considered in this book The particular salience of this research lies in the fact that it has been conducted during an interesting politically and volatile globally period for the world s tourism industry Increasing competition economic and environmental issues combined with the continued threat of terrorism and instability in the Middle East necessitated governments assessing and redefining their tourism public policies How they approached this in the late nineties and new Millennium is reflected in the first part of the book The second part focuses on Scotland whose tourism public policy issues in the late nineties were focused concentrated and mutated by globalization political devolution and the restoration of the Scottish Parliament in 1999 In consequence tourism and economic development powers were devolved to Edinburgh from Westminster However other powers such as fiscal and employment policies which impacted greatly on tourism were reserved to Westminster a complex situation which the book has also set out to explain as it does the Scottish Parliament s inability to influence such powers During the lifetime of the first parliament in almost three hundred years Scottish tourism was confronted by significant challenges e g the foot and mouth epidemic the terrorist atrocities in the USA Indonesia and Kenya the combination of which for a short but crucial period virtually decimated North American tourism trade to Europe and of course recession

Tropes of Politics John S. Nelson, 1998-04-15 Talk is of central importance to politics of almost every kind it s no accident that when the ancient Greeks first attempted to examine politics systematically they developed the study of rhetoric In Tropes of Politics John Nelson applies rhetorical analysis first to political theory and then to politics in practice He offers a full and deep critical examination of political science and political theory as fields of study and then undertakes a series of creative examinations of political rhetoric including a deconstruction of deliberation and debate by the U S Senate prior to the Gulf War Using the neglected arts of argument refined by the rhetoric of inquiry Nelson traces how everyday words like consent and debate construct politics in much the same way that poets such as Mamet and Shakespeare construct plays and he shows how we are remaking our politics even as we speak Tropes of Politics explores how politicians take stands and political scientists probe representation how experts become informed even as citizens become authorities how students actually reinvent government while professors merely model politics how senators wage war yet keep comity among themselves The action Nelson shows is in the tropes these figures of speech and images of deed can persuade us to turn from ideologies like liberalism toward spectacles about democracy or movements into environmentalism and feminism His argument is that inventive attention to tropes can mean better participation in politics And the argument is in the tropes evidence itself as sights or citations governments as machines or men politics as hardball or softball deliberations as freedoms or constraints borders as fringes or friends
