Qualities: Tensions in Education Reforms Clementina Acedo,Don Adams,Simona Popa,2012-09-07 Quality and Qualities Tensions in Education Reforms is a provocative call for understanding and further exploring the elusive concept of quality in education Although education quality has acquired high priority in the past few decades the multiplicity of conceptualizations of quality also reflects the concerns and foci of multiple stakeholders Coming to an understanding of quality education involves careful analysis of the context from which any particular reform or program emerges and of the continuing struggle to define and achieve it Two main questions persist who benefits from particular policies focused on quality And what are the potential tradeoffs between a focus on quality equitable distribution of education and inclusion of various traditional expectations This book explores notions of quality as understood within various systems of national formal and nonformal education Also it considers the tensions that arise with the introduction of new standardized notions of quality in relation to international measures and educational reforms in developing countries In all cases specific national issues and concerns compete with global agendas Challenges to quality that are given particular attention in the book chapters include changing definitions of quality high expectations for education and issues with implementation and the introduction of English as a means to achieve quality in a globalizing world Special attention is also given to possible actions that support a more equitable education without ignoring the requisite of quality The final chapter suggests three models choices for seeking higher quality and guiding the educational future of nations **Crisis and Hope** Gustavo Fischman,Stephen Ball,Silvina Gvirtz,2003-12-16 This book seeks to offer the most up to date and relevant sample of contemporary research on Latin American education by inviting the reader to understand the complexities heterogenetics nightmares dreams crisis and promises of education in the region **School Knowledge in Comparative and Historical Perspective** Aaron

Benavot,Cecilia Braslavsky,Nhung Truong,2007-06-27 In this special edited volume scholars with diverse backgrounds and conceptual frameworks explore how economic political social and ideological forces impact on school curricula over time and place In providing regional and global perspectives on curricular policies practices and reforms the authors move beyond the conventional notion that school contents reflect principally national priorities and subject based interests **Education**

Research and Policy Jennifer Ozga,Terri Seddon,Thomas S. Popkewitz,2006 The 2006 edition of one of the most respected annual publication in education focusing on research and its effects on educational policy around the globe International Perspectives on Adolescence Tim Urdan,Frank Pajares,2003-11-01 **World Yearbook of Education 2006** Jenny

Ozga,Terri Seddon,Thomas S. Popkewitz,2013-01-11 This volume considers the ways in which educational research is being

shaped by policy across the globe Policy effects on research are increasingly influential as policies in and beyond education drive the formation of a knowledge based economy by supporting increased international competitiveness through more effective evidence based interventions in schooling education and training systems What consequences does this increased steering have for research in education How do transnational agencies make their influence felt on educational research How do national systems and traditions of educational research and relations with policy respond to these new pressures What effects does it have on the quality of research and on the freedom of researchers to pursue their own agendas The 2006 volume of the World Yearbook of Education explores these issues focusing on three key themes globalising policy and research in education steering education research in national contexts global local politics of education research The 2006 volume has a truly global reach incorporating transnational policy perspectives from the OECD and the European Commission alongside national cases from across the world in contrasting contexts that include North and South America Canada France Singapore China Russia and New Zealand The range of contributions reflect how pervasive these developments are how much is new in this situation and to what extent evidence based policy pressures on research in education build on past relationships between education and policy This book considers the impact of the steering processes on the work and identities of individual researchers and considers how research can be organised to play a more active role in the politics of the knowledge economy and learning society

Adolescencia, posmodernidad y escuela Silvia Di Segni de Obiols, Guillermo

Obiols, Silvia Di Segni Obiols, 2006 Los autores plantean a partir de un enfoque global y ameno la crisis de la escuela

secundaria y la situación del alumno adolescente en la posmodernidad Aunque el desarrollo tiene un eje definido aspira a plantear problemas y suscitar un diálogo franco más que a otorgar respuestas que se constituyan en recetas para orientar conductas de profesores alumnos padres o directivos A su vez ambiciona enriquecer y profundizar los debates ya existentes en la escuela secundaria acerca de su sentido el contenido de sus enseñanzas el rol de los docentes los alumnos y los directivos El libro está dirigido a todos aquellos que viven distintas caras de la crisis profunda de una institución y que se preguntan por la situación de la adolescencia
