of the Enlightenment is a wide ranging discussion of one of the most important cultural phenomena of the modern era It covers topics from the scientific such as the approaches of empiricism and humanism the political the rights of man slavery and colonial independence and the artistic modern art and public opinion The author discusses these topics thematically in ten chapters This book will appeal to scholars and students alike studying the Enlightenment and the history of intellectualism as well as all those interested in the history of modern science politics and culture
