The Oxford Guide for Writing Tutors Melissa Ianetta, Lauren Fitzgerald, 2016 The Oxford Guide for Writing Tutors introduces two conversations to the tutor s preparation one about the creation of knowledge in writing programs the other about tutor research This approach to tutor training provides several benefits First it allows tutors to test their theories of what might work in a writing center session and helps them to move professional conversation towards why such things happen They bridge the theory practice divide that often frustrates both novices and experienced tutors By conducting research to answer such questions tutors can help themselves the writers with whom they work their fellow tutors and the writers with whom they work And further this approach gives the reader new methods for appreciating and critiquing scholarly work making it easier to understand the best ways to help writers and to move the field forward As writing tutoring programs take on a variety of forms and pursue a range of missions this book aims to create a flexible text whose contents can be easily rearranged to support a broad spectrum of reader needs Each chapter accordingly can be read independently the text does not rely on a sequential reading to create meaning The book also includes intra textual and extra textual references for the reader who wants to inquire further That is throughout the book are references to material in other chapters that might be of interest to the reader intrigued by the topic at hand So too in each chapter we include references to and citations of the scholarship that supports much of the common knowledge of the field including in the Handbook both previous tutor education textbooks and research from the field The aim is to aid the interested reader s inquiry into the

scholarship of the field as well as to ground advice about practice in research that testifies to the effectiveness a range of tutoring practices Much of the scholarship cited throughout the book is authored by undergraduate tutor researchers as well as several former tutors who were graduate students when they published their articles This crucial aspect best models the ways in which tutors themselves can bring together practice and research in their day to day work and in their informed thinking about this work Including tutor voices is an important tradition of the tutor education textbook because these are voices that speak to the issues concerning tutors in a range of institutions and programs across the country

ESL Readers and Writers in Higher Education Norman W. Evans, Neil J Anderson, William G. Eggington, 2015-06-12 ESL Readers and Writers in Higher Education describes the challenges ESL students in U S postsecondary institutions face when studying in a second language and offers suggestions for how teachers advisors tutors and institutions might provide support that meets the reading and writing needs of this very important student population Because the ESL profession as a whole including what professionals are doing in the classroom sits under the umbrella of an institutional response to a language related challenge some solutions aimed at helping students achieve optimal proficiency lie outside of the classroom As such this book is based on the assertion that language development support is not the sole responsibility of language teachers Everyone on campuses that hosts ESL students bears some responsibility for these students language development Chapters are therefore intentionally adapted to appeal to a wide variety of readers from classroom teachers and teachers in training to admissions officers academic advisors and international student advisors

Corbett, 2015-03-15 This book offers multi method case studies of course based tutoring and one to one tutorials in developmental first year writing courses at two universities The author makes an argument for more peer to peer learning situations for developmental writers and more detailed studies of what goes on in these peer centered environments

Monty, 2016-05-05 Writing centers are complex They are places of scholarly work spaces of interdisciplinary interaction and programs of service among other things With this complexity in mind this book theorizes writing center studies as a function of its own rhetorical and discursive practices In other words the things we do and make define who we are and what we value Through a comprehensive methodological framework grounded in critical discourse analysis this book takes a closer look at prominent writing center discourses by temporarily shifting attention away from the stakeholders work locations and scholarship of the discipline and onto things the artifacts and networks that make

up the discipline Through this approach we can see the ways the discipline reinforces challenges reproduces and subverts structures of institutional power As a result writing center studies can be seen a vast ecosystem of interconnectivity and intertextuality
